# About Us

**Decksafe Solutions Ltd** is one of the UK's leading distributors of fibreglass non slip flooring.

With over 20 years of experience in the GRP industry, our skill and knowledge enables us to provide a professional service to our customers. We also provide technical and design assistance on a range of applications to suit many different industries.

**DeckSafe**

Products are Anti-slip, High Strength, Lightweight & Low Maintenance

**DeckSafe**

Products are also Corrosion Resistant, Fire Retardant & UV Stable

**DeckSafe**

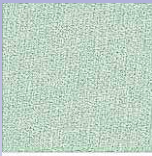

Products replace Wood, Steel & Concrete

We stock quality moulded fibreglass grating and anti-slip safety products: Marina Decking, Industrial Grating, Structural Panels and Anti-Slip Flooring.

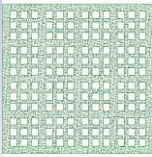

Fibreglass composite grating panels are constructed using continuous glass fibre strands cured with industry approved polyester resins. The angular cut quartz anti slip surface can range from a heavy duty coarse grit to a fine grit, suitable for bare feet. Open mesh grating and solid top panels are stocked in a number of sizes, thicknesses and colours.

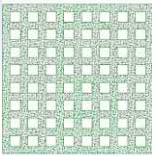

Solid Top

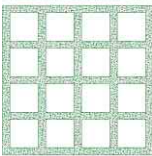

8 x 8mm

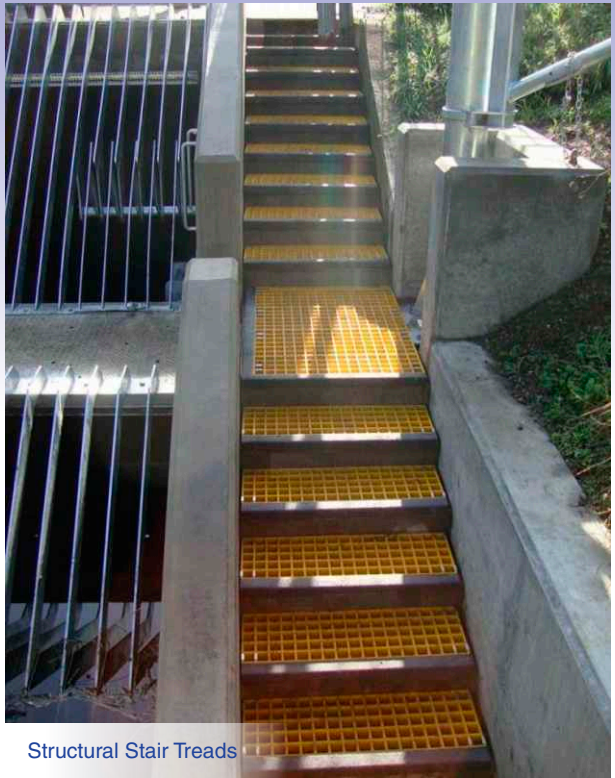

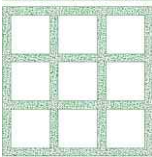

