

# NEPS1000 GAS & AIR PURGING SYSTEMS range

Brownell offers a comprehensive range of purging instruments for moisture removal and oxygen inhibiting in equipment and systems to prevent condensation and humidity damage.

## NEPS1000 Advantage

The standard purge instrument using dry nitrogen or air.

## NEPS1900 Racked

The conventional NEPS1000 instrument housed in a 19 Inch rack module for installation in standard rack enclosures.

## NEPS1000 Pumped

This version uses an in built desiccant adsorbent as an alternative when nitrogen gas is not available.

## NEPS1000 Dual Voltage

A 110-240 and 24 volt NEPS1000 for workshop and portable use.
