canopies uk

Protection from the elements

There are so many benefits of letting your children out to play and let off steam, both in their development and in helping their concentration when lessons start again. So why let the British weather spoil the fun they have at lunchtime and break time?

Canopies UK have the perfect answer as we can give your pupils and staff the ideal place to shelter from the rain and snow or shade from the sun.

Over the years we have installed thousands of canopies for schools throughout the country. Some wanted a sheltered walkway between classrooms, others preferred a covered play space or seating area; but whatever the different requirements, Canopies UK were able to design and install a unique system to provide all the protection they needed.

“Friendly, efficient service”

Crossgates Primary School, Leeds

“It has made an outstanding difference to play activities”

Great Bowden School, Leicester

A company you can trust

Having been in business since 1990, Canopies UK are the country's leading manufacturer of canopy protection systems. With all of our products hand-made at our factory in Darwen, Lancashire, and a network of distribution centres and fitting teams across the UK, our experience and expertise are second-to-none.

We designed and patented our innovative System 2000 range back in 1985, and still to this day there is nothing to beat its quality, practicality and stylish design. Over the years we have used this technology to create a range of products including car ports, patio protection canopies and door canopies.

We are 100% confident in the quality of every one of our products; so much so that to demonstrate their strength we even once put a car on top of a canopy. The picture really does speak for itself!

**5 YEAR
GUARANTEE**
ON EVERY PRODUCT

The ideal solution for every domestic & commercial use

Over the years the flexibility of our range of canopies has meant that they have proved to be as popular with individuals looking for the practicality and style of a canopy for their home, as it has with businesses protecting their premises and pubs & clubs for outside seating areas.

Combining the innovative, self-supporting design, the fact that all canopies are maintenance-free, and the high standard of service from the Canopies UK team, the benefits to you are clear to see.

Canopies UK, the country's leading manufacturer of canopy protection systems, have a range of innovative products that can be individually designed to perfectly meet your needs.

“Looks super, staff and children really enjoy additional all weather outdoor space”

Cambridge Primary School,
Mablethorpe Lincs

Safe and sound

- Canopies UK's patented cantilever design gives our products such strength that they can be completely self-supporting, saving space and meaning no pillars or posts to bump in to.
- No maintenance or painting is required as all canopies are made from highly durable GRP fibreglass.
- Translucent roofing panels let plenty of light through, and yet filter out harmful UV rays thanks to a melinex gel coating.
- All canopies have been fully tested against wind and snow loading. We are so confident that all come with a 'no nonsense' five year guarantee.
- We have installed canopies on to thousands of schools across the UK - ask us if you want details of those in your area.

"Will highly recommend your company."

Toddle Inn Nursery,
Fleetwood

Adding a bit of colour to your school...

Canopies UK have such a range of different products available, that you can even choose a coloured canopy to blend in perfectly with the existing school building or the school colours and uniform.

As you can see from the photos, anything is possible to get your canopy looking just right. We have even done some that are multi-coloured! So if you have any questions or want to talk about what would be the best solution for your school, make sure you get in touch straight away.

“We were really impressed with the quality of the canopy, it looks great and the quality of service excellent.”

Highover Junior & Infants,
Hitchin, Herts

“Workmen were tidy, helpful & minimised disruption. Thank you”

Kingsdon Primary
School, Somerset

“Delighted - both staff and Governors give a high approval rating” Charters School, Ascot, Berkshire

“All appointments and work carried out as arranged.”

Brinsworth Manor Infant
School, Rotherham

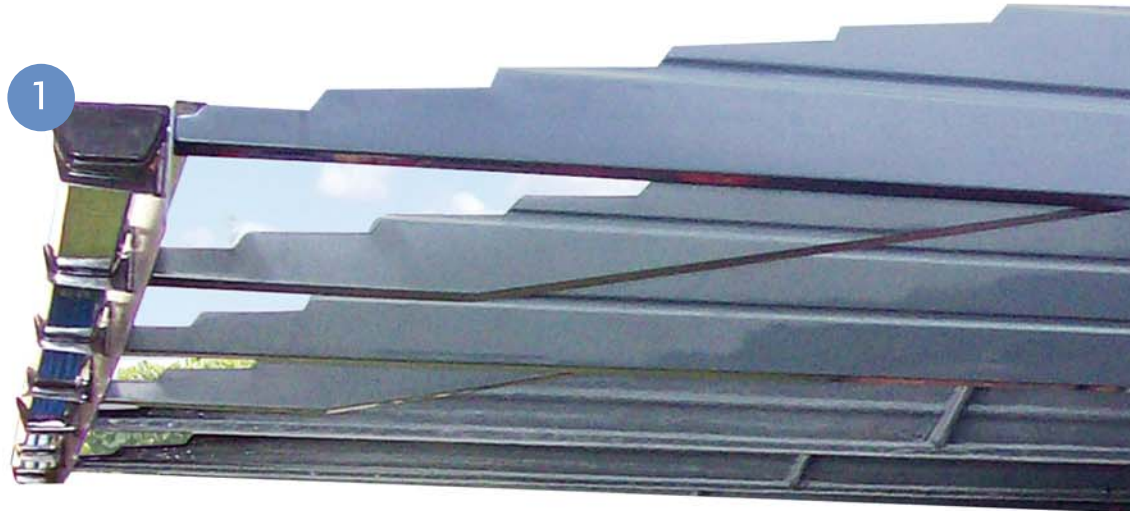

“We are delighted with the canopy and will be contacting Worcester CC to tell them how pleased we are with your company.” St George's CE First School and Nursery

Bespoke designs to suit your needs perfectly

1

As standard we will fit the canopy directly onto the school building.

1

2

We can use tailor made brackets to raise the height if necessary.

3

If we cannot fit onto the school building, we can position posts against the building and install the canopy onto these - keeping the space open and post-free.

4

We can also construct free-standing canopies away from the building.

5

A further illustration of a free-standing canopy.

“It transforms our playground - excellent rain or shine.”

Inslow Primary, Bideford, North Devon

“Considering the difficulties posed by the site, the service was excellent.”

Holymead Infant School, Bristol

“Well manufactured - excellent quality.”

Cheslyn Hay High School, Walsall
