Topstore - TC Semi-Open Fronted Containers

A simple and effective small parts storage system for a wide range of materials. Space saving, manufactured from polypropylene, can be stacked or for increased flexibility, used with Topstore Louvred Panels, Cabinets and Shelving.

A comprehensive range, available in 7 sizes and 6 colours as standard. Containers can be manufactured in own brand and colours for high volume users.

Features:

- Injection moulded with anti-static additive and non-fade ultra violet stabiliser
- Strong, heavy duty with reinforced base, sides and stacking rim
- Durable, resistant to most industrial solvents and can withstand high temperatures
- Hygienic, clean, smooth inside faces guard against build up of grease etc
- Non-toxic, suitable for use with foodstuffs
- Index card slot for instant product identification

TC Containers in Sizes TC1-7

Stackable Containers

Bin Front for TC 7

Clear plastic bin front enables full utilisation of the bin whilst protecting the contents from dust etc. Easily opens/closes when bins are stacked.

Topstore - Black Conductive Storage Containers
For the safe storage of static sensitive components.

Black Conductive Containers in Sizes TC1-6

Topstore - NXT-GEN Semi-Open Fronted Stack & Nest Containers

The all new next generation storage containers are designed to help you make the most of the space in your business.

Manufactured from polypropylene, the NXT-GEN container combines the quality that you have come to expect with tomorrow's cutting edge technology. Its revolutionary new design enables the bin to stack and nest, with the facility to be mounted onto louvred panels and to hold dividers to make the best possible use of the space available. NXT-GEN containers are also designed to be used with our cabinets and shelving systems to make this one of the most flexible bins available.

Available in 7 sizes and 3 colours as standard. Containers can be manufactured in own brand and colours for high volume users.

Features:

- Dividers available to run front to back or left to right dependent on bin size
- When not in use, the bins will nest reducing the amount of storage space required
- Resistant to most chemicals, including oil and acids as well as withstanding high temperatures
- Non-toxic polypropylene is suitable for use with many foodstuffs
- Increased clear access facilities for easy selection
- Ergonomic design generates greater durability and strength
- Lifting handle on larger bins
- Index card slot for instant product identification
- Injection moulded with anti-static additive and non-fade ultra violet stabiliser

Excludes wall fixings

Louvre Value Configuration

- To calculate approximately the amount of NXT-GEN or TC Containers or accessories that can be accommodated on a Topstore Louvred Panel, or part thereof, take the LV (Louvre Value) of the container or accessory and divide it in to the NL (Number of Louvres) per panel. To determine the number/size of Louvred Panels required to locate specific quantities of containers, simply reverse the above process.
- To calculate the exact configuration, see diagram below.

TC Containers are suitable for both the metric blue and imperial grey louvred panels, however the NXT-GEN Containers are better suited to the metric blue louvred panels.

| IMPERIAL LOUVRED PANELS | | | |
|-------------------------|------------------------------|--------------------|--------|
| Panel Ref: | Total (NL) No. of Louvres | No. of Louvres in: | |
| | | Width | Height |

Topstore - Louvred Panel Spacemasters

Single or double sided freestanding storage units available in 3 heights for increased storage capacity when using both NXT-GEN and TC Topstore containers and accessories.

Units are finished epoxy powder coated blue with silver/grey base.

For larger applications order one "starter" and the appropriate number of "addas" to make this a complete solution to suit individual requirements.

Heavy duty adjusters permit levelling on uneven surfaces.

Excludes wall fixings

Topstore - Shelf Bins

Available in 17 sizes, these tough, blue polypropylene bins offer a practical alternative solution to cardboard or steel (other colours are available - please contact our sales department for details).

Shelf bins are impervious to most oils, greases and chemicals and make the best use of available shelf space - particularly when used with shelving systems.

The bin design includes a semi-open front, a facility for transparent dividers and a bin stop. For identification, durable plastic label holders (complete with labels) are available.

When not in use the bins will nest, reducing the amount of storage space required.

Bin Stop

Topdrawer - Small Parts Cabinets and Trolley

A selection of free-standing units and trolley ideal for most environments, that can be floor mounted for added security (floor fixings not included). The range provides medium to high volume storage for small parts. All cabinets are pre-galvanised and powder coated in grey.

The drawers are manufactured from ABS/Styrene and include both inner dividers for greater flexibility and I.D labels. They are fitted with clear front windows for easier visibility of stored items. Drawers are also oil corrosion resistant and have high impact strength. All of the drawers can be completely removed.

Additional dividers and index labels can be ordered separately.

Topdrawer - Trolley c/w 30 Drawers

The fixed chrome handle and 100mm Ø swivel castors (2 are braked) provide easy transportation of stored goods. The galvanised shelves prevent damage from acid, oxidation and abrasion and can hold up to 50 kg per level.

The trolley drawers are designed with an anti-drop device when drawer has been fully pulled out.