12 x 12mm

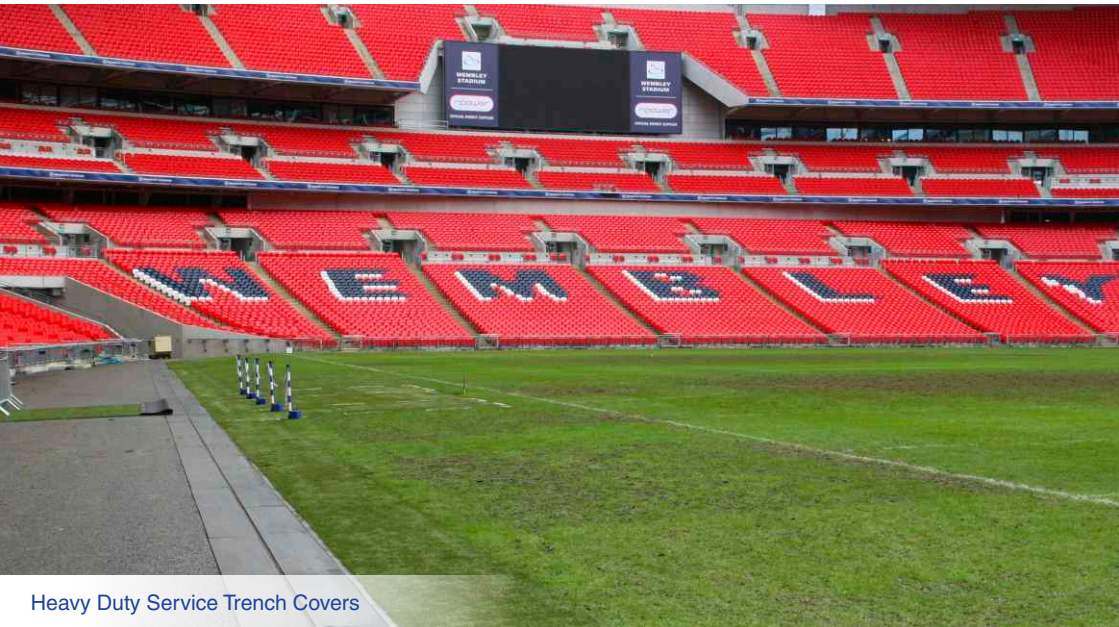

32 x 32mm

42 x 42mm

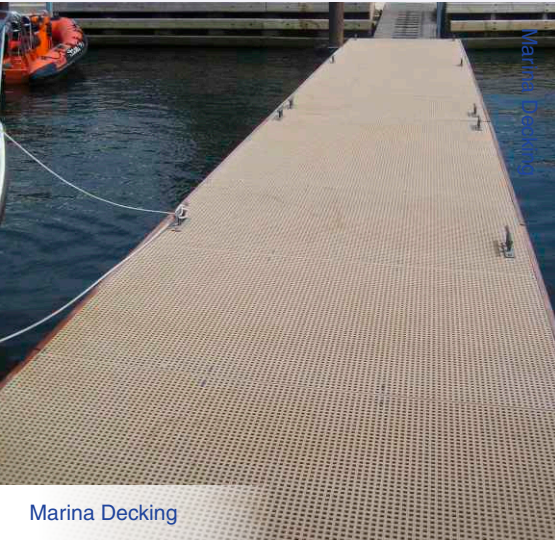

Structural Stair Treads

Heavy Duty Service Trench Covers

# Marina Decking

Fibreglass anti-slip decking has become the ideal sustainable solution to providing a durable decking material along with an excellent anti-slip walking surface. Already successfully installed around the UK's waterways and marinas, on pontoons, jetties, access bridges and ramps

Marina Decking

Pontoon And Finger Decking

Marina Access Ramp

## Benefits

**Anti slip:** Superior grip in wet, oily and icy conditions. Tested in accordance with BS7976.2

**High strength:** Bi-directional loading and impact resistant. Corrosion resistant: Will not rust or rot, algae resistant for longer life span. Non-conductive and chemical resistant

**Low maintenance:** especially compared to traditional materials

**Fire resistant:** BS EN ISO9239-1 and BS EN ISO 11925-2. ASTM E84 class1 and BS476 class2 (BS476 class1 available)

# Industrial Grating

Fibreglass grating has an impressive strength to weight ratio and replaces traditional materials like galvanised steel and aluminium grating. Our products are specified at the design stage and are installed by major construction companies in applications such as flooring, walkways, platforms, ramps and covers.

