System survey to assess current operation condition

Standard yearly service Contract covers callouts + 1 Maintenance callout

Maintenance checks (risk assessment site file included)

Service work resulting in Maintenance Callout

Call outs standard / privilege

Staff continuously receiving product training

Without effective maintenance cover, even the best equipment can deteriorate and with the absence of regular servicing a minor fault can turn into a major problem. Therefore PPM (Planned Preventative Maintenance) of your security system not only ensures that vital equipment will work when required (or when the need arises), it will also reduce or eliminate downtime, maintain high levels of performance but also enhances value for money by ensuring the system enjoys an extended life.

ClearView Communications offer a choice of standard service and maintenance agreements that can be tailor made to meet the needs of your system.

ClearView staff have the advantage of more than 40 years experience in video and communications, continuously leading the way in harnessing new technologies to provide their customers with innovative CCTV and security solutions. Digital System upgrades can be provided to ensure better quality images, easier storage/ access and less maintenance.

ClearView currently employ in excess of 30 qualified engineers within the Service and Maintenance Departments who are vetted under high level security guidelines and accreditation.

FAX-BACK REQUEST:- 01245 214 101
