Document shredders
Hard drive shredders
Shredder baler combinations
Cardboard perforators
Cutting machines
Consumable materials

HSM[®]
Great Products, Great People.

HSM – For More Performance: Warranties, service, sustainability – these all belong to our understanding of quality.

Guaranteed quality

- HSM produces all document shredders in the HSM SECURIO, Pure, Classic and Powerline product ranges in Germany.
- 3 years warranty for the document shredders HSM SECURIO.
- Lifetime warranty on solid steel cutting rollers in HSM SECURIO, Pure and Classic document shredders at security levels P-2 to P-5. Cutting rollers are impervious to staples and paper clips.
- Expertise in shredding paper documents and various data storage media: CDs/DVDs, credit cards, flash memory, hard drives etc.

Energy management and environmental protection

- The principles of sustainability and a sense of responsibility apply to the products and the production process.
 - Use no electricity in standby: The document shredders HSM SECURIO C14 and C16 and HSM Classic 80.2 to 104.3.
 - Save power:
Thanks to the EcoSmart energy management system, the HSM SECURIO shredders C18 to B35 switch automatically to stand-by mode and are therefore always ready to use. In this mode, the power consumption is less than 0.1 W.
- The HSM Pure shredders are equipped with an energy management system and save electricity in stand-by mode.
- Energy savings of up to 90 %: the HSM SECURIO document shredders of the P-series have an efficient energy management system and make energy savings of up to 90 % in comparison to conventional stand-by switches.
 - Exclusive use of environmentally-friendly materials.
 - Use of patented technology for maximum performance at low energy consumption.
 - Return warranty: used HSM machines are taken back free-of-charge and recycled in an environmentally sound manner.

Security and comfort

- The slight pressure on the safety element prevents unintentional intake and stops the document shredder immediately.
- Anti-Jam Technology with reverse function reduces paper jams and maintains high shredding performance.
- Quiet Operation due to optimal combination of motor and cutting unit. The low acoustic level ensures a quieter workplace.

GERMAN QUALITY

Quality without compromise. Almost all the manufacturing of our products is carried out in Germany. This sets us apart from others. Our innovative developments are based on tradition and years of experience. So, it is only logical that we offer products with proven technology, certified quality and long-term warranties.

www.hsm.eu

Great Products, Great People.

We have been offering our customers “Made in Germany” quality for over 40 years.

With every HSM document shredder, you get a machine combined with decades of experience in manufacturing document shredders. HSM has developed into one of the international market leaders for document shredders from a small machinery plant in southern Germany due to its inventive spirit, expertise, high quality requirements and service orientation. Satisfied customers all over the world are impressed with HSM quality “Made in Germany” produced in the HSM production and assembly plants in Salem, Frickingen and Reichenbach.

Hermann Schwelling founded the company in a small workshop in 1971. With a clear commitment to its sites in Germany, HSM currently employs around 800 employees all over the world: highly-qualified specialists and managers, who have a considerable impact on the success of HSM. They ensure that HSM meets the high requirements of the product quality 100%. “Great Products, Great People” – for the satisfaction and security of HSM customers.

Hermann Schwelling
Company founder HSM GmbH + Co. KG

The best way to ensure quality is to produce it yourself.

HSM stands for quality in development and construction, production, project management and service. All HSM plants are certified according to DIN EN ISO 9001 and are equipped to produce sustainable products. Recyclable materials, components with high-quality materials, wear-resistant designs, energy-saving drives and functions all ensure a long service life. In this way, the value of an HSM product is maintained long-term for each customer.

HSM produces all document shredders in the HSM SECURIO, Pure, Classic and Powerline ranges in Germany.

A decisive advantage – the HSM service.

We take service seriously – with a lot of commitment and we are always glad to help our customers. This not only applies to our headquarters but also to all HSM service centres in Germany and all over the world.

Our warranties and services:

- With every HSM document shredder from the SECURIO, Pure and Classic series, you receive a warranty for solid steel cutting rollers at security levels P-2 to P-5 for the entire lifetime of the machine (HSM Lifetime Warranty).
- Replacements or repairs are free-of-charge within the guarantee period.

- Consulting service: individual product consulting, data protection advice, service support and advice on spare part requirements.
- Training and seminars on products, data protection and service.

Find out all about our services at <http://en.hsm.eu/service>

HSM supports the OroVerde Guatemala Rain Forest project with every document shredder sold.

HSM and the principle of sustainability.

HSM manufactures long-lasting products that will not devalue in the future – and already operate efficiently today. These principles of sustainability and the sense of responsibility apply not only to HSM machines, but also to the production process, material selection and use of energy within the company.

Because of our commitment to Germany, HSM is embedded in optimal framework conditions for environmental protection. HSM is also committed to the OroVerde tropical rain forest charity. HSM supports these activities to protect wildlife, vegetation as well as the climate. It is a small but important step towards the larger goal of preserving the environment for coming generations.

Document shredders are now a necessity: misuse of data causes millions in damages!

Whether at home or at work: everyone needs to protect themselves from data misuse! Sensitive documents end up in the paper basket far too quickly; digital data media is disposed of quite carelessly. Yet we need to be extremely careful with personal data! Companies are even required to do so by the terms of data protection laws.

Dangers of an entirely different calibre are out there as well: increasingly, companies are the targets of industrial espionage. Criminals seek information in the environment of a company on

prices, product development, technical expertise and company strategies. Firewalls and data encryption are all considered – but the proper disposal of information is forgotten. Are your hard drives also shredded as the documentation of meetings, bad copies and CDs are? If not, then the door has been left wide open for industrial espionage and data misuse, and considerable damage to reputation or a financial loss is inevitable.

unsecure

secure

Data protection is underestimated!

In the news practically every week: data misuse is widespread and everyone is at risk when private data gets into the wrong hands. This can result in considerable financial loss but also a loss of reputation and esteem not measurable in monetary terms. That goes for your private life as well as work. Yet companies are obliged by the Data Protection Act in Germany, or by applicable data protection laws in other states, to handle personal data responsibly and correctly. In many companies there is no consistent data protection concept.

