

Automation and Control Product Specialists

Product Specification

We can recommend suitable packages for challenging applications.

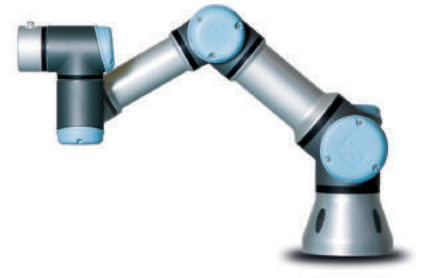

Application Trials

We will demonstrate how a product will meet your requirements.

Training

We offer standard or bespoke training courses to support our customers' engineers.

Kitting System

To ship a package of goods on a repeat basis, we can arrange to kit the items and supply them against a single part number.

Part No. Conversions

If your part is not readily available or is obsolete, we can convert the number to a functionally similar product from the X-STK range.

Stock Management

Choose from conventional supply, kitted parts supplied against a kit number or consignment stock/bonded stock.
