**PEDIGREE**

ClearView Communications Ltd is a leading Integrated Security Systems provider. We operate from a 20,000 sq ft premises in Chelmsford, Essex and employ over 75 staff. Formed in 1996, the company has grown year on year with an enviable track record and wealth of experience gained from dealing with all UK Police Forces and commercial companies such as Euro Tunnel and E-ON. We have developed many security industry firsts including "Intelimux" - the world's first universal CCTV demultiplexer.

**PHILOSOPHY**

Whether you need a fully integrated security solution, or an individual service, dealing with ClearView you can be assured the job will be completed to specification, time and budget. Working to industry standards, we are regularly praised for our attention to detail, openness and going "the extra mile".

**DESIGN**

With many years experience, our surveyors and designers will assess your needs. Whether you require advice on an existing system, a new design or an upgrade, our staff will be happy to help. Operating at the forefront of security systems design, we have the experience to advise you of the best technology. Whether it's a new/existing or single/multi-site operation, you can be confident that we will provide the most appropriate solution.

**PROJECT MANAGEMENT**

Each project is allocated a dedicated project manager who has the responsibility of keeping you informed of progress throughout the project life-cycle-from design, build, factory acceptance, installation, commissioning, training, site acceptance and documentation. Once complete, responsibility for the system is passed to ClearView's service department.

## **SERVICE**

Our service department works 365/24/7. We have engineers situated strategically around the country to offer 4 hour response if required. All staff are security cleared by the Metropolitan Police Service, CRB checked and NACOSS approved.

Pro-active service and maintenance is provided where engineers visit to check systems' performance outside routine preventative or emergency call visits. This helps predict likely weak points before failures are experienced.

## **EXPERTISE**

Areas of expertise include CCTV, Access Control, Alarm Systems, Gates & Barriers, Fencing, Fire Detection, Building Management, Intercoms, Public Address, TV Systems and Locksmith services.

## **CLIENTS**

We have undertaken numerous projects for local Government/Councils and many schools and education establishments nationally, including "Building Schools for the Future" projects.

Clients include:

Eurotunnel  
Smithfield Market  
The Forum, Norwich  
The British Library  
Kingsdale School (BSF project)  
Writtle Agricultural College  
Southampton Docks  
Welwyn Hatfield Council  
Basildon District Council  
Home Office  
HM Customs and Excise  
Health and Safety Laboratories  
All UK Police Forces
