# Architectural Metalwork from Andy Thornton

**Leading manufacturer of high quality bespoke architectural metalwork structures for both exterior and interior environments:**

- 30 years in business
- Extensive manufacturing facilities
- Highly skilled workforce
- Design, manufacture & installation service
- SMSTS site managers & CSCS installers

Andy Thornton undertake major metalwork commissions throughout the UK and worldwide, working in the hospitality, leisure and retail sectors.

Our Architectural Metalwork Department create decorative external structures including entrance canopies, covered walkways, shelters and bandstands. We create bespoke designs, or can utilise our own standard systems, working in mild steel, aluminium and cast iron, incorporating architectural glazing where required.

Our metalworkers also fabricate staircases, balustrades and handrails working in stainless steel, mild steel, brass and a variety of metal finishes, combining specialist joinery and architectural glazing as appropriate.

Working to plans and a design brief we offer a complete service from survey, CAD design and visuals, through to workshop manufacture and site installation, liaising closely with the clients own architect and contractors in all aspects of the project.

Andy Thornton operates from large, well-equipped workshops in Elland, West Yorkshire. All our metalworkers are CSCS cardholders and our site supervisors have completed the SMSTS Site Management Safety Training Scheme course.
