Food Tech

S+B has redefined the food technology environment and brought it firmly into the 21st century with the introduction of Foodtech. This innovative modular system combines the benefits of advanced materials such as Corian with hi-tech ergonomic design to create an attractive range of high quality units to satisfy every food technology discipline.

Food Tech

S+B has redefined the food technology environment and brought it firmly into the 21st century with the introduction of Foodtech.

This innovative modular system combines the benefits of advanced materials such as Corian with hi-tech ergonomic design to create an attractive range of high quality units to satisfy every food technology discipline.

Food science and preparation, nutrition, information technology, design, packaging and fabrics can all be catered for by the range of individual options which Foodtech provides.

This built-in flexibility and choice enables Foodtech units to be harmonised into a total teaching environmental in which both teacher and student can interact with maximum effectiveness.

The modular freestanding configuration of Foodtech features large all round easily accessed work surfaces – ideal for the teaching and supervision of single students or groups. Multi-functional working, storage and equipment facilities can be created which allow several food technology disciplines to be taught

and carried out simultaneously.

The high quality factory-built units can be planned and installed rapidly with minimum disruption into any size or shape of area or room.

Existing areas or rooms can be modified and standard units can be adapted or harmonised to meet individual, budgetary or layout parameters.

Start your new food technology teaching environment by contacting S+B for a free Foodtech consultation and design survey.

The S+B Turnkey solution - if your preference is for a one stop shop, why not consider our turnkey package which includes design, strip out of existing rooms, re instatement of services by qualified engineers, new ceiling, lighting, flooring, blinds, decoration, connection of cookers and washers and of course the best possible furniture choice.

- Modular octagonal and rectangular island and peninsular units, benching and storage systems which create the ideal technology teaching environment. This unique benching and storage system can help create a very flexible and exciting learning space.
- Exceptionally adaptable enabling all the key food technology disciplines to be taught and practised individually or simultaneously.
- Octagonal island units provide easy access to large work areas – ideal for teaching student groups.
- Units can be designed, combined, colour coordinated and, when necessary, relocated to suit any floor space, layout or space.
- Corian worktops in choice of colours provide exceptional durability, stain resistance, easy cleaning and excellent hygienic qualities – the perfect surface for food technology.
- Units can be linked to form continuous seam-free Corian surfaces including integral sinks.
- Other solid surface materials also available.
- Built-in electrical services provide safe, easy access for the connection of all appliances.
- All units and services are factory assembled and tested to comply fully with all relevant standards prior to installation.
- Mains services including gas, water and electricity can be planned in to avoid floor trenching or overhead trucking.

Other exciting products from the **S+B** extensive range

The Spacesaver Working Wall - S+B has developed the most space efficient and comprehensive range of storage options to satisfy a wide range of applications in any learning environment. A full range of cupboards, drawer packs, tray units, shelves are available in different sizes to suit all needs.

Easy to clean melamine surfaces (laminated options) on High Density Particle Board (MDF options) ensures a tough, durable and attractive range of units. 270 deg and 170 deg self closing hinges with full re alignment capability combined with easy glide, non friction runners and meta box drawers (one piece seamless polymer option) provides a safe, reliable and ergonomic design.

The Spacesaver Working Wall can be built up in standard configuration to provide a highly space and cost efficient storage system. Our customers can choose their own mix of units and we are always happy to develop bespoke solutions for very particular requirements. Whiteboards and notice boards can be hung from a rail system fixed to the front of the assembly to provide an even more flexible and space efficient solution.