- Rubber castors 2 braked and 2 swivel - 100mm
- 7 divider locations in each drawer

Topstore - Clearbox

The ideal dust-free storage and display system for the warehouse, workshop, retail and trade. Each unit contains a number of removable transparent inner compartments suitable for a wide range of items with a beige outer body.

To provide the ultimate in flexibility of application, Clearbox can be fixed directly to the wall, fitted to freestanding metal racks (single or double sided) or which can be converted to provide a mobile unit.

Whatever the format, Clearbox provides the answer.

- Flexible – suitable for a variety of uses and applications
- Non-toxic – suitable for use with food stuffs
- Strong – outer body manufactured from high-impact polystyrene plastic and inner compartments from ABS plastic
- Order picking – tilting transparent compartments allow easy retrieval of items with maximum display potential
- A retaining bar is available (for all Clearbox sizes) to secure individual compartments in place and prevent accidental displacement when in transit. Finished zinc plated.

All units have a common width of 600mm and are available in 6 sizes, each providing a different number of compartments suitable for a range of small components.

Topstore - Visibins

Visibins represent a new concept in flexible modular storage and display of small parts, manufactured in blue polypropylene. Visibin Containers are available with or without a hinged clip-shut clear styrene lids. They provide a lightweight method of displaying and storing a variety of small parts in a dust-free environment.

To complete the range, the VB6 is a one litre segmented container with 12 compartments available to take care of those very small items. Visibins are designed to lock onto their own zinc-plated wire mesh grid system creating a strong, lightweight unit with maximum product visibility.

Topstore - Clearbox Flex-bins

Clearbox "Flex-Bins" like the original Clearbox bins tilt open at an angle, but are manufactured as one single long drawer, which with the aid of "click-in" dividers can be partitioned into various sized smaller compartments.

Each unit is supplied complete with 6 adjustable dividers to give a maximum of 7 separate storage locations, and another option with a maximum of 3 storage locations. This gives the user full control over the size and number of locations, allowing full flexibility for endless visible storage applications.

- A retaining bar is available for both options, to secure the single compartments in place and prevent accidental displacement when in transit. Finished zinc plated.

| Description | H x W x D (mm) | Order Ref | Price (Each) |
|--------------------------------------|-----------------|-----------|--------------|
| FLEX-BIN No. 3 (inc. 2 Dividers) | 150 x 302 x 140 | 051399 | £16.00 |
| Retaining Bar for FLEX-BIN No.3 Only | - | 051091 | £0.85 |
| FLEX-BIN No. 7 (inc. 6 Dividers) | 150 x 601 x 140 | 051400 | £20.95 |
| Retaining Bar for FLEX-BIN No.7 Only | - | 051090 | £1.90 |

Topstore - Container Trolleys

A strong yet lightweight trolley designed to carry either NXT GEN, TC Topstore containers, mesh baskets or spigots and the container trolley is fitted with a top shelf.

Attractively finished in epoxy powder coated silver/grey frame, would ideally be suited for any stores, office, workshop or warehouse.

Wheels are all 100mm diameter swivel vulcanised blue rubber, offering low rolling resistance, meaning they are easy to manoeuvre, are non marking and soft yet highly durable.

- Trolley Height: 1300mm
- Trolley Depth: 500mm
- Trolley Width: 500mm
- Max Trolley Capacity: 200kg

See page 5 for Topstore TC Container capacities

Fitted complete with a welded TP2 louvered panel. See pages 8 and 9 for full details.

Topstore - Container Trolleys

An extended range of Container Trolleys fitted with a smaller louvred panel and 3 x fixed lipped trays to prevent stored items from slipping off. The trolley can either be supplied as complete kits with TC bins included or empty to suit individual requirements. (Please contact our Sales Department for further details).

Wheels are all 100mm diameter swivel vulcanised blue rubber, offering low rolling resistance, meaning they are easy to manoeuvre, are non marking and soft yet highly durable.

Easy Construction

Simply sketch out your design and work out the quantities of square tube/joints required. Cut the tube using the Cutting Jig to obtain a perfect fit, knock together using the appropriate joints.

Step 1 - Sketch your requirements

Step 2 - Cut to suit

Step 3 - Fix into position

Step 4 - Finished product

Topshelf - Wall Mounted Shelving

Topshelf is an attractive and durable wall mounted steel shelving system that is fully adjustable in height to suit almost every need. Supplied epoxy powder coated in white, Topshelf gives a fresh look to any environment.

Topshelf is a must for any workshop, factory or office. Each shelf is 1 metre wide and is supplied in a range of depths for many applications.

- Extension kits add on to starter kits using the existing upright and bracket.
- Shelf capacity - 50kg (UDL).
- Upright slot pitch - 30mm

Modular Plastic Shelving Units

Modular Plastic Shelving unit is a low-cost shelving system suitable for the storage of light duty items, which can be used to satisfy storage requirements in almost any environment.

Features

- Manufactured from black polypropylene.
- Each unit consists 3, 4, or 5 shelves.
- Shelf capacity 30 or 90 kg (UDL).
- Connection between shelves through the lateral joints provided.
- Can be fixed to the wall (wall fixing brackets supplied), excludes wall fixings.
- Quick and easy to assemble.

