

CORE GRASS Reinforcement

This product can be specified for all types of grass parking and driving areas, from domestic driveways to Fire Engine access routes. The grid is first filled with soil and then either seeded or turfed.

CORE Grass Reinforcement features a unique lateral drainage system that allows water to move horizontally through the grid just below the surface. This allows stormwater to permeate evenly across the entire surface, protecting the turf from unnecessary erosion and providing even and consistent growth.

The sheets are designed to be flexible, allowing them to bend slightly and follow the contour of the ground. This makes the installation quick and easy.

Each sheet also has an interlocking mechanism on all four sides which allows all adjacent panels to be connected in every direction. This creates a continuous matrix across the entire surface.

The CORE Grass Reinforcement has a 10mm wide foot at the base of the cell wall to provide additional strength to the honeycomb structure and has cylindrical columns to allow pinning for steeper gradients (20%).

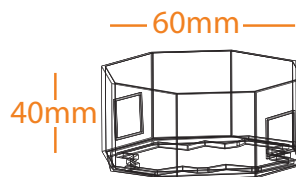

CORE Grass can be installed as a new porous driveway surface or over existing hard surfaces such as tarmac, concrete or compacted gravel with minimal preparation.

Please see our CORE Grass installation sheet for further information and guidance on build up and subbase requirements.

For any additional information or specification queries please give our technical team a call on freephone 0800 118 2278.

TECHNICAL SPECIFICATION

Material	Recycled Polypropylene
Sheet Size	(1150 x 1000mm) 1.15m ²
Fill Material	Top soil / loam mix
Cell Wall Thickness	2.5mm
Soil amount if Seeding	12m ² per tonne (50mm deep)
Soil amount if Turfing	20m ² per tonne (30mm deep)
Drainage Holes	Vertical and Lateral
Clipping Mechanism	Socket & Pin (all 4 sides)
Pinning Required	Optional 225mm Galv. Pins

APPLICATIONS

- Grass Domestic Driveway
- Grass Parking Area
- Suitable for HGV Through-Traffic
- Disabled Friendly Access Route

BENEFITS

-  **DDA COMPLIANT**
-  **ECO-FRIENDLY**
-  **LOW COST**
-  **STABILISES GRASS**
-  **NO MUD**
-  **EASY INSTALL**
-  **MOWER FRIENDLY**
-  **STRONG**
-  **SUDS COMPLIANT**
