

Document shredders with "Made in Germany" quality provide security. And convincing arguments.

Experience, variety, innovation:*

- 40 years of know-how.
- Largest product range worldwide from document shredders for home usage to shredder press systems or solutions for disposing of digital media.
- User-oriented technology and innovations, such as PAPERcontrol, automatic oiler, metal detector, separate CD cutting unit.

The solid steel cutting rollers: robust and durable.*

- Hardened solid steel cutting rollers for long service life and high resistance to wear.
- Precise cutting unit geometry for high efficiency (special V-Tek groove ensures a higher cutting capacity for the same energy consumption).
- Cutting rollers impervious to staples and paper clips.
- Expertise in shredding various data storage media as well as paper, CD/DVDs, credit cards etc.

Drive and design: powerful and smooth*

- Continuous operation and powerful drive for high performance and longer operation times.
- Low noise due to optimum design of cutting device components and use of high-quality materials.
- Use of patented technology to achieve maximum performance with low level energy consumption.

User safety and design: beautifully safe and secure*

- Maximum user safety (with electronically secured access to the cutting unit, safety unit with contact protection, emergency stop rail, extended and reinforced infeed hopper, button lock).
- High user convenience with intelligent control units and multi-functional control elements (signals for all operating states, warning messages).
- Ergonomic, elegant design.

Warranties and service: comprehensive and customer-friendly*

- In all countries you will receive for the solid steel cutting shafts of the HSM Shredders SECURIO Classic and the security levels 2 to 4 a lifetime warranty (HSM Lifetime Warranty).
- Replacements or repairs are free of charge within the guarantee period.
- Consulting service with individual product advice, data protection advice, service support and advice on spare part requirements.

Energy management and environmental protection – cost effective and sustainable.*

- The principles of sustainability and a sense of responsibility apply to HSM machines, the manufacturing process, material selection and use of energy within the company.
- Use of energy-saving control units to ensure low power consumption (intelligent energy management (EMCS) compared to standard standby modes) or even zero power consumption in standby mode.
- Exclusive use of environmentally-friendly materials.