Toprax - Bolt Free Adjustable Shelving

Toprax is a high quality, fully adjustable bolt-free shelving system, requiring no special fixings. It combines the strength necessary to meet the specifications for commercial and industrial storage applications, whilst the unpierced face of the uprights and beams provide the style and elegance required for the office environment.

Clean, fully tooled components ensure the complete absence of sharp edges to safeguard you and your goods from damage.

The unique design of Toprax allows clear, unlimited entry, as there are no cross braces or gussets to restrict the loading of shelves or the selection of products.

The system can incorporate Topstore bins and is capable of being fitted with accessories to make the system suitable for garment hanging. The bays can be clad on the sides and rear with mesh or steel panels to make this one of the most flexible systems available.

A wide choice of frames and shelves are available. Shelves are fully adjustable on 50mm (2") centres and bays can be extended as required to cater for fluctuating stock and change in products.

For added convenience and faster installation, all units are supplied with full instructions for self-assembly.

Uprights are finished epoxy powder coated blue (as standard), beams and ties are epoxy powder coated silver/grey and shelves are galvanised as standard (other colours are available upon request, refer to choice on page 47).

Standard Single Bay

Toprax - Bolt Free Adjustable Shelving

Flexibility

The flexibility, strength and stability of Toprax enables the system to be fitted with a range of accessories for varying storage requirements.

Garment Hanging

Using standard frame ties with specially designed brackets, and two diameters of hanging rail for differing sizes of hangers. It is an ideal way for the storage of clothing and other garments.

The system is totally flexible and can be fully adjusted to accommodate additional levels for fluctuating storage requirements.

Cable Reel Dispensing

Using the same principle as Garment Hanging, the Toprax Cable Reel System is an extremely effective way of storing cable reels and offers quick dispensing with minimum of effort. Replacing empty cable reels is quick and easy as the cable reel support can simply be lifted from the bracket enabling quick changeover.

The special design of the hanging rail bracket allows full adjustment when unloaded. When loaded, the support bar can be firmly secured in place preventing unnecessary movement.

The system is totally flexible and can be fully adjusted to accommodate additional levels for fluctuating storage requirements.

Cladding

Toprax also offers the option for rear and side cladding. Available in either a 50 x 50mm mesh grid or galvanised steel sheet, for effective segregation of bays.

Garment Hanging

Standard Single Bay + Extension Bay

Double Bay

Cable Reel Dispensing

Cladding - Mesh Sides / Steel Rear

Upright Colour Options

This option will only be considered on higher volume orders. Please check with the Sales Department.

Design and Planning Service

We offer a free design and planning service to assist you with every phase of your storage requirements. Installation teams are available for the larger, more complex schemes to ensure that your new storage equipment is in operation as quickly as possible with the minimum of disruption to your day to day activities.

Toprax - Container Kits

Space Bin Container Kits

An ideal storage solution for storage of larger products or multiple storage of bulk items. Large open fronted bins allows easy access for stored products.

Containers are both stackable and nestable when not in use.

Please refer to page 30 for full details on bin sizes/capacities.

- Available with 2 shelf levels
- Shelf size W970 x D440mm

022510SI/SB

| Description | Overall Size H x W x D (mm) | Order Ref | Price |
|---|--------------------------------|-------------|---------|

| Double Initial Bay c/w 16 Space Bin Containers | 1500 x 1042 x 925 | 022510DI/SB | £435.00 |
| Double Extension Bay c/w 16 Space Bin Containers | 1500 x 1010 x 925 | 022510DE/SB | £340.00 |

Max load capacity: 260kg (UDL) per shelf level

Floor fixing is required where shelving bays exceed a height to depth ratio of 4:1

Multi-Functional Container Kits

An alternative storage system which uses containers complete with lids, keeping stored items dust free. Ideal in schools, offices, workshops, garages etc. Different kit options are available using containers with single coloured hinged lids and options with mixed coloured lids in blue, red, green and yellow (supplied in equal quantities). The mixed colour lid option is ideal for product segregation.

These containers are both stackable with or without lids and nestable when not in use.

Please refer to page 31 for full details on bin sizes/capacities.

- Available with 2 shelf levels
- Shelf size W870 x D440mm

Max load capacity: 260kg (UDL) per shelf level

Floor fixing is required where shelving bays exceed a height to depth ratio of 4:1

Toprax - Garment Hanging

An ideal way for the storage of clothing and other garments. Two options (as shown below) are available, the first option is using standard frame ties with specially designed brackets and 2 hanging rails (32mm diameter), the second option simply uses the frame beams. Compatible with different sized hangers.

The system is totally flexible and can be fully adjusted to accommodate different levels for fluctuating storage requirements.

