

Barriers By Design are able to offer full safety barrier systems including armco and pedestrian barriers along with traffic control equipment on a supply only or full installation program using OUR OWN fully trained installation engineers.

As part of Westfield Services (UK) Ltd not only do we offer installation but also a full build package including ground works, electrical works, LPG works and general building.

So if you have suffered damage from impact to your building, not only can we install a complete barrier system to prevent further occurrence, we can carry out all the repairs both electrical and general building, including cladding.

ARMCO BARRIER

Armco is a flexible Barrier Rail system which has high strength, durability and resilience to make this the ideal barrier for many locations. This versatile barrier system has been adapted for protection against moving vehicles in a wide range of situations and is widely used as a protective measure for people and property, indoors and outdoors, in car parks, warehouses, loading bays and yards, factories, docks, quaysides and private roads all over the UK. This is a much cheaper option than the cost for damage to buildings, plant, machinery and stock. Double rail gives the barrier extra height and protection. A Handrail extension (taking total height to 1100mm) can be added to give the barrier protection against vehicles, with the added protection for pedestrians.

Components

- 3.2m Rail
- 1.6m Rail
- Fishtail End
- Pedestrian End
- Plastic Yellow End Cap
- Handrail Extension
- Handrail

- Internal Corner/Flex
- External Corner/Flex
- 90° Internal Corner
- 90° External Corner
- 135° Internal Corner
- 135° External Corner
- RSJ Post – 560/760/1100
- RSJ Post Cast In – 1100/1200/1500/1800
- Z Post – 560/760
- Z Post Cast In – 1200

HANDRAIL BARRIER

This type steel hand rail pedestrian barrier systems are an affordable way to provide a proven pedestrian walkway system at a fraction of the costs compared to welded and current polypropylene systems offered, using the minimum of tools for construction. Should you have the need to repair any section of the barrier this is very simple with little disruption to your operations.

The simplicity of the products enables you the opportunity of building different layouts restricted only by your imagination.

HEAVY DUTY PEDESTRIAN BARRIER

This new heavy duty pedestrian barrier system from Barriers by Design is a breakthrough in pedestrian safety at a cost to suit most pockets, combining heavy duty uprights constructed from RSJ with a 180mm x 180mm base plate and the ever popular Keyclamp type fittings for corners etc this barrier not only offers tremendous protection against truck impact but will not flex into the pedestrian walkway as other products found in the market place would. We believe this barrier is the quickest available for installation again keeping costs to a minimum.
