

Nearlygrass case studies

Children welcome year-round playground

When Anderton Primary School needed to redesign their outdoor play area, they decided to make the most of the area by asking Playrite to help them make it a year round option for the children. The existing grass area was much loved, but this also meant that it was well worn, causing problems with mud in wet weather. Anderton Primary School chose Nearlygrass 24 for the 120m² area. Giving the appearance of grass, whilst also providing a more usable area, year round, this new surface has proved hugely popular with the children already. Playrite Sales Area Manager Mark Waite said "Because the grass area was popular, the school didn't want to lose it, but with Nearlygrass 24, they didn't need to - so it suits everyone." This is just one of the Playrite products that offers an alternative to wood chips or grass.

Bouncing back with a beautiful lawn

Boisterous boys and a large trampoline are not good ingredients for any lawn. Endless outside play combined with the effects of the lack of sun to the lawn beneath the trampoline, resulted in a back garden with huge barren and worn patches. The lawn became no fun to play on and a real eyesore. The Clarke family needed a solution; Nearlygrass from Playrite provided the perfect answer. Nearlygrass 40 was chosen as it would provide a long lasting, durable result; the two tone fibres giving a very realistic lawn like appearance. Over the course of just one weekend, the old lawn was removed, the sub-base of sand prepared and levelled to provide the perfect base. Once unrolled and acclimatised the Nearlygrass 40 was laid into the contours of the worn out lawn. The result? A beautifully presented lawn which can be played on all year round. A perfect outside surface requiring minimal maintenance, freeing up time for trampolining!

If you are looking for a strong resilient surface that has all the best qualities of a lawn, without the heavy maintenance required, then look no further. The Nearlygrass range is resilient enough to handle the most rigorous children and family pets and the good drainage means that it can be situated close to water features or in areas that are known to be particularly prone to waterlogging. In addition to garden use, it is perfect for roof terraces and balconies, patios and terraces.

the perfect solution for a trouble free lawn

Perfect for roof terraces

Nearlygrass 15

Does your small roof terrace need brightening up? Maybe your patio could feel a little more welcoming? Then Nearlygrass 15 is your perfect choice. The short pile gives this artificial turf a natural 'spring' making it feel comfortable underfoot. And it's the spring green colour of this surface that gives it a realistic look and feel that immediately makes your small space feel like a contemporary urban garden.

Ideal for play

Nearlygrass 20

We know that children like to play – often with no consideration for the lawn they are playing on. This was the inspiration for Nearlygrass 20. This cost effective grass option is strong and resilient and will still have a quality look and finish after many football and cricket games. Much more than a sports surface, it has a medium pile height and rich colour that is very natural in both look and feel.

treat for families

Nearlygrass 24

Are you wanting to create a space to relax with the family, to share barbeques, play ball games, picnic on the lawn? Then we would recommend Nearlygrass 24 without hesitation. Stroke this grass with your hand, or walk on it barefoot, and you will notice its softness on your skin – perfect for rolling around with the dog. Yet this tightly tufted pile is a durable turf to withstand many years of constant use.

Looks great in gardens

Nearlygrass 40

If you want to really go to town on a realistic looking lawn, then this is the artificial surface for you. Nearlygrass 40 is a top quality artificial grass that's designed to make a bold statement in your garden. With its olive & avocado green colour this slightly longer turf is luscious and dense to give the look of an immaculately cut lawn. It is with dual height yarn that comes in two tones for a realistic look and feel.

Realistic in your garden

Nearlygrass 40 Beige

So you've been thinking about artificial grass, but want to feel confident that it's going to look and feel as realistic as possible? Then we'd like to introduce you to Nearlygrass 40 Beige. The two tone straight green yarn is combined with a textured beige yarn which is designed to mimic the colours, shape, structure and behaviour of natural grass, then produced with care to result in a lawn that even nature would be jealous of.

The ultimate for landscaping

Nearlygrass 40 Plus

The ultimate. The definitive. Nearlygrass 40 Plus is a garden designers dream. Inspired by nature, this artificial grass has a lush, dense and attractive finish that suits any number of design styles. Height and density of the grass are carefully matched and consideration has been given to traditional and more modern settings.
