DEVOL MOULDING SERVICES

*Our continued
investment in new
technology keeps us
at the leading edge
of the injection
moulding industry*

INTRODUCTION

Devol Moulding services was established in 1972 and since then we have avoided the temptation of becoming trade moulders and concentrated our efforts on working within our customer base to develop components that are specifically tailored for their precise application.

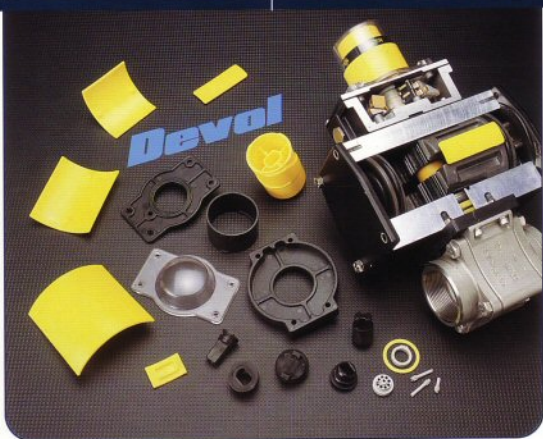

We have a unique understanding of engineering polymer technology, that when combined with our in-house design, manufacturing facilities and toolroom provides the perfect service to meet your moulding requirements.

There are few companies in the plastics industry that have the progressive outlook and vision to match today's exacting standards, Devol Moulding Services are one of those.

Devol specialise in highly engineered products offering complete project management solutions for moulded products from the conceptual design stage, prototyping, mould manufacture to reliable quality driven production moulding on time, every time.

COST EFFECTIVE MANUFACTURING

Devol Moulding Services will assist customers in reaching their return on investment faster by selecting the correct material grade and optimising component design.

The ability to carry out finite element analysis, mould flow dynamics, solid modelling and kinematic simulation allows us to validate that components within your assemblies fit together without fouling at the design stage - before any investment in tooling.

Application of these same techniques not only allows us to maximise new designs, but enables us to troubleshoot and improve existing componentry.

-  AUTOMOTIVE INDUSTRY
-  PROCESS CONTROL
-  OFFSHORE INDUSTRY
-  AGRICULTURAL
-  ELECTRONICS
-  DEFENCE INDUSTRY
-  CONSTRUCTION
-  MEDICAL

-  SOLID MODELLING

TOOLMAKING

Quality and commitment are the basis for successful, in house mould manufacturing.

Our highly trained and experienced workforce coupled with the latest technology in CAD/CAM and CNC equipment has earned our toolroom an enviable reputation for excellence.

Devol Moulding Services guarantee essential attention to the detail required to manufacture high quality moulds and tools. From these moulds we produce high performance products that reflect precisely our customer specifications:

**COST EFFECTIVE
PRICING POLICY**

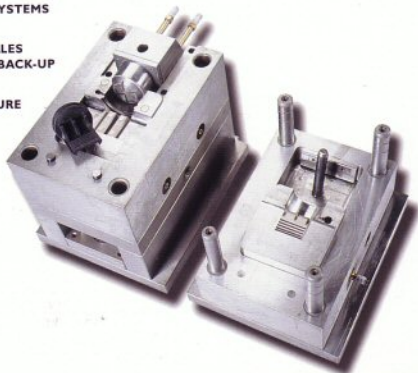

TOOL SAMPLE REPORTS

**COMPLETE DESIGN
AND MANUFACTURING
SYSTEMS**

ISO 9002 QUALITY SYSTEMS

**COMPREHENSIVE SALES
AND ENGINEERING BACK-UP**

ZERO DEFECT CULTURE

The background of the entire page is a close-up, high-angle shot of a large quantity of bright yellow plastic granules. In the lower-left foreground, a clear, empty plastic bowl is partially visible, resting on the granules. The lighting is warm and bright, creating a vibrant, golden-yellow atmosphere. The granules are small, cylindrical, and densely packed, filling most of the frame.

*Our continued
investment in new
technology keeps us
at the leading edge
