

Signage

A professional digital signage solution

Use your own PC

**Design & schedule
bespoke content,
across multiple
displays in varying
locations**

Use the PICO mini PC

An array of content templates

Choose between a 42" or 55" professional display

CLOUD BASED SIGNAGE SOFTWARE

With Genee World's innovative digital signage solution you can plan, design and deploy digital content across an array of displays in different locations.

Just log in to Signagelive from your web-browser to upload, schedule and deploy your digital media. You will find all the tools you need to monitor and report on your digital signage players in one place, and there's no software installation required.

CREATE LAYOUTS AND BRANDING

With the Signagelive Layout Designer, creating multizone layouts can be done in minutes to a style that suits you. Embracing the wide range of design tools allows you to design your layout templates to a professional standard with your own branding.

Setting your own background image, custom layout resolution or schedulable zones that enable you to show your Playlists or RSS feeds could not be easier.

SIMPLE, POWERFUL SCHEDULING

After you have uploaded your media, created your playlists and designed your layouts, the simple step of publishing your media to your screens can be done in seconds. Signagelive provides you with a flexible publishing tool where you decide when the media should start and finish; whether that's as of now or any time in the future.

Publishing your media is made even simpler with the ability to publish media to all screens in one go.
