

Are you providing your clients the perfect wax?

New Ultra Film™ Wax Technology is now available!

Ultra Film™, new from Mancine Cosmetics is the world's thinnest spreading wax.

Mancine Ultra Film™ is scientifically formulated to give your client exceptional results using the most advanced XXX technology.

Blended with the beautiful scent of pomegranate and the soothing properties of Jojoba, Ultra Film™ provides a high performance plastic texture wax with superior grip.

Ultra Film™ delivers 30% more applications than traditional resin waxes and still retains the unique flexibility and elasticity of Ultra Flexx™

Ultra Film™ is an easy glide wax providing no resistance and when applied correctly is almost transparent in application, causing less pain to the client. Ultra Film™ has a low melting point and is suitable for all skin types.

Available in Strip and Hot Wax 1kg.