Data protection is often not sufficiently put into practice to ensure that theft and misuse can be prevented. Despite the EU data protection guidelines with the deterrent of up to 300,000 euros in fines and the threat of imprisonment, in many cases efforts to protect data are often superficial. This might explain why bank statements from a bank undergoing renovation work end up on the street, grade lists from A level candidates or medical data from patients can be found in the waste paper container.

New times, new storage media, new standards.

Why do I need to destroy data media?

Anyone who deals with confidential, personal or sensitive data has to ensure that the data is properly destroyed and disposed of in accordance with the German Federal Data Protection Act. This means that data media must be shredded to make it impossible or as difficult as possible to reproduce the content of the data.

Shredding according to the DIN standard

The storage media containing our confidential data and information are varied. Along with paper, the classic data

medium, digital data media now also plays a major role. The DIN 66399 standard takes this diversity into account, and defines what security means for all our modern media. The DIN 66399 supersedes DIN 32757 and describes the requirements for machines and processes for shredding data media.

The standard was developed by the Standards Committee for Information Technology and Applications (NIA). Read all about the DIN 66399 on the following pages.

1. The 3 protection classes of the DIN 66399.

The protection requirement of your data is classified into three different classes. The type of data is checked to determine the protection requirement in the company. This identifies which need for protection is required, and therefore the protection class.

The protection classes:

	Risks:
Protection class 1 Normal security requirement for internal data.	Unauthorised publication or dissemination would have a limited negative impact on the company. Protection of personal data must be ensured. There would otherwise be a risk to the position and financial situation of the affected persons.
Protection class 2 High security requirement for confidential data.	Unauthorised dissemination would have a considerable affect on the company and could infringe legal obligations or laws. The protection of personal data must fulfil strict requirements. There would otherwise be a considerable risk to the social standing and financial situation of the affected persons.
Protection class 3 Very high protection requirements for particularly confidential and secret data.	Unauthorised dissemination would have serious terminal consequences for the company and infringe trade confidentiality obligations, contracts or laws. It is essential that the confidentiality of personal data is maintained. Otherwise there is a risk to the health and safety or personal freedom of the affected persons.

2. The data media of the DIN 66399.

The standard divides all the different data media into six categories. Each category contains an explanation of the data formats.

P

Information in original size:
e.g. paper, x-ray films, print forms

O

Optical data media:
e.g. CDs, DVDs, Blu rays

T

Magnetic data media:
e.g. floppy disks, ID cards with magnetic strips

E

Electronic data media:
e.g. USB sticks, chip cards, solid state drives, flash memory from smartphones and tablet PCs, memory cards from digital cameras

F

Information in reduced form:
e.g. films, foils

H

Hard drives with magnetic data media:
e.g. hard drives with magnetic data media

3. The 7 security levels of the DIN 66399.

The DIN 66399 standard divides each data media category into seven security levels. The higher the security level, the smaller the particles.

	Security levels
Protection class 1	1
	2
	3
Protection class 2	3
	4
	5
Protection class 3	4
	5
	6
	7

Security level 1:

General documents to be rendered illegible or invalidated.

Security level 2:

Internal documents to be rendered illegible or invalidated.

Security level 3:

Data media with **sensitive** and confidential data as well as **personal** data subject to high protection requirements.

Security level 4:

Data media with **highly sensitive** and confidential data as well as personal data subject to **high** protection requirements.

Security level 5:

Data media with confidential information of **fundamental importance** for a person, company or institution.

Security level 6:

Data media with confidential documents in the case of **extraordinary security precautions**.

Security level 7:

For **strictly confidential** data with the highest security precautions.

DIN 66399 – the new standard for data protection.

1. Define your protection class ...

2. ... which leads to the security levels.

Protection class 1

Normal protection requirement for internal data.

Protection class 2

High protection requirement for confidential data.

Protection class 3

Very high protection requirements for particularly confidential and secret data.

Security levels	
Green	Security level 1 General documents to be rendered illegible or invalidated, for instance old advertising material such as catalogues, brochures.
	Security level 2 Internal documents to be rendered illegible or invalidated, for instance internal company communication, such as out-of-date instructions, travel guidelines, notices, forms.
	Security level 3 Data media with sensitive and confidential data as well as personal data subject to high protection requirements, e.g. company sales reports and tax documents as well as quotations, orders etc. with private address data.
Yellow	Security level 4 Data media with sensitive and confidential data as well as personal data subject to high protection requirements, e.g. balances and conditions as well as payslips, personal data/files, work contracts, medical reports, tax documents.
	Security level 5 Data media with confidential information of fundamental importance for a person, company or institution, e.g. patents, construction documents, strategic papers, competitor analysis, process documentation.
Orange	Security level 6 Data media with confidential documentation in the case of extraordinary security precautions, e.g. research and development documents, official areas.
	Security level 7 For strictly confidential data with the highest security precautions e.g. secret service or military sectors.

To find out exactly which security level is the right one for you, just follow the three steps at the top of this page. If you have different types of data media to be destroyed, the one requiring the highest security level is relevant for determining which cutting size you need.

3. Select the data media relevant for you.

e.g. paper, x-ray films, print forms

e.g. CDs, DVDs, Blu ray discs

e.g. floppy disks, ID cards with magnetic strips

e.g. USB sticks, chip cards, solid state drives, flash memory from smartphones and tablet PCs, memory cards from digital cameras

e.g. films, foils

e.g. hard drives with magnetic data media

	Collection volume: up to 130 litres	2-3	P-5 / T-5 / E-4 / F-2		SECURIO: AF500, B34, B35, Pure: 630, Classic: 225.2
		3	P-6 / F-3		SECURIO: AF500, B34, B35
		3	P-7 / F-3		SECURIO: B34, B35

TIP!

Using the DIN standard in practice:

1. **Determine the protection class** for the data you want to shred.
2. **Select the security level.** The protection class issued then offers you a choice of three security levels. The higher the security level you select, the smaller and therefore more secure the particles are shredded.
3. Check **what type of data media** you need to deal with. Paper, CDs, magnetic storage, electronic storage, hard drives etc.
4. **Now connect data media and security level.** You can now use this information to select the appropriate document shredder.

Scope of application	Protection class	Security level	Shredder material	Model*

Shredding different types of data media securely.