Max load capacity: For hanging rail (Option 1) - 60Kg(UDL)per rail

For beam hanging (Option 2) - 100Kg(UDL)per beam

(Ensure loads are evenly distributed along the width and depths of bays)

Floor fixing is required where shelving bays exceed a height to depth ratio of 4:1

Toprax - Longspan Shelves

Toprax can also be used as a Longspan shelving system for the storage of longer/larger goods where a standard shelving system would not be suitable.

Based upon the standard Toprax design, it is a cost saving alternative to conventional fully braced longspan systems with a comparable load capacity.

Toprax longspan can be supplied with galvanised steel or chipboard shelves.

- Shelving bays available H 1500mm / H 2000mm
- Shelf sizes W 1740mm x D 290mm / D 440mm
- Available with either 3 or 4 shelf versions

Longspan Bay

For added stability of the beams a Beam Tie is also available.

Beam Tie, Shelf Stop + Steel Shelf

Toprax also offers unrivalled versatility as you can mix standard bays with longspan bays as shown, to offer multiple options dependant upon the type of goods to be stored.

Chipboard Shelf

Toprax - Longspan Bay Shelving c/w TC Bin Kits

- Fully adjustable bolt free pre-kitted system
- TC container colour options in blue, red, green or yellow
- (Other options available, please contact our Sales Department)
- Overall bay size H1500 x W1812 x D328 mm / Double bay D625mm
- Shelf size W1740 x D290 mm

TC container sizes: (L x W x H)
 TC4: 350 x 205 x 132mm
 TC5: 350 x 205 x 182mm
 TC6: 375 x 420 x 182mm

Max capacity per pair of beam levels: 450kg each (UDL)

Floor fixing is required where shelving bays exceed a height to depth ratio of 4:1

Quickshelf - Bolt Free Tubular Shelving System

Quickshelf is a robust boltless heavy duty hand loaded shelving system consisting of powder coated blue uprights, galvanised tubular shelves, hardboard covers (if required) and galvanised metal feet.

Its design allows for quick assembly without the need for any special tools as the precision manufactured components are simply knocked into place with a soft faced mallet.

The upright is pierced to offer full adjustability at 25mm pitches in the height.

Quickshelf is suitable for a wide range of applications in the office, workshop, warehouse and home.

Complete bays are supplied with 5 shelves per bay (supplied with/without hardboard covers) and come in initial bays or extension bays. An initial bay is required before any extensions can be added.

Chrome Shelving

Chrome shelving provides strength within an open wire design that offers unrivalled air and light penetration, making it suitable for various applications.

Many accessories are available to make shelves suitable for garment hanging and wine storage amongst many other applications.

Features:

- **Strong** - each shelf will carry up to 360 kgs (UDL)
- **Durable** - polished nickel chrome finish
- **Bolt free** - quick and easy to assemble
- **Hygienic** - smooth wipe clean surface with open wire design for air flow
- **Versatile** - static or mobile with adjustable shelves
- **Low cost** - quality at affordable cost
- **Adjustable** - all uprights include adjustable foot

Bartspan - Longspan Shelving

Bartspan is perfectly designed to meet all types of requirements for storing medium weight products of different sizes. Upright connections are provided with two hooks and a locking pin. It is a very simple system to assemble.

This shelving is a cost effective way to increase storage capacity and make more economical use of valuable floor space, even existing warehouses.

A wide range of frames, beams and components makes Bartspan a highly versatile system suitable for storing every type of product, from small components to heavy cartons.

The frames are epoxy powder coated blue uprights with galvanised bracing and the beams are grey as standard, however, other colours are available.

The frames are a fully bolted construction. Consisting of uprights, coldformed cross ties and diagonal bracing.

System Requirements:

- Each bay must have a minimum of 2 shelves.
- End frames capacity = 4300Kg based upon 3 levels at 700mm centres.
- End frames include all components that are required apart from floor fixings.
- Where bays exceed a height to depth ratio of 4:1 floor fixing required.
- All loading data is based on uniformly distributed loads.

Adjustable Cantilever Racking

- A sturdy racking system designed to accommodate long goods, pipes and bars etc.
- Robust arms securely hold the load, with end stops to prevent roll off.
- Available in various size options with add on bays to suit most long parts storage.
- Designed to be hand loaded.
- Load capacity per arm: up to 200kg (UDL).
- Arms height adjustable at 50mm increments with two fixing bolts.
- Colours: Uprights - Galvanised
Arms - Yellow

Starter Frame Kit consists of

- 2 x Complete frames - 2100mm
- 2 x Beams - L1300mm
- 2 x Bases
- Bracing

Extension Frame Kit consists of

- 1 x Complete frame - 2100mm
- 3 x Beams - L1300mm
- 1 x Base
- Bracing

How to order:

- Choose a single or double sided starter frame kit.
- Choose the number of extension frames required.
- Choose the number of arms separately.
- Choose the number of intermediate dividers and removable end stops separately.

Bartrak - Adjustable Pallet Racking

Bartrak is a strong and thoroughly proven pallet racking system. Frames are of bolted construction to allow easy component replacement, if damaged.

