

The personal wrist rest for computer users

wristdonut[®]

Introducing the wrist donut - the personal wrist rest for computer users.

Ergonomically designed to cradle and support the lower palm and wrist joint in a level, comfortable and relaxed position; the wrist donut frees computer users from the fixed working position of desk mounted wrist rests, allowing complete freedom of movement for hands, arms and shoulders.

Use: One wrist donut provides support when using a mouse - two provide support when using a keyboard and mouse.

Technical: CE marked to conform to Personal Protective Equipment Directive 89/686/EEC; the wrist donut is a Patented and Registered European Design and is manufactured in the South West of England.

Sizes: Available in Small, Medium & Large. Custom sizes available on request. (Downloadable wrist measurer available from www.wristdonut.com).

Colours: Available in a variety of stock colours, including; Black; Red; Dark Navy; Mid Blue; Racing Green and Wine. Custom colours available on request.

Hygiene: Machine washable at 30°C.

Personalising: Ability to personalise by embroidery (e.g. name, nickname, initials).

Corporate Branding: Company logos can be embroidered or printed.

Ordering: Available to order from www.wristdonut.com, via Amazon.co.uk or by contacting us directly. No minimum order quantity.

Please visit our web site or contact us for further information and/or a Quotation.