You have documents with protection class 2 which need to be shredded. You select security level 4, as this involves strictly confidential personal data. The information is on paper and on DVDs, i.e. data media in the P and O categories. You need a document shredder which can shred both media types. The right security level for paper is P-4, and for DVDs O-3. To find the right document shredder, look for the combination P-4/O-3.

HSM offers a great range of document shredders worldwide – for virtually every application area.

Do you need a compact document shredder to use at home, a main unit for a busy office, a complete waste disposal station for large quantities of documents or a shredder for your digital data storage media? In the HSM SECURIO, Pure, Classic, shredstar and

Powerline product ranges as well as hard drive shredders, you will find the right machine for your requirements. In any price category, at any security level, at any performance class and for any data storage medium.

HSM SECURIO / HSM SECURIO with autofeed:
Design and security work together.

HSM Pure:
The modern way of shredding data media.

HSM shredstar:
The right paper shredder for small amounts.

HSM Powerline hard drive shredders:
shred hard drives reliably.

Document shredders HSM SECURIO

Are you looking for quality, durability and design? Then you have found the perfect answer with the HSM SECURIO document shredders. You can expect the highest level of quality here – Made in Germany. With a three-year warranty on all HSM SECURIO models. Regardless of whether you have chosen the C-series for the home office, the B-series for the workplace, the P-series for professional use or the AF-series with automatic paper feed: you are on the safe side with shredders from HSM!

HSM SECURIO C-series:

Space-saving, efficient and secure. The C-series impresses with its appealing compact design and ease of use. Perfect for document shredding at the office or at home.

HSM SECURIO B-series:

Space-saving, reliable and versatile. The B-series impresses with its high level of performance and maximum functionality. The product range offers document shredders for the workplace or small working groups of up to eight people.

HSM SECURIO P-series:

Professionalism at the highest level. The P-series impresses with its smooth running and perfectly balanced cutting units for a consistently high cutting performance. Ideal for document shredding for large working groups for up to fifteen people.

HSM SECURIO AF-series:

Innovative, convenient and time-saving. The autofeed paper shredders of the AF-line with Nanogrip Technology combine functionality and ease of use. For the reliable and easy shredding of stacks of paper and individual sheets of paper.

Document shredders HSM SECURIO AF: Innovative, easy to use and time-saving.

Excellent environmental consideration: HSM SECURIO document shredders

Low energy consumption, durable design and the avoidance of materials that are harmful to the environment characterise HSM shredders. These were the reasons for awarding the document shredders from the HSM SECURIO series with the Blue Angel. We are particularly proud of this.

Thanks to the energy-saving management systems, HSM SECURIO document shredders are particularly efficient.

Great for users who care about the environment!

1. The document shredders HSM SECURIO C14 and C16 does not consume any power in stand-by mode.
2. Save power with the intelligent control programme EcoSmart. The HSM SECURIO C18 to B35 document shredders automatically switch to stand-by mode and are therefore always ready for operation. The energy demand is less than 0.1 Watt here.
3. Achieve up to 90 % in energy savings: The P-series HSM SECURIO document shredders have an energy-saving management system and save up to 90 % in energy in comparison to conventional stand-by switches.

Document shredders HSM SECURIO

The latest technology that excites

Very practical

The design viewing window – typical for the HSM SECURIO shredder series. You can always see how full the waste container is by looking through the window and it can therefore always be emptied in good time.

Specially hardened solid steel cutting rollers

The specially hardened cutting rollers made from solid steel are impervious to staples and paper clips and guarantee a long service life.

Multifunction element for intuitive operation

The device can be intuitively operated with the multifunction element.

Automatic reverse

The automatic reverse rectifies paper jams and ensures smooth operation.

Pressure-sensitive safety element

The device automatically switches off if pressure is applied to the safety element.

Continuous operation and low noise

Reliable operation even for continuous load. Optimum design of cutting and drive components as well as the closed gear mechanism ensure low noise.

1

2

3

Simple emptying

1 To empty the waste container, the housing top can be easily removed – a practical, recessed grip facilitates handling.

2 The waste container can be easily removed and emptied.

3 After opening the door, the removable, reusable collecting bag can be easily removed and emptied.

Integrated automatic oiler

This maintenance friendly document shredder has an integrated automatic oiler which ensures that you have a consistently high cutting capacity.

External oiler

For a consistently high cutting performance, this low maintenance document shredder has an external automatic oiler as an option.

Separate CD cutting unit (4 x 7 mm)

The separate media cutting unit with a waste container effortlessly shreds CDs / DVDs, credit and loyalty cards as well as floppy discs into small particles (4 x 7 mm). The shredded material can then be disposed of with the waste materials already sorted.

Separate OMDD cutting unit (2 x 2 mm)

The separate media cutting unit with a waste container effortlessly shreds CDs / DVDs, credit and loyalty cards as well as floppy discs into small particles (2 x 2 mm). The shredded material can then be disposed of with the waste materials already sorted.

PAPERcontrol paper thickness measurement

PAPERcontrol for measuring the paper thickness avoids annoying paper jams. An LED display signals whether the stack of papers can be destroyed in a single work process.

Metal detection

A separate metal detection feature protects the cutting unit and stops the device if metal parts, such as staples, are inserted. These can be removed and the shredding process can continue.

Parallel operation: Autofeed and manual feed of paper possible

Useful dual function: During the autofeed stack processing, it is possible to manually feed paper at the same time.

Nanogrip Technology for reliable sheet intake

The document shredders with autofeed have a specially developed intake and transport rollers which use Nanogrip Technology. This enables sheet after sheet to be pulled in securely from the stack of paper.

Time-saving and easy to use

Paper stacks of up to 500 sheets can be put into the magazine and destroyed automatically.

Lock-and-Go function (AF300 / AF500)

It is possible to secure the paper stack inserted into the magazine against unauthorized access by using the Lock-and-Go function. To this end, an individual security code is saved on a USB medium per stack processing. After starting, the shredding process can only be interrupted by the owner of the USB medium.

Document shredder HSM SECURIO C14

Space-saving, quiet and reliable: the shredder for your home office. No power use in standby, has a high degree of user safety – and all of this in a great, modern design.