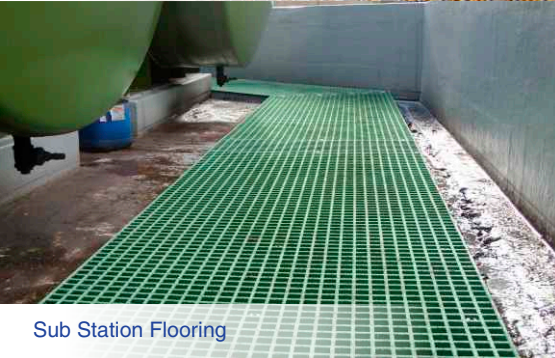

Bespoke Working Platform

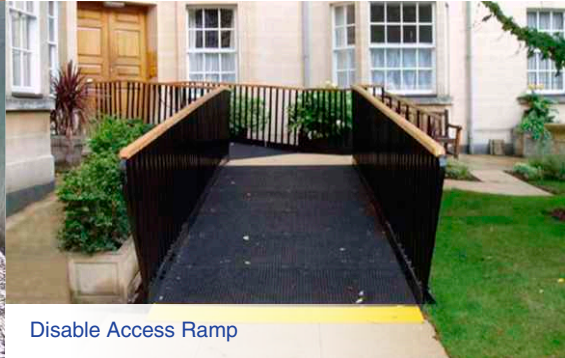

Treatment Plant Duct Cover

Service Steps And Landing

Sub Station Flooring

Disable Access Ramp

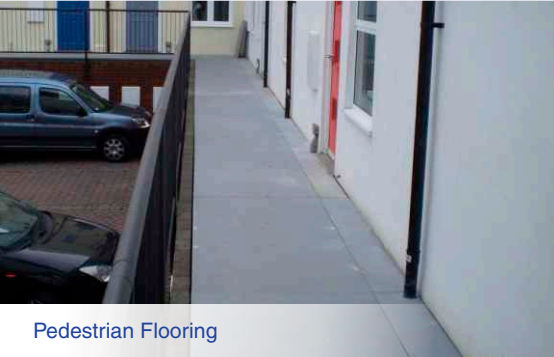

## Applications

- Industrial flooring
- Service duct covers
- Working platforms
- Staircases
- Roof gangways
- Mezzanine floors
- Access ramps
- Pedestrian walkways

Stainless steel fixings and accessories are also available for all Decksafe products

# Structural Panels

Advances in composite materials, fibreglass structural flooring is fast becoming the cost effective solution for heavy duty applications. A range of solid top and structurally cored panels are available to suit a variety of commercial and industrial applications, and can be manufactured to suit BS EN124 specifications.

Pedestrian Flooring

Structural Cored Trench Covers

# GRP Profiles

GRP Pultruded Profiles have a high strength to weight ratio and weigh considerably less than steel sections, resulting in major weight savings and lower installation and handling costs. A wide range of structural profiles are available including: Square and Rectangular Box Section, Angle, Round tube, Channel and Hand Rail

Fabricated Staircase

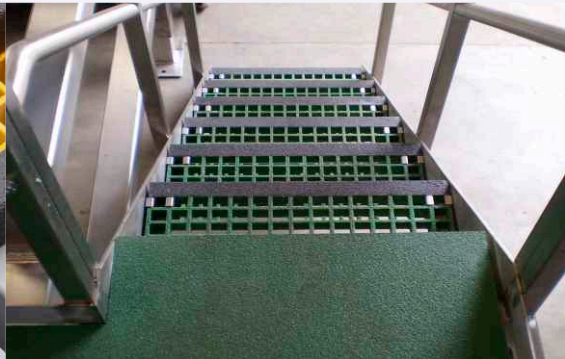

Suspended Gangway

# Stair Treads & Non Slip Covers

Structural stair treads are designed for new and refurbished staircases. These create a safe step with the gritted anti-slip surface and hi-viz nosing. Stair tread covers provide an inexpensive solution to the hazards associated with worn or slippery steps. These can be installed onto existing concrete, timber or steel steps. Anti slip strips are convex in profile and designed to fit directly onto existing timber decking.