The pallet racking is simple to adjust or extend and suitable for all types of pallet loads. A wide range of frames and beams are available as standard, with frames finished epoxy powder coated blue, and beams in high visibility orange.

The uprights are adjustable at 75mm centres to allow greater flexibility when positioning beams.

The beams are available in rationalised series of lengths from 1800 to 3900mm. Beams are cold formed from two 'C' sections nested together and welded to upright connectors.

System Components

Note: Please contact our projects department for specific requirements.

Topmesh - Anti Collapse

Anti Collapse is a safety mesh system that provides a tough, durable and secure mesh screen on the rear of adjustable pallet racking installations.

Its versatility enables it to be fitted to practically any make of pallet racking.

The system prevents loosely stacked palletised goods from falling, and in doing so protects both personnel from injury and damage to valuable stock.

The product provides a strong, secure system when the panels are fixed in their standard "brickwork" formation.

A range of panel sizes are available to accommodate a variety of racking heights. This allows any installation to be easily extended or repositioned at a later date. The panels can be cut on site, to fit around obstacles and/or projections, with replacement framework available to refurbish cut panel edges.

Features:

- An easy to install safety system.
- Prevent loosely stacked palletised goods from falling.
- Protect personnel from injury and valuable stock from damage.
- Provide a strong security system when panels are fixed in 'brickwork' formation.
- Systems can be extended or repositioned.
- 20 panel sizes to accommodate a variety of racking heights.
- Panels can be cut, on site, to fit around obstacles and projections. Replacement framework available to refurbish cut edges.

Mesh Panel Specification

Mesh Spacing : 18 x 97mm
 Uprights : 30 x 25mm
 Horizontals : Ø19mm
 Wires : Ø2.5mm and Ø3.0mm
 Finish : Galvanised

Note: Please contact our projects department for specific requirements.

Retail High Density Lockers

General Specification

All components are manufactured from 0.7mm mild steel with the exception of the doors and frame which are 0.9mm.

Door colours available are Red, Cream, Blue, Yellow, Green and White. Carcass colour options are Silver Grey, White and Coffee (we reserve the right to alter specifications).

Garment Collector

This "post box" style locker is for the collective storage of soiled garments. An inner anti-theft plate prevents items being removed once they have been "posted".

Garment Dispenser

A single service door provides access to all the inner compartments of these Garment Dispensers enabling the distribution of clean garments, towels etc. Individual compartments remain secure and require keyed access.

Post Box Lockers

These lockers are ideal for the post box system, offering security and ease of access for the recipient.

16 Door High Density

Ideally suited for secure storage of small items.

Note: These lockers are not available with coin retain, coin return or combination locks.

Clean Environment & Space Saving Lockers

Keeping clean garments and soiled work overalls separate can often be a problem. The Clean and Dirty Locker solves this problem by providing a centre partition with a double coat hook to either side.

Identical in overall size the Uniforms Locker has three handy shelves to one side of the partition and includes a double coat hooked on the other side.

The Two Person and Twin Lockers include two double coat hooks.

Where space really is at a premium then these versatile locker units must be the answer. Each offers two users full depth for garments on hooks while keeping the unit overall width to a minimum.

Door colours available are Red, Cream, Blue, Yellow, Green and White. Carcass colour options are Silver Grey, White and Coffee.

Wire Mesh Lockers

Wire mesh lockers are becoming very popular within the storage industry. Manufactured from wire mesh they allow maximum visibility and ventilation whilst maintaining security.

All lockers are manufactured from 8mm and 6mm round bar. Mesh is 25 x 25 x 2.5mm. All lockers are fitted with hasp and staple for locking doors using a padlock (not supplied). Lockers can be manufactured to any size or dimension, they will bolt to the floor, side by side, back to back or to a wall. All lockers are finished in bright zinc.

Note: Padlocks are not supplied

Cylinder Handling

A range of storage and handling solutions for the safekeeping and movement of gas cylinders around your premises. All trolleys are of tubular steel construction powder coated in blue with a pierced base plate to help disperse condensation. Trolleys and wall brackets are fitted with a galvanised chain to hold cylinders securely. All rear wheel models are fitted with 100mm diameter swivel blue vulcanised rubber castors, which offers low rolling resistance, meaning they are easy to manoeuvre, are non marking and are a soft yet highly durable compound.

| Cylinder Stand | 280 | 600 x 340 x 310 | CS/280 | £98.00 |

Drum Handling

A range of handling solutions for the safe movement of 210 litre steel drums around your premises. All equipment is powder coated in blue.

