

Manufacture

Our 27,000 sq ft factory is equipped with modern sign manufacturing equipment and skilled and experienced staff.

We fabricate signs in acrylic, aluminium composite, PVC steel and timber, as well as specialist materials as required. .

We have converted to using LEDs for illuminated signs. We have established best practices and use only CE certified products with excellent properties with regards environment and energy usage.

We use CNC routing technology for converting aluminium, acrylic and other sheet materials.

We process self adhesive materials on both state of the art cutting machines and on wide format digital printers.