- High quality materials and "Made in Germany" quality for safety and durability. With 3 years warranty.
- Cutting rollers made of hardened steel with lifetime warranty.
- Quiet operation minimises noise development in the workplace.
- Zero power consumption in standby mode.
- Blue Angel: The document shredder is awarded for its sustainability.
- Paper feed with overload protection reduces paper jams.
- The device automatically switches off if pressure is applied to the safety element.
- Practical automatic start/stop.
- Effortless emptying of the waste container via the removal housing top.

Product number	Cutting size in mm	Cutting capacity in sheets 80 g/m ²	Security level DIN 66399	Shredder material	Weight in kg

Document shredder HSM SECURIO P36

Top class, professional data destruction! This document shredder with a powerful and quiet cutting unit guarantees you data security in continuous operation for all office departments. Suitable for up to fifteen people.

- High quality materials and "Made in Germany" quality for safety and durability. With 3 years warranty.
- Cutting rollers made of hardened solid steel.
- Document shredders with particle cut have integrated automatic oilers.
- Powerful motor allows for continuous operation.
- Quiet operation minimises noise development in the workplace.
- Energy-saving management system EMCS: 90 % energy savings thanks to the sleep mode and automatic shutdown.
- Blue Angel: The document shredder is awarded for its sustainability.
- Paper feed with overload protection reduces paper jams.
- The device automatically switches off if pressure is applied to the safety element.
- Multifunction element for intuitive operation.
- Light barrier for automatic start/stop.
- Mobile on castors.
- Convenient removal and emptying of the removable reusable collecting bag.
- Button lock prevents accidental use.
- High quality wooden floor cabinet with door.
- Level indicator through inspection window.

Document shredder HSM SECURIO AF150 with automatic paper feed

The simple and convenient method of data destruction in the workplace. The document shredder with an automatic paper feed shreds stacks of paper with up to 150 sheets as well as single sheets of paper effortlessly whilst saving you time.

- High quality materials and "Made in Germany" quality for security and durability. With 3 years warranty.
- Cutting rollers made of hardened solid steel.
- Reliable and time-saving shredding of stacks of paper.
- Powerful motor allows for continuous operation.
- Nanogrip Technology for reliable sheet intake.
- Useful dual function: Manual feed of paper during the autofeed stack processing.
- Blue Angel: The document shredder is awarded for its sustainability.
- EcoSmart: Exceptionally low power consumption of 0.1 Watt in standby mode.
- Automatic return eliminates paper jams.
- Quiet operation minimises noise development in the workplace.
- Multifunction element for intuitive operation.
- Light barrier for automatic start/stop.
- Removable waste container for effortless emptying.
- Level indicator through inspection window.
- Mobile on castors.

Document shredder HSM SECURIO AF500 with automatic paper feed

The simple and convenient method of data destruction for work groups. The document shredder with an automatic paper feed and lockable stack protects inserted stacks of paper from unauthorised access and shreds stacks of paper with up to 500 sheets of paper as well as single sheets of paper easily whilst saving you time.

- High quality materials and "Made in Germany" quality for security and durability. With 3 years warranty.
- Cutting rollers made of hardened solid steel.
- Reliable and time-saving shredding of stacks of paper.
- Lock-and-Go function protects the inserted paper stack against unauthorized access.
- Powerful motor allows for continuous operation.
- Nanogrip Technology for reliable sheet intake.
- Useful dual function: Manual feed of paper during the autofeed stack processing.
- Blue Angel: The document shredder is awarded for its sustainability.
- EcoSmart: Exceptionally low power consumption of 0.1 Watt in standby mode.
- Automatic return eliminates paper jams.
- Quiet operation minimises noise development in the workplace.
- Multifunction element for intuitive operation.
- Light barrier for automatic start/stop.
- Convenient removal and emptying of the removable reusable collecting bag.
- High quality wooden floor cabinet with door.
- Level indicator through inspection window.
- Mobile on castors.

the HSM Pure document
shredders.

Document shredders HSM Pure

The innovative document shredder series HSM Pure is not only the epitome of reliability because of its proven "Made in Germany" quality and solid construction, but also convinces with its timeless modern design and easy operation. An optimal combination of traditional and modern – as a compact unit next to the desk or as a powerful document shredder for working groups and entire departments. Document shredders from the HSM Pure series are the perfect companion for data protection.

Document shredders HSM Pure

Timelessly modern and reliable

Clearly arranged operator control panel

The functional and clearly arranged operator control panel shows the operating state.

Pressure-sensitive safety element

The device automatically switches off if pressure is applied to the safety element.

Automatic reverse

The automatic reverse rectifies paper jams and ensures smooth operation.

Automatic start/stop

The device starts automatically when fed with paper and automatically stops after shredding is complete.

Specially hardened solid steel cutting rollers

The specially hardened cutting rollers made from solid steel are impervious to staples and paper clips and guarantee a long service life.

Continuous operation and low noise

Reliable operation even for continuous load. Optimum design of cutting and drive components as well as the closed gear mechanism ensure low noise.

Simple emptying

- 1 To empty the waste container, the housing top can be easily removed – a practical, recessed grip facilitates handling.
- 2 The waste container can be easily removed and emptied.
- 3 After opening the door, the removable, reusable collecting bag can be easily removed and emptied.

Document shredder HSM Pure 120

Data protection begins at the desk. The compact document shredder shreds personalised advertising, correspondence of all kinds, receipts and payment documents safely and reliably.

- High quality materials and "Made in Germany" quality for security and durability.
- Cutting rollers made of hardened steel with lifetime warranty.
- Quiet operation minimises noise development in the workplace.
- Low power consumption in standby mode.
- Paper feed with overload protection reduces paper jams.
- The device automatically switches off if pressure is applied to the safety element.
- Practical automatic start/stop.
- Effortless emptying of the waste container via the removable housing top.
- Timeless machine design in trendy white.

the HSM shredstar
document shredders.

Document shredders HSM shredstar

Data privacy concerns everyone! So shred sensitive data at the office or at home with a document shredder from the HSM shredstar series. These devices are characterised by their compact and modern design, by their high level of performance and ease of use with an unbeatable price-performance ratio.

Document shredders HSM shredstar

Compact, modern and powerful

Easy to operate

The automatic reverse rectifies paper jams and ensures smooth operation at maximum cutting capacity.