Drum Stands

- For use with 210 litre steel drums.
- Enables drums to be moved from a vertical to horizontal position for decanting or storage.
- Manufactured using four support straps for increased loading capacity.
- All wheels, castors and drum rollers are white nylon 80mm diameter (where included).

| Product Description | H x W x D (mm) | Height to Underside of Drum when Loaded on to Stand | Order Ref | Capacity (kgs) | Price (Each) |
|--|-----------------|---|-----------|----------------|--------------|
| Drum Stand | 400 x 430 x 780 | 300mm | DS1 | 250 | £88.00 |
| Mobile Drum Stand with drum rollers | 430 x 430 x 780 | 347mm | DS2 | 250 | £125.00 |
| Mobile Drum Stand without drum rollers | 430 x 430 x 780 | 320mm | DS3 | 250 | £115.00 |
| Static Drum Stand with drum rollers | 400 x 430 x 780 | 330mm | DS4 | 250 | £105.00 |

Universal Drum Transporter

This tough durable all welded steel construction drum transporter is designed to accept 210 litre steel drums. Drums can be transported in a horizontal position when the handle is engaged, and is fitted with drum rollers to allow rotation of the drum for decantation. A handle is supplied to enable quick loading/unloading of the drum. Each supplied with 200mmØ solid rubber and 80mmØ Nylon wheels/ castors.

| Product Description | H x W x D (mm) | Height to Underside of Drum when Loaded on to Stand | Order Ref | Capacity (kgs) | Price (Each) |
|---|-----------------|---|-----------|----------------|--------------|
| Universal Drum Transporter/ Stand with Handle | 540 x 620 x 800 | 387mm | UDT | 250 | £295.00 |

Drum Up and Down Enders

The DUE allows 210 litre steel drums to be moved from a horizontal to a vertical position.

The DUE/DE allow drums to be moved from a horizontal to a vertical position and vice versa.

| Product Description | H x W (mm) | Order Ref | Capacity (kgs) | Price (Each) |
|---------------------------------------|------------|-----------|----------------|--------------|
| Drum Up Ender c/w Handles | 1335 x 300 | DUE | 250 | £70.80 |
| Drum Up Down Ender c/w Handles / Knob | 1680 x 720 | DUE/DE | 250 | £95.00 |

Drum Dollies

3 Wheeled Drum Dolly

Ref: 3WDD
 Price: £88.15 Each
 Size: 735mm x 125mm high overall
 Castors: 75mmØ - White Nylon
 Capacity: 250kg

(Design allows for loading by drum truck) - See below.

4 Wheeled Drum Dolly

Ref: 4WDD
 Price: £108.50 Each
 Size: 742mm x 160mm high overall
 Castors: 75mmØ - White Nylon
 Capacity: 250kg

(Design allows for loading by an overhead lifting device)

Drum Trucks

Fitted with a drum-retaining hook suitable for handling tight head and open top 210 litre steel drums.

- Enables easy mobility of 210 litre steel drums
- Available with or without rear wheels. The real wheel attachment considerably reduces operator effort
- Both drum trucks come with full operating instructions.
- All rear wheel models are fitted with 100mm diameter swivel blue vulcanised rubber castors and 250 Ø rubber wheels, which offers low rolling resistance, meaning they are easy to manoeuvre, are non marking and a soft yet highly durable compound.

| Product Description | H x W x D (mm) | Order Ref | Capacity (kgs) | Price (Each) |
|----------------------------------|------------------|-----------|----------------|--------------|
| Drum Truck | 1520 x 610 x 420 | DT | 280 | £195.00 |
| Drum Truck c/w Rear Wheels | 1520 x 610 x 420 | DT/RW | 280 | £265.00 |
| Drum Truck Rear Wheel Attachment | - | RW/DT | - | £76.80 |

Racking

Sheet Rack

Sheet racks simplify the storage and access problems of all sheet material, panels and boards. Minimum base frame height makes loading very easy. It is recommended that the racks are secured to the floor (No fixings are included). Supplied in knocked down form. Racks are powder coated in blue and have 3 storage divisions spaced nominally at 155mm apart.

| Product Description | H x W x D (mm) | Order Ref | Price (Each) |
|---------------------|-----------------|-----------|--------------|
| Sheet Rack | 900 x 600 x 600 | SR/0.6 | £252.28 |

Bar Racks

Heavy-duty horizontal bar racks are freestanding units for the storage of bars, pipes and tubes etc. End stops retain products in position. Pre-drilled for floor fixing (no fixings included). These units are powder coated in blue and require no bracing, therefore can be positioned as required.

Racks can be positioned back to back to provide double-sided units.

Maximum capacity per rack- 4000 kgs

| Product Description | H x W x D (mm) | Order Ref | Price |
|---------------------------------------|---------------------------|-----------|--------------------|
| Bar Rack Single Unit | 1832 x 840 x 890 | BARU/SS | £371.00 (Each) |
| Bar Rack Double Unit (as shown above) | 2 x single unit, as above | BARU/SS/2 | £742.00 (Per Pair) |

Cable Dispensing

Toprax - Adjustable Cable Rack

- Used for storing and dispensing reels of wire/cable.
- Supplied with 4 fully adjustable hanging rails (Ø 31.75 x L 818mm - actual hanging length).
- Powder coated finish in blue & silver/grey.
- A clip together system with no tools required.
- Extension fitting kits are available and must be used if creating a double height rack by stacking two racks (020434) together.

| Description | H x W x D(mm) | Order Ref | Price (Per Kit) |
|-----------------------|-----------------|-----------|-----------------|
| Cable Rack | 983 x 942 x 328 | 020434 | £138.84 |

| 350 | 20 | 590 | 800090 YELLOW | £34.80 |

Floor Mounted Cable Reel Stand

A light weight yet robust unit, which can ease cable handling problems, frequently encountered during installation work.

