Durbin *your first stop* for ALL imported unlicensed medicines

Cost effective
Quality Service. No stone left unturned
Ethical

Unlicensed 'named patient' medicines
UK discontinued products

UK supply shortages
Orphan drugs

The Durbin Difference

Cost Effective

You have a choice and we understand that. But we also know that to healthcare professionals 'value for money' is about a lot more than just competitive pricing and discount structures. So when you come to us for your imported medicines you'll find that we have next day delivery of stock lines*; provide full technical back up including translations, and for most products don't have minimum order values. Naturally, this is all done in line within MHRA guidelines and at a price that suits your budget.

*For most items on orders placed before 2pm Monday to Thursday (UK delivery excluding Northern Ireland, Highlands and Islands).

Quality Service. No stone Left Unturned

Durbin's highly trained team of pharmacists and pharmacy technicians have vast experience in the importation of unlicensed medicines.

We've earned a reputation for 'going the extra mile' and for giving customers the same high level of service whether they're ordering a thousand packs or just one.

We are as stringent with our suppliers as we are with ourselves, so you can be confident that as we've sourced your medicine from a base of reputable worldwide suppliers built up over nearly 50 years, it will be quality assured, and be handled, stored and transported under the most thorough and rigorous procedures at all times.

Ethical

All our processes, procedures and management structures are underpinned by our ethical approach to comprehensive risk management. Our premises are licensed for the storage and distribution of imported unlicensed pharmaceuticals and all processes and procedures are controlled by SOPs which are regularly audited by the MHRA and the NHS.

We regard the provision of technical support and documentation to be an integral part of the sourcing process and our experienced and professional team can facilitate contact for Medical Information and ADR/AERs. We will also source Certificates of Analysis / Conformity where available.

Durbin PLC is fully licensed by the UK Authorities and holds a Wholesale Dealer's Licence, a Manufacturers/ Importers Authorisation (MIA), and is licensed for the supply of "Specials" and controlled drugs. All SOPs and policies are audited to GDP standards and to ISO9001.

Our team of pharmacists, nurses, medical engineers and other healthcare professionals will ensure that our service to you complies with all relevant legal requirements.
