

Nickel-plated load chains

Grade DAT (G80) in accordance with standard EN 818-7

Grade V (G100) in accordance with standard EN 818-7

**KITO HOISTS** - Always on the safe side

Extract from the publication:  
Hebezeuge Fördermittel 48/2008

Impressive advantages .... ..  
that's what really sets you apart  
from your competitors. KITO is the  
only manufacturer worldwide that  
nickel-plates its load chain. This  
process of surface coating does not  
involve gassing because the nickel  
surface is permeable to hydrogen  
molecules. Nickel is well known  
for its resistance to salty air, water,  
diluted acids and most lyes.