Separate CD cutting unit

The separate CD cutting unit easily shreds CDs and DVDs, credit and store cards. The shredded material is sorted into the separate CD waste container and can be disposed of separately.

Functional and clear

The LED indicator displays the operating state „Ready for operation“, container full and paper jam.

LED indicator

The LED indicator shows the operating state of the device.

Removable waste container

The waste container can be easily removed and emptied.

Inspection window

The filling level of the waste container can be seen at all times through the inspection window.

Can be moved on castors

For convenience, there are castors on the document shredder so it is easy to move around.

Document shredder HSM shredstar S5

The low cost entry level to data protection. This strip cut document shredder is the perfect device for the private sector.

- Quiet operation minimises noise development in the workplace.
- Effortless emptying of the waste container via the removal housing top.
- Practical automatic start/stop.

Product number	Cutting size in mm	Cutting capacity in sheets 80 g/m ²	Security level DIN 66399	Shredder material	Weight in kg
1041	6	5	P-2		1.7

Dimensions (WxDxH): 297 x 163 x 354 mm, colour: black/silver

Document shredder HSM shredstar S10

Data protection at a low price. This modern and compact strip cut document shredder with a separate CD cutting unit protects your data at home or in a small office.

- Separate CD cutting unit with own waste container for sorted disposal.
- Level indicator through inspection window in the waste container.
- The LED indicator shows the operating state of the device.
- Effortless emptying of the waste container via the removal housing top.
- Light barrier for automatic start/stop.

Document shredders HSM Classic

Due to the „Made in Germany“ quality and the solid design, the classics from HSM are the epitome of reliability. Whether as a compact device next to the desk or as a powerful document shredder in the department – each „Classic“ incorporates typical HSM technology for precise strip or particle cuts: durable cutting rollers made from hardened solid steel, an automatic return to prevent paper jams and a power-saving standby mode.

Document shredders HSM Classic

Solid and proven technology

Specially hardened solid steel cutting rollers

The specially hardened cutting rollers made from solid steel are impervious to staples and paper clips and guarantee a long service life.

Automatic reverse

The automatic reverse rectifies paper jams and ensures smooth operation.

Continuous operation and low noise

Reliable operation even for continuous operation. Optimum design of cutting and drive components as well as the closed gear mechanism ensure low noise.

Light barrier for automatic start/stop control

An integrated light barrier starts the device automatically and switches it off again after the paper feed ends.

Inspection window

The filling level of the waste container can be seen at all times through the inspection window.

Effortless emptying

The waste container can be easily removed and emptied.

Document shredder HSM Classic 125.2

The powerful document shredder on castors for reliable data destruction in the office. Thanks to the powerful drive, it easily shreds the paper amounts from up to five people in continuous operation.

- High quality materials and "Made in Germany" quality for security and durability.
- Cutting rollers made of hardened solid steel with lifetime warranty.
- Powerful motor allows for continuous operation.
- Safety element prevents unintentional entry.
- Light barrier for automatic start/stop.
- Convenient removal and emptying of the removable reusable collecting bag.
- High quality wooden floor cabinet with door.
- Mobile on castors.

Dimensions (WxDxH): 448 x 347 x 828 mm, colour: light grey

Document shredder HSM Classic 225.2

Solid and reliable document shredder with powerful 1400-Watt motor and high cutting performance for use in the open-plan office. Recommended for use by about five to eight people.

- High quality materials and "Made in Germany" quality for security and durability.
- Cutting rollers made of hardened solid steel with lifetime warranty.
- Powerful motor allows for continuous operation.
- Automatic return eliminates paper jams.
- Safety element prevents unintentional entry.
- Light barrier for automatic start/stop.
- Convenient removal and emptying of the removable reusable collecting bag.
- High quality wooden floor cabinet with door.
- Mobile on castors.

Dimensions (WxDxH): 500 x 470 x 895 mm, colour: light grey

Document shredder HSM Classic 390.3

The powerful document shredder with particle cut and 148 litres of collection volume. Recommended for the open-plan office for five to eight people.

- High quality materials and "Made in Germany" quality for security and durability.
- Cutting rollers made of hardened solid steel with lifetime warranty.
- Powerful motor allows for continuous operation.
- Automatic return eliminates paper jams.
- Safety element prevents unintentional entry.
- Light barrier for automatic start/stop.
- Convenient removal and emptying of the removable reusable collecting bag.
- High quality wooden floor cabinet with door.
- Mobile on castors.

Product number	Cutting size in mm	Cutting capacity in sheets 80 g/m ²	Security level DIN 66399	Shredder material	Weight in kg

Dimensions (WxDxH): 595 x 510 x 915 mm, colour: light grey

Document shredder HSM Classic 411.2

The most powerful document shredder with particle cut reliably provides for data security in office departments. Recommended for eight to fifteen people.

- High quality materials and "Made in Germany" quality for security and durability.
- Cutting rollers made of hardened solid steel with lifetime warranty.
- Powerful motor allows for continuous operation.
- Automatic return eliminates paper jams.
- Safety element prevents unintentional entry.
- Light barrier for automatic start/stop.
- Convenient removal and emptying of the removable reusable collecting bag.
- High quality wooden floor cabinet with door.
- Mobile on castors.

Dimensions (WxDxH): 595 x 470 x 990 mm, colour: light grey

Data shredder HSM Classic 411.2 OMDD

This data carrier shredder is specifically designed for the shredding of CDs / DVDs, credit cards or floppy discs with the highest security requirements and shreds the data carriers of large departments with about fifteen people.

- High quality materials and "Made in Germany" quality for security and durability.
- Powerful motor allows for continuous operation.
- Automatic return eliminates material jams.
- Safety element prevents unintentional entry and serves as a splinter shield.
- Light barrier for automatic start/stop.
- Convenient removal and emptying of the removable reusable collecting bag.
- High quality wooden floor cabinet with door.
- Mobile on castors.

Document shredders HSM Powerline

Data privacy in a big way – the HSM Powerline: The robust technology of the 400 V devices is specially designed for a large throughput and long total operating time. As a top model, the HSM Powerline FA 500.3 processes bound documents and folders with up to 550 sheets per cycle. The powerful large devices are perfect for large archives or as a central station for document shredding.

