

NEW EQUIPMENT, MODERNISATION AND MAINTENANCE SOLUTIONS

KONE Gates, Turnstiles & Entrance Systems

KONE Gates, Turnstiles & Entrance Systems

KONE's range of internal and external entrance systems are designed to cover a broad range of environments including leisure centres, shopping centres, factories, distribution centres, offices, cinemas, public buildings and sports facilities. Manufactured and supplied as either fully automated stand-alone units or manual in operation they constantly protect your investment and your people.

Gates & entrances

KONE's range of entrance gates are designed and manufactured specifically for the environment and location they are intended for.

The choice of style and size combined with the option of powder coating to a range of RAL colours provides the ideal match to suit any buildings facade or architectural needs.

KONE gates can be supplied to protect roadway access from unauthorised passenger and commercial vehicle entrance and can also be provided as part of a KONE automated entrance solution including KONE external bespoke security shutters.

Turnstiles

KONE's internal turnstiles are ideal for commercial and public areas where the use of smart cards and electronic entry systems are in use. Manufactured using high quality stainless steel KONE turnstiles are highly reliable and provide the safe option for controlling traffic flow in and out of a building during rush hour periods.

External turnstiles are invariably specified for sports stadiums and arenas to control high volumes of personnel movement whilst still preventing unauthorised access to the premises. Turnstiles can be supplied in either half or full height configuration and automated for unmanned locations where maximum security, together with a strong visual deterrent is required.

Traffic barriers & road blockers

KONE traffic barriers and road blockers are designed to control and prevent unauthorised vehicular access into a restricted or private area.

Frequently part of an automated system the heavy duty equipment is power operated and runs entirely unattended ensuring regulated traffic flow at entry and exit points of a premises.

KONE automated road blockers are fully tested to ensure vehicle entry is prohibited even when deliberate entry attempts are made.

Quality, maintenance, repairs & service

When you choose a KONE product solution you are assured that quality, durability and safety are inbuilt in its production, irrespective of manufacturing source.

Invariably our specialist equipment is installed into locations where heavy usage is normal. As a result the equipment will require skilled routine maintenance and occasional repairs, to support this need KONE has a range of tailored maintenance solutions for your business.

KONE provides innovative and eco-efficient solutions for access, elevators, escalators, doors, and loading bays. We support our customers every step of the way; from design, manufacturing and installation to maintenance and modernisation. KONE is a global leader in helping our customers manage the smooth flow of people and goods throughout their buildings.

Our commitment to customers is present in all KONE solutions. This makes us a reliable partner throughout the life-cycle of the building. We challenge the conventional wisdom of the industry. We are fast, flexible, and we have a well-deserved reputation as a technology leader, with such innovations as KONE UniDrive™, KONE MonoSpace®, KONE MaxiSpace™, and KONE InnoTrack™. You can experience these innovations in architectural landmarks such as 30 St Mary Axe and Broadgate and 201 Bishopgate buildings, BAA Terminal 5, Emirates Stadium, Brunel University, Citigroup, Jubilee Line and St Georges Wharf.

KONE employs approximately 35,000 dedicated experts to serve you globally and locally in 50 countries.
