

Case Study

University of Leeds – Manton Building

This major refurbishment of newly listed building replaced all doorsets to create new research Laboratories and offices. Using NFR/FD30/FD60/FD90 doorsets including acoustic (43db) and PVC clad (Yeoman Shield) doorsets.

Noberne doors are compliant with technical specification of the client and architect. Including BS EN fire test evidence for Yeoman Shield doorsets supplied. The project was completed for Bam the main contractor.

The unique framed construction of the Noberne doors which offers integral strength to the doors and guarantees longevity of the doors with in this high use environment. For more information please contact our sales team.
