

Don't Get Mad, Get Even....Better!

Commercial vehicles have been a favourite target for thieves for many years. All too often, whilst driving around our towns and cities, you see van doors which have been attacked. The locks on many manufacturers vehicles are just not up to resisting the kind of attacks which we experience in the UK.

In addition to this, original van locks are designed to suit the mass market, very often only having regular operation as standard. Mul-T-Lock's products have been developed with the vehicle user in mind, offering specific functionality options.

This is why we have designed some unique locking products, to help our freight operators, courier services, goods suppliers and trades people secure their property, without unloading their bank accounts.

Slam Locking Option

Keyed Alike

It is possible to have all of these Security Locks on one or more vans designed to operate on one key type, reducing the number of Keys you need to carry.

Master Keyed

Favoured by Fleet Managers, Master Keying allows you to secure your vehicles, issue keys to your drivers, but, still return a Master Key which will open all of the fleet secured within the Master Key suite.

- Automatic locking when the door is shut
- Key to open
- Can be keyed alike
- Can be integrated with dead locking products
- Special anti twist device
- Pick resistant
- Corrosion resistant components
- Attack resistant
- Unique Mul-T-Lock 7 pin system
