cost effective solutions  
for waste and recycling

# Save money on waste disposal

Installing an Orwak baler could help you turn your waste from a bottom-line cost into a valuable revenue stream. By segregating your waste into clearly identifiable types, our units can also help you achieve your legal recycling targets as defined by the Waste Regulations 2011, and the Producer Responsibility Obligations (Packaging Waste) Regulations 2010, as well as contributing to your in house environmental targets.

## Model 3110

- Front loading
- Compact machine
- Small footprint

- Bag protected during compaction process
- The flexible compactor

COMPACTOR

COMPACTOR

### Model 4110

- The safest in-bin compactor in sector
- Fully guarded and interlocked
- Fits various bin systems and sizes

COMPACTORS

# features & benefits

## compliance

- help to achieve legal recycling targets set out in the Landfill Directive and Packaging Regulations
- support in-house recycling targets and ISO14001

## health & safety

- create a safer working environment by keeping walkways clear
- reduce the fire and pest risk associated with loose waste

## cost saving

- save money by reducing number of waste collections
- turn baled waste, such as paper and cardboard, into a commodity not a cost

## efficiency

- free up valuable warehouse space and maximise your storage capacity
- reduce waste handling and improve staff efficiency

To support our range of world-renowned balers and compactors, we also offer a full selection of accessories. Our convenient service offers high quality plastic sacks, twine and wire, as well as tools for waste handling, delivered direct to your door. We also supply consumables suitable for most other balers.

## Plastic sacks

## Baling twine

## Baling sundries

## Baling wire

## Strapping
