## DVD Transcription Systems

High Performance hardware and software options

ClearView has developed a DVD replay system for easy transcription direct from interview DVDs as part of its PaceNet range of products.

The system is available in two formats - Hardware or Software..

Both systems allow foot-pedal function control of PLAY, PAUSE, REWIND and BACKSPACE. Backspace allows the operator to rewind the DVD a few seconds to check a phrase.

Headphones connect to the front of the transcription unit with front panel volume controls. An optional small 7" colour monitor allows the operator to see, as well as hear, the recorded interview.

For information on the complete PaceNet range of interview recording products available from ClearView please contact the Sales Office.

### Features and Benefits

Compact

Easy to Use

Adjustable precise footpedal control

Variable forward/rewind speed control

DVD/SVCD/VCD  
AVI/WMV/ASF/MPEG/MP4  
VOB (DVD Format)

Audio file playback

## **Software Transcription Features**

The software system can be operated by either the player interface using a keyboard and mouse, or via the supplied serial foot pedal.

The following playback functions are available from the player interface:

- ◆ Play,
- ◆ Pause,
- ◆ Stop,
- ◆ Next/Previous Chapter,
- ◆ Fast Forward/Rewind,
- ◆ Frame Advance/Reverse,
- ◆ Volume Up/Down,
- ◆ DVD root menu,
- ◆ Jump to point in video sequence.

The serial foot pedal can be customised to control the following playback functions:

- ◆ Play
- ◆ Pause
- ◆ Stop
- ◆ Scan Forward
- ◆ Backspace

The system has a built-in Word Processor for transcribing or alternatively off-the-shelf word processing packages like Microsoft Word can be used.

In addition to standard transcription controls, the system offers:-

- ◆ Variable replay speed fast forward and rewind x2, x4, x8, x16
- ◆ Chapter navigation
- ◆ Replay of still images and diagrams
- ◆ Volume control
- ◆ Software playback DVD/SVCD/VCD plus PC based video formats AVI/WMV/ASF/ MPEG/MP4/ VOB (DVD Format)
- ◆ Audio Playback MP3/CDA (Audio CD) WAV/WMA
