

**salt·a·peel™**

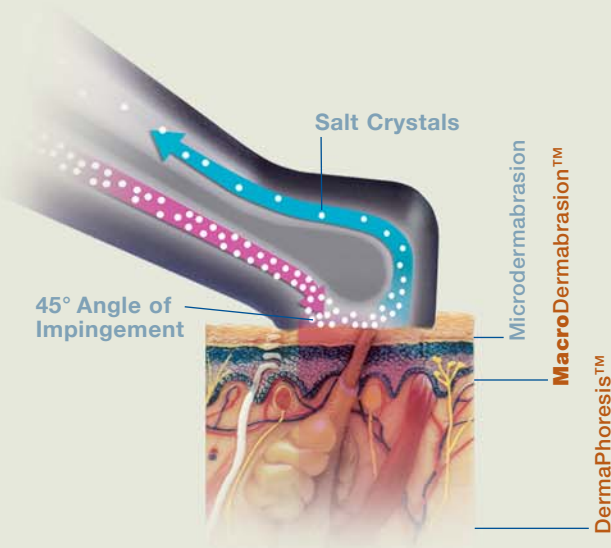

ORIGINAL

**MacroDermabrasion Therapy**

BEAUTY'S NATURAL INGREDIENT

## The Original Sodium Chloride-based Skin Rejuvenation System from Med-Aesthetic Solutions

More effective than conventional microdermabrasion, **Salt-A-Peel™ MacroDermabrasion Therapy** is the next step forward in dermabrasion technology. Our proprietary crystal delivery system uses water-soluble, non-toxic salt as a gentle, natural abrasive. Patients see immediate results, including healthier, smoother skin. And when followed by the patented DermaPhoresis™ ultrasound treatment, the benefits are even more dramatic. Patients enjoy longer-lasting results in fewer treatments with virtually no downtime.

### It's a Natural!

Salt-A-Peel MacroDermabrasion Therapy's advanced system of products work together to provide an effective, non-invasive approach to reduce the appearance of:

- Fine lines and wrinkles
- Sun damage
- Age spots
- Uneven skin tone
- Scarring
- Stretch marks

### Features and Benefits:

- Gentle abrasion of the skin with healing, non-toxic salt results in a smoother peel and boosts the clinical effects of skin repair.
- The MicroPro S10 MacroDermabrasion System with Smart Sensing™ Technology activates treatment when the handpiece comes into contact with tissue and turns off when the handpiece is removed.
- Adjustable positive pressure, not a vacuum, efficiently removes the topmost layers of skin (stratum corneum) without excessive flushing/redness (erythema), edema or trauma to the area.
- Larger areas of skin can be covered with fewer passes, minimizing discomfort and expediting treatment time.

## MicroPro S10 MacroDermabrasion System with Smart Sensing™ Technology

### Simple to use—Easy to maintain

- Water-soluble, non-toxic salt—not aluminum oxide—gently and effectively draws out impurities from the skin.
- Adjustable positive pressure reduces trauma to the treatment area.
- Low angle of abrasive impingement removes cells more efficiently with minimal discomfort.
- Digital Electronic Power Selection allows constant abrasive particle velocity, minimizing streaking and hot spots.
- Large 1 cm x 5 mm treatment area reduces individual appointment times and allows more treatments to be scheduled daily.
- Pre-packaged salt containers and disposable 0.1 micron ULPA Filter waste containers prevent potential cross contamination and handling risks.
- No-Clog technology virtually eliminates equipment downtime.

## DermaPhoresis for Healthier, More Vibrant Looking Skin

Combine proven ultrasound technology with antioxidant-rich MASTique™ Skin Care Products to greatly enhance skin renewal therapy. The MacroTouch® 3 MHZ Ultrasound treatment gently penetrates deep into the skin to deliver the MASTique Skin Care Masque, a proprietary formulation containing multivitamins, Alpha Hydroxy Acids (AHAs) and fibroblast stimulators, to improve elastin and collagen production.

## At Home Care

MASTique Skin Care Products are also available for use at home. These special, non-irritating formulations extend treatment benefits and help maintain smoother, softer skin.

Customer Care is a priority at Med-Aesthetic Solutions. We offer exceptional marketing and technical support with immediate response to all questions and concerns. Our warranty covers parts and labor for one full year from the date of purchase.

### Specifications:

#### MicroPro S10

Size: 16" W x 17.5" D x 14" H  
Weight: 50 lbs.

#### MacroTouch® 3 MHZ Ultrasound

Size: 9.5" W x 9" D x 4" H  
Weight: 4 lbs.

#### Cart

Size: 17" W x 22" D x 30" H  
Weight: 37 lbs.
