MediCall™

Patient Paging System

Benefit immediately from:

Calmer Patients

Given a MediCall™ pager, patients are free to leave the waiting area knowing they will keep their place in the 'queue'. When patients' appointments are due, staff can instantly and discreetly page them back with the touch of a button. The pagers ensure patients do not miss their name being called or flashed on a screen, which improves patient confidentiality. This also reduces anxiety for the hearing or visually impaired.

Relaxed Visitors

MediCall pagers also reassure friends and relatives waiting for news. Handed a MediCall pager, they can leave the bedside while the patient is with doctors or in surgery. Staff can page companions when patients can be seen again.

Productive Staff

By eliminating crowded waiting areas and anxious patients and visitors, the 'goldfish bowl' effect is removed. Staff members are able to work in a stress-free environment, allowing them to offer better care to patients.

Easy To Use

MediCall is reliable, silent, and easy to use. The system can be set up quickly, and minimal training is required for daily operation.

Cost Effective

MediCall is affordable and designed to save you from extra repair and replacement costs. The digital display enables the pagers to be renumbered in seconds. No more tracking numbers to see which pagers are missing, or ending up with duplicates when reordering.

Eliminate Crowded Waiting Areas Improve the Patient Experience

“With MediCall, my team saves around 140 minutes every day not searching the corridors for patients. The waiting area is also more pleasant for patients and staff.”

– Recep Suleyman, Imaging Services Manager
Whittington Hospital, North London

“MediCall is really compact; the transmitter base is small and doesn't obstruct the reception desk.”

– Children's Services at Brighton & Sussex Uni. Hospitals NHS Trust

Commended*

for improving the patient experience.

MediCall pagers are used extensively throughout Admissions, A&E departments, Same-Day Surgery, Outpatient, Phlebotomy and Pathology clinics and pharmacies.

Additional pager options available

CST Alphanumeric pager

Numeric 1 line or 12 character text message pager. Also available with a paddle.

EuroCoaster

Digital coaster pager, which flashes, beeps and vibrates.

Transceiver IQ Base Unit

This device can be used with all UHF CST pagers. It has a large, menu driven display that shows pager status and estimated waiting time.

All-In-One IQ Transmitter/Charger

The MediCall AIO is a combined base station and charger. It is ideal for smaller premises and limited spaces. Up to 500 metres of coverage, which can be increased by using the CST I-Station as a repeater. Single unit holds 15 pagers – 'daisy chain' additional 15-charger to hold up to 30 pagers.

MediCall IQ Features & Specifications

- > **Customer friendly**
Vibration, tone and flash alerts ensure the pager is noticed.
- > **Extended range**
Powerful transmitter for excellent coverage over a wide area.
- > **Protected against loss**
'Out of range' feature reduces accidental pager loss.
- > **Durable**
Tested to EN13697:2001 and IP54 rated for unbeatable reliability.
- > **Extensive use**
Superior battery efficiency and quick charging mean that pagers can be in almost constant use.
- > **Hygienic**
Antibacterial casing minimises the spread of germs.
- > **Manageable**
Unique 'auto-renumbering' for easy maintenance.

“ The system is simply a really useful tool - so much so, that I've recommended to other outpatient departments in the hospital. It just keeps patients happier.” ”

– Sue Horne, Dispensary Manager,
Frimley Park Hospital, Surrey
