QUEUE SOLUTIONS
C series

JAYEX

C series is a modular Queue System. It directs the next customer to the first available room or counter. The call is made from a single button at each caller's location. The counter digit displays identify the caller's location. No tickets are required.

Display features:

- High contrast seven segment LEDs.
- 10 cm high for excellent visibility
- Integral power supply
- Integrated speaker
- Announcement bell
- Adjustable volume control
- Flush wall mounting
- pre-recorded voice announcement to say "Cashier number X please"
- Space for vinyl fixed lettering
- Painted case in any colour

Keypad functions:
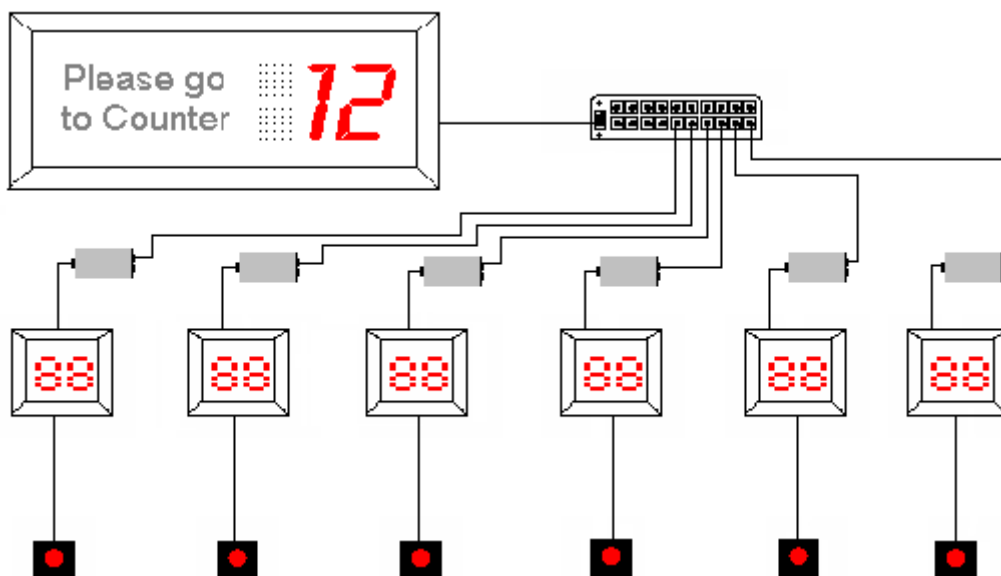

- Single button push to announce callers' location

Over counter display:

- Identify which counter has called
- Flashes to attract attention
- Clearly visible 10cm high digits