Once the cable has been placed on the stand, it is free to rotate during unreeling, but it is retained in position to maintain stability.

The stand has two adjustable full width rollers to accommodate a range of cable reel/drum sizes. For larger heavier drums, two stands can be used, one under each drum flange.

Machinery Moving Equipment

Heavy Duty Skate Kit

This complete kit is designed to enable the safe and easy movement of bulky loads for up to 20 tons in any direction.

- Can be used as single or multiple units.
- Moving speed not to exceed 5m/min.
- Minimum turning circle is 3m.
- Supplied in a robust steel carry case.
- Roller dimensions: W 51 x 17mmØ.
- 94mm skate height with turntable attached.

Kit supplied complete with:

| No. | Description | Qty |
|-----|-----------------------|-----|
| 1 | Roller Skates | 4 |
| 2 | Link Up Bars | 2 |
| 3 | Turntables | 2 |
| 4 | Stabilizers | 2 |
| 5 | Steering Handle | 2 |
| 6 | Handle for Steel Case | 1 |
| 7 | Steel Case | 1 |

|--------------------------------|------------------|-----------|-------------------|--------------|
| Heavy Duty Machinery Skate Kit | 1030 x 205 x 175 | HDMSK | 20 | £965.00 |

Roller Skate Kit

Roller skates are designed to move heavy equipment and machinery.

- Supplied in a set of 4.
- Movement enabled by the action of an endless hardened roller chain revolving around the centre member of the skate casting body.
- At any one time, a minimum of 5 rollers are touching the floor ensuring smooth travel over cracked concrete or uneven floors.

| Product Description | L X W X H (mm) | Order Ref | Capacity (Tonnes) | Price (Each) |
|---------------------|----------------|-----------|-------------------|--------------|
| Roller Skate Kit | 206 x 100 x 77 | RSK10 | 10 | £315.00 |

Roller Crowbar

This product provides leverage when lifting heavy items/ machinery/equipment and can be used with the HDMSK or RSK10.

- Roller dimensions: W 54 x 70mmØ.
- Single piece forged steel.
- Very safe to use in all industrial areas.
- Eliminates the need to use loose tubes or bars beneath equipment to be moved.

| Product Description | L (mm) | Order Ref | Capacity (Tonnes) | Price (Each) |

Topstep - Kick Steps

Topstep - Kick Step is a premium GS approved quality mobile step finished in a choice of seven colours; Black, Red, Blue, Dark Grey, Light Grey, Green and Yellow.

Topstep provides easy step up access preventing excessive stretching.

The mobile step is supplied K/D where two sections permanently 'lock' together via a built-in bolt free mechanism.

- Topstep is the perfect accessory for any storeroom, office or workplace, where safe access is required for items stored at height.
- Mounted on retractable spring mounted castors Topstep can easily be moved into position without bending or lifting and when stepped on Topstep locks into position allowing safe access.
- Its sturdy steel construction with anti-slip rubber treads and base surround provide a solid platform from which to work.

Working load: 150 kgs
Overall Height: 400mm
Diameter (Top): 260mm
Diameter (Base): 430mm

Topstep - 3 Tread Platform Steps

Fully mobile heavy duty 3 tread platform step with a double depth top tread for extra workspace when retrieving goods.

Epoxy powder coated in red and fitted with 4 x 75mm diameter rubber sprung swivel castors which lower to the ground under operator weight.

Double handrails are included for increased operator safety.

Safety grip treads give a durable anti-slip surface.

| Product Description | Weight (kg) | H x W x D (mm) | Tread W x D (mm) | Order Ref | Platform Height (mm) | Price (Each) |
|---------------------|-------------|------------------|------------------|-----------|----------------------|--------------|
| 3 Tread | 32 | 1560 x 670 x 750 | 550 x 200 | HDPSS3T | 690 | £271.35 |

Topstep - Mobile Steps

Mobile steps are mounted on retractable spring castors to enable the steps to be easily moved into position. When under the operator weight steps lower to grip the floor. Double handrails are included for increased operator safety.

All ribbed rubber mat treads (approx 3mm) are both glued and fastened to the steel tread to provide extra adhesion.

| Description | H x W x D (mm) | Tread W x D (mm) | Order Ref | Platform H (mm) | Platform Tread W x D (mm) | Price (Each) |

Topstep - Heavy Duty Steps

A range of red powder coated, fully welded, tubular framed mobile safety steps. Available in 5 heights and includes punched steel treads.

The steps have a wide base for increased stability and non-slip rubber feet are fitted to the front legs as standard.

