

Features and Benefits

- ▶ No tools assembly feature

- ▶ Quick and simple to construct

- ▶ Height adjustable in seconds

- ▶ Can be moved and relocated in seconds

- ▶ Consists of only 8 parts

- ▶ Lightweight and compact: easy storage and transportation

- ▶ Independently adjustable legs to cope with uneven or sloping ground

- ▶ Long-life durability

- ▶ Non-corrosive aluminium

- ▶ Flexibility to quickly change work locations

Mono-Dec provides simple, rapid access to roofline level, for a single worker in a matter of minutes.

The Mono-Dec platform is designed for the single worker to safely get up to height in under 6 minutes. Ideal for painting or cleaning soffits, or re-pointing brickwork, the Mono-Dec will give the worker a safe, stable platform on which to carry out the work. The platform can be transported in an estate car and is assembled in a matter of minutes. It can then be lifted and shifted around a building with ease.

The Mono-Dec is a 1.2 m long platform on adjustable telescopic legs, it's built on the ground and then quickly raised to the required working height.

Technical Specification

▶ Load rating	300 kg uniformly distributed
▶ System weight	33 kg
▶ Platform size	1.2 m x 800 mm wide
▶ Material	H30 (6082T6) aluminium

Leg Specification

▶ 16' legs	3 m - 4.75 m platform height
------------	------------------------------

Compliance

▶ EN13374 Class C	▶ Patent Registration GB2354793
▶ EN12811	

Mono-Dec is a cost effective work platform that a single user can erect, move and disassemble in minutes. Like the standard Easi-Dec, it can still cope with uneven or sloping ground as each leg is individually height adjusted in increments of 30 mm.

Prior to use a full onsite risk assessment must be carried out and in some circumstances the Mono-Dec must be tied into the structure.
