

*Instant access to quality
safety training videos online*

Brought to you by the FPA

How does it work?

Fire-stream is an online video streaming portal, hosting FPA video content and designed to complement fire safety and health & safety training in the workplace.

Access to the video material is granted via a specific URL and use of annual subscriptions is restricted by IP-address. URLs can be embedded within existing LMS, intranets and presentations.

Videos are MP4 files encoded to HTML5 standards, enabling viewing across any platform or device.

Because videos are streamed, a broadband connection is required. Multi-bit-rate streaming caters for varying IT capabilities.

Easy tab navigation

User-friendly login for administrators and users

Previews of all video content available

What does it include?

Fire-stream allows you to subscribe to a training video, or to specific video modules, in any combination to suit your workplace requirements. In addition to the video content, supporting materials including checklists, handbooks and PowerPoint presentations complement the video material providing quality, comprehensive content on demand.

Sectors covered currently include catering, construction, healthcare, holiday parks, hotels, residential care, schools and warehouses. Generic content on fire safety, health & safety, fire wardens, hot work, assisted evacuation and extinguishing fires is also available. For a full list of videos and modules visit www.fire-stream.net

Link from list of videos enables user to jump straight to relevant section

Accompanying resources listed alongside each video

Videos available within subscription are listed

Managing your account

The **fire-stream** administrator page enables the account manager to re-visit the status of your subscriptions at any time, listing the videos and packages that you are subscribed to, user log in details, and expiry dates for subscriptions.

It also enables us to communicate with you directly through our administrator message board, for example alerting you to new content or resources. In addition, our customer services will be available throughout office hours to discuss your account.

The screenshot displays the 'Admin area' of the fire-stream website. At the top, there is a navigation menu with links for 'home', 'our videos', 'why fire-stream?', 'about us', 'contact us', 'administration', 'FAQs', and 'privacy blog'. The main content area is divided into several sections:

- Message board:** A section titled 'Messages' with a message from 'Fundamentals of Health and Safety' regarding RCP resources.
- Healthcare premises package:** A section listing content items: 'Fire Safety in Healthcare Premises', 'Fire Safety in Residential Care Homes', and 'Fundamentals of Health and Safety'. It also includes a table with user login details and subscription expiry dates.
- Office fire warden package:** A section listing content items: 'Action in the Event of Fire' and 'Role of the Fire Warden'. It also includes a table with user login details and subscription expiry dates.

Annotations with lines pointing to specific parts of the interface:

- 'Message board' points to the 'Messages' section.
- 'Detail of content included in subscription packages' points to the 'Healthcare premises package' content list.
- 'Detail of user logins and subscription expiry dates' points to the table associated with the 'Office fire warden package'.
