

## Clocking and signing in options

As you'd expect, we supply a range of robust clocking terminals which work with the software systems or standalone.

### uAttend

- Biometric fingerprint and face scanning terminals, wired and WiFi.
- RFID swipe card and fob devices, wired and WiFi.

A free smartphone app, web and phone options are also available for uAttend. (Data from multiple devices is collated into one account).

Biometric face scanning terminal

### Focus

- Biometric fingerprint, hand and face scanning terminals, wired and WiFi.
- RFID swipe card and fob devices, wired and WiFi.

Focus hand scanner

### Standalone devices

- Mechanical punch card.
- Job coster.

## Access control and security

We also offer site and building access control and security solutions.

We can supply:

- Standalone options for a few doors which don't need connecting to a system.
- Access integrated with a time and attendance system.

An integrated solution means you can manage attendance and access with one RFID swipe card or fob per employee. Contact us for details.

If you'd like more information or a demo, call us, **01761 410015**

# Chronologic

## Workforce Management

We offer a choice of cost-effective, flexible and scalable time and attendance solutions to fit the way your organisation works.

## It's about time... and people

Chronologic has been offering customers in manufacturing, construction, facilities management, transport, care homes, hotels, local government, (and many more), a choice of the best time and attendance solutions for over fifteen years.

We take the time to understand what customers need and then support them through the decision making process, installation, implementation and beyond. That's why they stay with us.

Our solutions enable organisations to pay, plan and manage their workforce more effectively.

### Workforce time management and access solutions

"Our people are our greatest asset and we need to harness that talent and **manage our workforce as effectively as possible.**"

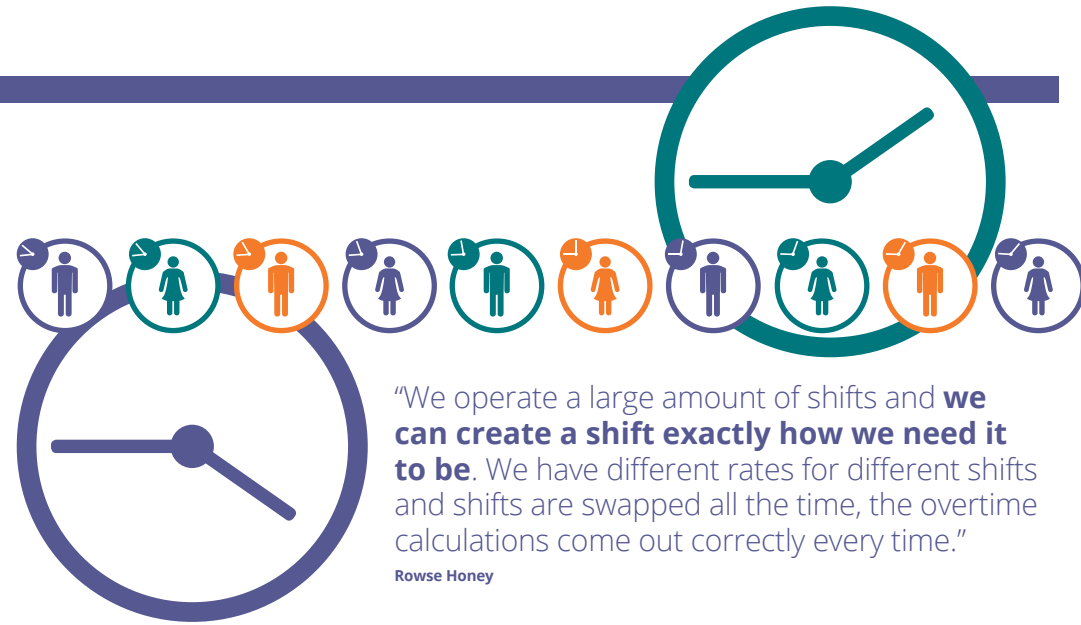

HR Director, Sanguine Hotels

#### Focus

The Focus software suite has all the features and functionality you'd expect from a smart time and attendance system, including fully customisable reporting options. Focus is ideal for organisations with 30+ employees.

- Cloud server or on-premise software installation and management.
- Unlimited number of employees, users and departments.
- Signing in / clocking with biometric (finger, hand and face scanning), and RFID (swipe card and fob) terminals.
- Flexitime, holiday, absence, TOIL and other rules and parameters to calculate hours and pay.
- Export to a range of payroll systems including Sage, Earnie, Qtac and Pegasus.
- Reports include, payroll, Bradford Factor, Working Time Regulations report, cost centre and exception reporting.
- Unlimited number of shifts and patterns including days, nights, triples, four on four off, continentals and flexitime.

"We operate a large amount of shifts and **we can create a shift exactly how we need it to be.** We have different rates for different shifts and shifts are swapped all the time, the overtime calculations come out correctly every time."

Rowse Honey