Document shredders HSM Powerline

Sturdy systems for demanding users

Specially hardened solid steel cutting rollers

Its induction-hardened solid steel cutting rollers are low on wear, resistant and guarantee long service life.

Automatic reverse

The automatic reverse rectifies paper jams and ensures smooth operation.

Operating safety with emergency stop rail

High user safety is guaranteed by the safety circuit on the loading table which stops the machine if it is touched.

Low space requirement and narrow transport width

Thanks to the integrated rollers and compact size, the machine can be easily set up at the installation site and saves space.

Removable trolley

The device has a removable trolley (easy to get out of the machine) and the collecting bag itself can be re-used.

Extension of the loading table

For more space to store materials there is an extension to the loading table.

Discharge conveyor belt

The discharge conveyor belt makes the collection of the shredded material easy and convenient. Any standard container can be used to collect the material at the end of the conveyor belt.

Conveyor belt document shredder HSM Powerline FA 400.2

Thanks to its large throughput, this sturdy and durable document shredder is perfect for use in archives or central stations for document shredding.

- High quality materials and "Made in Germany" quality for safety and durability.
- Cutting rollers made of hardened solid steel.
- Convenient material feeding via conveyor belt.
- Powerful motor allows for continuous operation.
- An automatic return eliminates paper jams.
- Effortless emptying via a removable trolley with a reusable collecting bag.
- User safety through emergency off switch.
- Functional operator control panel with LED indicator.
- Extension of the loading table by 600 mm; used for material storage (left or right).
- Mobile on castors.

Conveyor belt document shredder HSM Powerline FA 500.3

The top model of the large document shredder series HSM Powerline. This powerhouse is perfect for the shredding of large quantities in archives or central document shredding stations.

- High quality materials and "Made in Germany" quality for safety and durability.
- Cutting rollers made of hardened solid steel.
- Convenient material feeding via conveyor belt.
- Powerful motor allows for continuous operation.
- An automatic return eliminates paper jams.
- User safety through emergency off rail.
- Automatic oiler provides for consistently high cutting capacity.
- Multifunction element for intuitive operation.
- Mobile on castors.

For shredding large quantities independently!

The shredder baler combinations
of the HSM SP series in operation.

Shredder baler combinations HSM

The shredder baler combinations are complete, compact waste disposal stations. They provide data security up to security level P-5 and compress the shredded material into bales, which can be easily transported and recycled. The HSM shredder baler combinations are built for shredding large quantities.

Shredder baler combinations HSM

Sturdy systems for demanding users

Specially hardened solid steel cutting rollers

Its induction-hardened solid steel cutting rollers are low on wear, resistant and guarantee long service life.

Energy-efficient IE 2 motor

The powerful motors with chain drive are low on wear, resistant and guarantee long service life. They guarantee reliable operation with maximum throughput – even during continuous operation.

Operating safety with emergency stop rail

High user safety is guaranteed by the safety circuit on the loading table which stops the machine if it is touched.

User safety through emergency off switch

It may be necessary to stop the machine immediately so we have equipped the device with an emergency off switch.

Bale weight can be manually set

The bale weight is variable and depends on your requirement.

Bale removal trolley

The removal trolley allows for the easy removal and disposal of the compact bales.

Simple commissioning

The combination can be commissioned very easily using Plug-and-Play. The conveyor belt-shredder can therefore be combined with a baling press at any time.

Light barrier for automatic start

During the shredding process, an integrated light barrier starts the compression process automatically. It is therefore possible to feed the machine continuously without interruption.

Shredder baler combination HSM SP 4040 V

This compact combination of the conveyor belt document shredder FA 400.2 and a vertical baling press is designed for professional document shredding in large quantities, which are then compressed into bales of up to 35 kg.

- High quality materials and "Made in Germany" quality for safety and durability.
- Cutting rollers made of hardened solid steel.
- Convenient material feeding via non-slip conveyor belt.
- Continuous operation is possible thanks to the powerful motor with a chain drive.
- Automatic return eliminates paper jams.
- Simple commissioning of the combination using Plug-and-Play.
- Light barrier for automatic start of the compression process.
- Shredder material is compressed into compact bales and can optionally be cleanly disposed of in a box or waste bag.
- Practical removal trolley for the easy removal of bales.
- Manual oiler for consistently high cutting capacity.
- User safety through emergency off switch.
- Functional operator control panel with LED indicator.
- Mobile on castors.

Shredder baler combination HSM SP 5088

With this waste disposal station, HSM combines the large document shredder FA 500.3 with a channel baling press. It is therefore particularly perfect for use in archives or central stations for document shredding, even in large quantities, which are then compressed into bales of up to 90 kg as needed.

- High quality materials and "Made in Germany" quality for safety and durability.
- Cutting rollers made of hardened solid steel.
- Convenient material feeding via non-slip conveyor belt.
- Continuous operation is possible thanks to the powerful motor with a chain drive.
- Automatic return eliminates paper jams.
- Simple commissioning of the combination using Plug-and-Play.
- Light barrier for automatic start of the compression process.
- Shredder material is compressed into compact bales, manually strapped three-fold and can also be disposed of cleanly in a waste bag.
- The bale length is variable depending on the requirement.
- Automatic oiler provides for consistently high cutting capacity.
- User safety through emergency off rail.
- Multifunction element for intuitive operation.
- Mobile on castors.

Powerful and reliable!

Shredding electronic data media
with the hard drive shredder
HSM Powerline HDS 230.

Hard drive shredders HSM Powerline

Exercise caution when disposing of digital storage media: Countless confidential information is stored on our computers, USB sticks, magnetic tapes, CDs, DVDs and Blu-ray discs, credit cards and loyalty cards as well as disks. But what happens to these storage devices when they are no longer required? The solution is: mechanical destruction! The HSM Powerline hard drive shredders shred digital and magnetic media into tiny particles, making recovery practically impossible. Safe and efficient to use, data protection compliant.

Specially hardened solid steel cutting rollers

Its induction-hardened solid steel cutting rollers are low on wear, resistant and guarantee long service life.

Discharge conveyor belt

The shredded material is carried out by a conveyor belt and can be collected in any standard container.

Energy-efficient IE 2 motors

The powerful motors with chain drive are low on wear, resistant and guarantee long service life. They guarantee reliable operation with maximum throughput – even during continuous operation.

