

Are your staff at risk of tripping?

Protect your staff from slips and trips

Trip-Stop™ Pipe and cable covers

Slips, trips and falls from height can all have serious consequences.

Everyone can do more to ensure that their workplace becomes a safer environment. The effects of slips, trips and falls at work are far reaching, both for those involved, their families and the industries they work in.

The cost to society alone is in the order of £800 million per year

How much could a slip or a trip cost?

- Slips and trips are the biggest cause of serious injuries to health care workers.
- Every year around 10,000 people suffer a major slip or trip injury whilst at work.
- On average 90% result in broken bones.
- In fact they account for far more major injuries than manual handling and falls from height added together.
- You have a legal duty to look after yourself and your colleagues at work.

If someone is off work for six weeks with a broken leg, how much would it cost in sick pay, cover, overtime, insurance and compensation?

What if the case went to court?

What about loss of expertise, training of new staff and temps, and the effect on morale?

Finally

You might think you're doing everything you can to prevent slips in your workplace, but everyone could do a lot more.

Remember if you spot a trip hazard, make it safe.

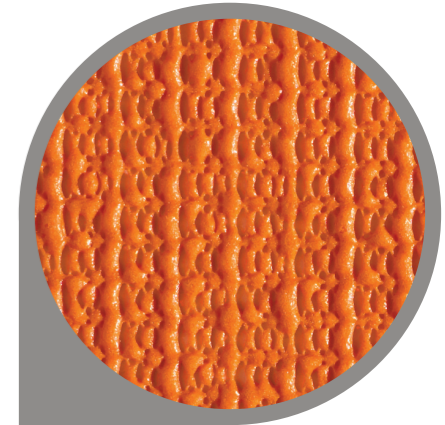

The quick, easy-to-use solution to reduce tripping risk.

Toffeln Trip-Stop™ reduces the risk of your staff tripping on pipes or cables and causing serious injury to themselves, as well as bringing about expensive and time-consuming injury claims.

This brightly coloured, single use cable/pipe cover immediately attracts attention - and it's in stock and ready to dispatch to you today.

- Fixes with low tack adhesive on outer edges only
- No sticky residue left behind
- A quality guaranteed Toffeln product
