This range of flexible conduit and fittings from Interflex allows for a possible IP68/69 rating.

As standard the IP66 rated conduit is a solid flexible conduit suitable for any application.

The connector fittings offer a quick assembly and removal of the conduit thanks to the unique 'Easy-Click' system and the conduit can be released with ease without the need for a tool.

The NYLOFIX connectors hold the corrugated conduit all around its entire perimeter. This allows a better distribution of the tensile forces and thus an increase of the installation safety.