The 4 and 5 tread models come complete with rear fixed rubber wheels and 75mm diameter rubber sprung swivel castors which lower to the ground under operators weight.

The 6 to 8 tread models include rear fixed rubber wheels and front swivel castors. These models are also fitted with a safety bar to prevent misuse of steps when mobile, and when released, this lowers the steps to the floor, thus enabling the operator to safely use the steps.

All models have a double handrail.

Other sizes and colours are available, please contact our sales department for more information.

Workbenches

Heavy duty workbenches are fully welded (not flat pack) and are constructed from steel angle with braced galvanised tops or 45mm timber top or super heavy duty with galvanised steel on top of 45mm timber. Three lengths to choose from in the static bench range each available in three widths. All benches come with bottom shelf, vice plate welded underneath the front right-hand corner and cupboard included in the price. Cupboards measure 600mm x 600mm by bench depth with lock fitted as standard. Also available with extra cupboards or drawer(s) in place of the cupboard or can be fitted with five-drawer unit.

Mobile Workbenches

These fully mobile workbenches stand on four legs when in use to give maximum stability, with the wheels off the floor. Simple lever action pushes down the under-carriage and takes the weight off the legs onto the two wheels and two castors, enabling easy movement of the complete unit. Supplied with standard cupboard (SCP models) or with five drawer unit and matching cupboard (SFCP models). All models supplied with bottom shelf and vice plate. Other sizes and specification are available on request. Normal height 840mm, other heights available at no extra cost.

Semi Mobile Workbenches

These models have two wheels in permanent contact with the floor and the handle enables the four models to be pushed like a wheelbarrow. All these bench types have the cupboard under the vice plate so reducing the lifting weight.

Assembly Benches

Our hollow section Assembly Benches are constructed from square section steel, all joints are welded and each leg has an adjustable foot which enables the bench to be firmly seated on an uneven floor without rocking. Supplied ready to unpack and use no assembly required.

These medium duty benches are ideal for the assembly of small components especially for the electronics industry or are equally useful as packing benches. Normal height 840mm other heights available at no extra cost.

Choose from a range of different worktops - Laminate or MDF (with rounded edges), also available with steel, vinyl or anti static laminate worktop.

WAREHOUSE / SAFETY EQUIPMENT

Partitioning, guards and barriers for creating secure storage and safety zones.

| Product | Lead Time <small>(Working Days)</small> | Page |
|--|---|-------------|
| Topmesh - Mesh Wall Partitioning | (15-20) | 112 |
| - Machine Guard | (15-20) | 113 |
| Modular Safety Barrier System | (5-7) | 114 |
| Fork Lift Safety Cage | (10-15) | 114 |

Topmesh - Mesh Wall Partitioning and Machine Guard

Topmesh - Mesh Wall Partitioning

Mesh wall partitioning is ideal for creating secure locations such as archive, quarantine and storage areas where restricted access is required. Alternatively create dividing walls, barriers and mesh roofs whilst enabling full visibility at all times.

Prefabricated mesh panels offer an easy solution to the problem of revised working or warehouse reorganisation, whilst giving scope and flexibility for future expansion. The partitioning is supplied as a standard height of 2200mm, however virtually any height can be achieved. It is the practical economical solution to providing an enclosure and/or dividing screen for goods and machinery.

Security

The unique design of the floor fixing and the method in which panels are fitted together ensures the system cannot be dismantled from the outside of the enclosure.

Doors

All Doors are manufactured with a rigid steel framework to provide a strength and durability, available in single or double opening as hinged or sliding options. All doors can be fitted with a hasp and staple (for padlock) or a cylinder lock.

Features:

- Easy to customise – the panel sections are available in 9 sizes, thus saving material and installation time.
- Stable design, 30mm vertical sections, five horizontal tube reinforcements per mesh section.
- Strong 60 x 60mm posts that includes a base, to enable floor fixing.
- Scratch and impact-resistant surface, welded Galvanised coated material, which provides a degree of anti-rust protection.
- Allows air, light and water to pass through.

Topmesh - Machine Guard

Topmesh Machine Guard is an accident prevention system which protects personnel from injury or damage to expensive plant and equipment when positioned around machines, robots, conveyors, lifts etc.

Modular, flexible and easy to install. Hinged and sliding door options are available, with each package comprising all the necessary fixings and accessories which include a fitted handle with either a hasp and staple or cylinder lock.

Modular Safety Barrier System

Features:

- A highly visible safety barrier system designed for creating pedestrian walkways, dividing manufacturing units, stock areas, warehouse and commercial premises where for safety and other reasons segregation is required.
- Designed to be sited as individual units or in long runs.
- Supplied in KD form complete with fixing instructions.
- Posts are drilled through 4 sides to enable barriers to be positioned in straight runs or through 90 degrees.
- Ready for use, with the base plates conveniently pre-drilled for easy surface fixing. (Please note floor fixings are not included).
- Finished in epoxy powder coated bright yellow.

| Product Description | H x W x D (mm) | Order Ref | Price (Each) |