Low maintenance and service-friendly

The sophisticated design allows repairs and maintenance to be made easily.

1.5 kW

230 V /
50 Hz

Hard drive shredder HSM Powerline HDS 150

The hard drive shredder HSM Powerline HDS 150 destroys digital media devices in a safe and economical way – and is data protection compliant as well.

- High quality materials and "Made in Germany" quality for safety and durability.
- Cutting rollers made of hardened solid steel.
- Hard drive shredder with 230 V power supply in a compact and modern design.
- Very suitable for the decentralised destruction of a smaller quantity of data media.
- Powerful, energy-saving power unit enables long operation at a low noise level.
- Low maintenance due to closed direct drive unit.
- An automatic return eliminates material jams.
- Data media can be processed at a convenient working height.
- Different function modes for the various type of material and maximum throughput.
- Removable waste container for effortless emptying.
- Multifunction element for intuitive operation.
- Mobile on castors.

Cardboard perforators HSM ProfiPack

From waste to packaging material. The cardboard perforator is a brilliant solution for all shipping and storage areas. It perforates used cardboard or bolsters it up and makes universally usable packaging material which is as good as new. This saves costs and, at the same time, is a sensible and practical contribution to environmental protection.

From waste to packaging material

Disused cardboard is made into high-quality packaging material.

Packaging material in a single operation

Trimming and padding in a single operation.

Specially hardened solid steel cutting rollers

Specially hardened HSM cutting rollers ensure absolutely precise cutting.

High-quality packaging material

Perforation and padding in exactly measured spaces.

1.2 kW

415 mm

230 V /

Cardboard perforator HSM ProfiPack 425

This powerful device perforates several layers of used cardboard into packaging material. The clever solution for all shipping and storage areas.

- High quality materials and "Made in Germany" quality for security and durability.
- Cutting rollers made of hardened solid steel.
- Powerful three-phase motor allows for continuous operation.
- Easy to operate via rotary switch for On/Off and return.
- Printed dimensioning of the cutting width in mm.
- Mobile on castors.

Cardboard perforator HSM ProfiPack 425, incl. adapter set for vacuum cleaner

This powerful device perforates several layers of used cardboard into packaging material. The clever solution for all shipping and storage areas.

- High quality materials and "Made in Germany" quality for security and durability.
- Cutting rollers made of hardened solid steel.
- Powerful three-phase motor allows for continuous operation.
- Easy to operate via rotary switch for On/Off and return.
- Printed dimensioning of the cutting width in mm.
- Mobile on castors.
- Connection for dust extraction unit.
- The wet/dry vacuum cleaner provides for a dust-free working environment.

Cutting-edge precision quality

With the HSM Cutline G- and T-series of cutting machines.

Cutting machines HSM Cutline

The HSM cutting machine range has the product that fits your requirements perfectly. The product range offers machines for the home office and also includes professional machines for batch processing and DIN formats. High level of user safety due to patented designs and precise cutting are impressive benefits of proven HSM quality.

Cutting machines HSM Cutline G-/T-series

Cutting-edge precision quality

Fold-down protective guard

The fold-down protective guard ensures safe operation whilst also saving space when stored away.

Hardened, ground cutting blade with counter blade

The hardened, ground cutting blade with counter blade ensures you achieve a precise cut.

Automatic contact pressure

The automatic contact pressure ensures that the paper does not move during cutting.

Ergonomically shaped handle

The ergonomically shaped handle lies comfortably in your hand and ensures an optimal cutting effect.

Rear limit stop

The lockable rear limit stop allows for the precise positioning of the cutting material to ensure you get perfect cutting results.

Recessed handle for easy lifting

The cutting machine can be easily lifted and moved by using the recessed handles on the sides.

Collection tray for paper remains

Paper remains fall into the practical collection tray and can be removed easily.

Metal base plate with dimensioning

The cutting machine has a sturdy metal base plate with sizing in cm and inches as well as angle and special format scaling.

Ergonomic cutting head

The ergonomically shaped and smoothly running cutting head ensures optimal handling and ease of use.

Device for practical wall mounting

The rotary trimmer can be conveniently mounted on a wall.

Rotary trimmer HSM Cutline T3310

Compact and handy roll cutting machine for formats up to DIN A3 landscape. Cuts up to 10 sheets of paper at once.

- Automatic contact pressure of the shredder material when cutting.
- Optimal handling through smooth-running, ergonomically shaped cutting head.
- Self-sharpening round blade for permanently precise results.
- Practical collection tray for paper remains.
- Enclosed side stop allows for precise positioning of the cutting material.
- Recessed handle for easy lifting of the cutting machine.
- Sturdy metal base plate with cm/inch as well as angle and special format scaling.
- Device for practical wall mounting.
- Spare cutting head available.
- Non-slip stand of the cutting machine.

Product number	Max. paper format	Cutting length in mm	Cutting height in mm	Cutting capacity in sheets 80 g/m ²	Weight in kg
1000901	DIN A3 landscape	330	1,0	up to 10	1.5
Dimensions (WxDxH): 530 x 233 x 95 mm, table: 160 x 330 mm (WxL), colour: white/red/grey					

Options:	Product number
Spare cutting head for model T3310	1000905

Rotary trimmer HSM Cutline T4610

Sturdy and handy roll cutting machine for formats up to DIN A2 landscape. Cuts up to 10 sheets of paper at once.

- Automatic contact pressure of the shredder material when cutting.
- Optimal handling through smooth-running, ergonomically shaped cutting head.
- Self-sharpening round blade for permanently precise results.
- Practical collection tray for paper remains.
- Enclosed side stop allows for precise positioning of the cutting material.
- Recessed handle for easy lifting of the cutting machine.
- Sturdy metal base plate with cm/inch as well as angle and special format scaling.
- Device for practical wall mounting.
- Spare cutting head available.
- Non-slip stand of the cutting machine.

Product number	Max. paper format	Cutting length in mm	Cutting height in mm	Cutting capacity in sheets 80 g/m ²	Weight in kg
1000902	DIN A2 landscape	460	1,0	up to 10	1.8
Dimensions (WxDxH): 660 x 233 x 95 mm, table: 160 x 457 mm (WxL), colour: white/red/grey

Spare cutting head for model T4610	1000905

Guillotine HSM Cutline G3210

Compact and easy to use lever cutting machine. Cuts paper up to the format DIN A3 landscape, perfect for the private sector.

