Key aspects of our commitment to reducing your carbon footprint will include insulation to solid walls including secondary aspects such as dealing with cables and pipes and maintaining air flow, reducing draughts, and a focus on thermal bridging and providing cost options to decide whether clients can save money in the long term.

RAP has an Environmental Waste Management Plan that ensures we take every opportunity to reduce our impact on the Environment. We are consistently committed to reducing our material waste to landfill and reduce pollution to our surroundings.

The company is committed to a process of continual improvement and further development in all areas of environmental performance.

**Government incentive to reduce CO2 emissions by 34% by 2020, 80% before 2050**

## RAP & The environment

We have an ongoing Environmental Waste Management plan. We take care to ensure any material waste can be re-used, recycled or disposed of to reduce impact on landfill.

**The benefits to you result in reduced costs.**

**Pollution prevention & Risk Management “it`s common sense”**