- The fold-down protective guard provides safe operation and space-saving storage.
- High quality cutting blade with counter blade – for a precise cut and cutting capacity.
- Manual contact pressure of the shredder material when cutting.
- Ergonomically shaped handle for optimal handling.
- Practical collection tray for paper remains.
- Enclosed side stop allows for precise positioning of the cutting material.
- Recessed handle for easy lifting of the cutting machine.
- Sturdy metal base plate with cm/inch as well as angle and special format scaling.
- Non-slip stand of the cutting machine.

Product number	Max. paper format	Cutting length in mm	Cutting height in mm	Cutting capacity in sheets 80 g/m ²	Weight in kg
1000911	DIN A3 landscape	325	1,0	up to 10	2.1
Dimensions (WxDxH): 605 x 210 x 265 mm, table: 155 x 320 mm (WxL), colour: white/red/grey					

Guillotine HSM Cutline G3225

Compact, versatile and easy to use lever cutting machine. Cuts paper and thin cardboard up to the format DIN A3 landscape.

- The fold-down protective guard provides safe operation and space-saving storage.
- Hardened, ground cutting blade with counter blade – for a precise cut and cutting capacity.
- Automatic contact pressure of the shredder material when cutting.
- Ergonomically shaped handle for optimal handling.
- Practical collection tray for paper remains.
- Enclosed side stop allows for precise positioning of the cutting material.
- Lockable rear limit stop for the precise positioning of the cutting material.
- Recessed handle for easy lifting of the cutting machine.
- Sturdy metal base plate with cm/inch as well as angle and special format scaling.
- Non-slip stand of the cutting machine.

Product number	Max. paper format	Cutting length in mm	Cutting height in mm	Cutting capacity in sheets 80 g/m ²	Weight in kg
1000913	DIN A3 landscape	325	2,5	up to 25	3.7

www.hsm.eu – a website with so many interesting options for you.

Visit the HSM Internet portal for information on the company and the products. HSM offers you even more through the partner login: interactive tools for creating your own data sheets and product brochures, a media database for obtaining all image data, the eXtraWeb to retrieve any information you choose

and an innovative, user-friendly product finder. Just register at www.hsm.eu and you will be amazed at how many tools are available and how easy they are to use.

The online tools in detail

Web2Print Wizard:

Here you can find ready-made brochures for instance for the HSM SECURIO, HSM Classic, HSM shredstar and cardboard perforators.

With a few mouse clicks, you combine all the products you want to promote and add the price and your logo. In just a few minutes your promotional brochure is ready to print.

Product finder:

Choose a site or security level, material to be shredded, the number of sheets or the price – and the right choice of document shredder will appear for you.

Data sheet generator:

On each product page, you can compile a comprehensive data sheet for the device you select.

Media database:

By accessing eXtraWeb, you can also access the HSM picture archive with all the current image data and product videos in any size and in any standard file format.

eXtraWeb:

Your personal access data also allows you to receive all the latest information on the products, the company and any marketing activities.

Notes on the technical details

Document shredders and cutting machines:

Cutting type:	The material is shredded into either strips or particles.
Cutting size:	Dimension of the strips or particles of the shredded material (depending on the paper quality).
Cutting capacity:	The maximum number of sheets (DIN A4, 80 g/m ²), fed lengthways, which can be cut in one cycle. The performance data is determined when the motor is cold and the cutting device is freshly oiled. A weaker mains voltage or a different mains frequency to the one specified could result in less sheet capacity and increased noise during operation. The sheet capacity can vary depending on the structure and properties of the paper and on the way it enters. The performance data is calculated in 80 g/m ² .
Security levels 66399:	According to DIN 66399 1-3
OMDD:	The OMDD (Optical Media Destruction Device) cutting unit shreds CDs and DVDs and is recommended for shredding confidential information by the Federal Office for Information Security.
Intake/working width:	Maximum effective width of the feed opening.
Motor:	Power consumption of the document shredder at maximum cutting capacity (see above)/Rated power of document shredder drive motor.
Voltage/frequency:	AC mains supply.
Dimensions:	External dimensions of the machine when set up for operation.
Weight:	Net weight of the machine without packaging.
Container/collection volume:	Volume of waste container or collection capacity for cut material before the machine switches off.
Table size:	External dimensions of the cutting table for cutting machines.

Shredder baler combinations:

Pressing power:	Piston cylinder surface multiplied by the maximum hydraulic pressure (theoretical value).
Motor:	Rated power of document shredder and baling press drive motors.
Max. bale size:	The length of the bales varies depending on the expansion force of the compressed material.
Dimensions:	External dimensions of the machine when set up for operation.
Weight:	Net weight without packaging, loaded material, feeding system or options.

Cardboard perforators:

Effective width:	The maximum effective width of the feed opening.
Infeed height:	Height of the intake opening.
Cutting capacity:	The number of layers of cardboard which can be cut in one cycle.
Cutting speed:	This is calculated on the basis of the external diameter and speed of the cutting rollers in idle operation.
Motor:	Power consumption of the cardboard perforator at maximum cutting performance / rated power of the cardboard perforator drive motor.
Voltage/frequency:	Three-phase/alternating current power supply.
Dimensions:	External dimensions of the machine when set up for operation.
Weight:	Net weight of the machine without packaging and options.

Hard drive shredders HDS:

Cutting capacity:	The number of hard drives that can be shredded in one hour.
Cutting size:	The dimensions of the particles that resulted from shredding the material.
Motor:	Rated power of hard drive shredder drive motor.
Voltage/frequency:	Three-phase/alternating current power supply.
Size:	The external dimensions of the machine when set up for operation.
Weight:	The net weight of the machine, without packaging and options.

HSM – the company

Cutting. Shredding. Compressing.

Since 1971, HSM has been pursuing a clear strategy – a consistent commitment to quality “Made in Germany”. This product and service quality is the key to success in both the office technology and environmental technology business sectors. As a specialist for products and services for data protection as well as technologies for optimising logistics and recycling processes, HSM is one of the world’s leading providers.
