## PaceNet Video Interview System

ClearView Communications has many years experience of manufacturing networked video systems to meet police needs.

### Features and Benefits

The PaceNet system consolidates this knowledge to provide systems which comply with the latest Criminal Justice, British Standards, PACE and HOSDB guidelines in a format which is easy to use, secure and reliable.

Lightweight and Compact recorder

Fixed and Mobile applications

Stand-alone or Networked Configurations

Only 2 operator controls - RECORD & END INTERVIEW

Instant email of recording and transcript

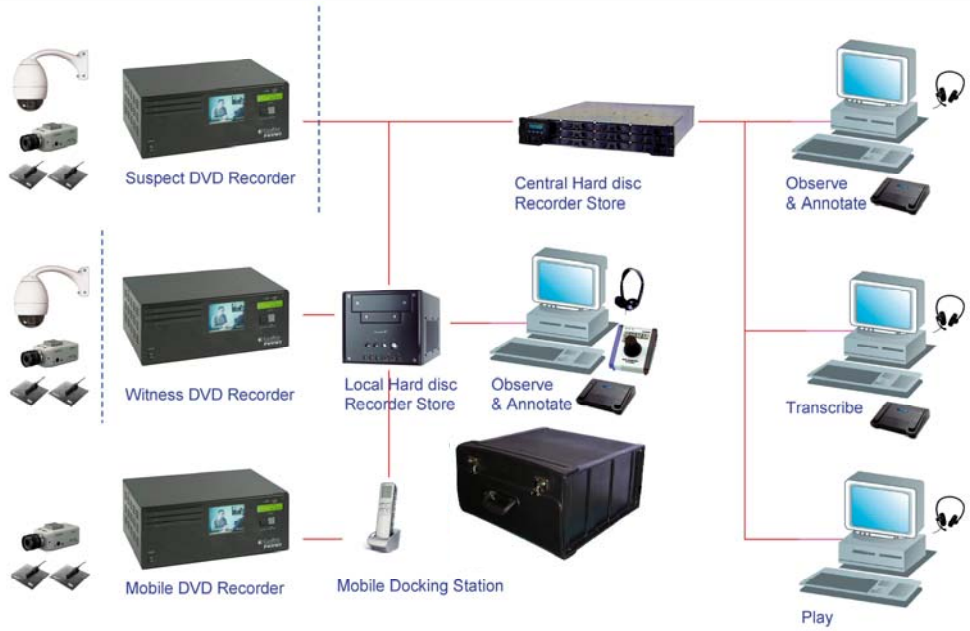

Secure central storage

Standard "high street" (.vob) format

Transcription via DVD player or PC

Systems for suspects, witnesses & children

Annotate recordings live or on replay

- ◆ Compact video interview recorder with two controls "RECORD, END INTERVIEW".
- ◆ Secure central storage of video and/or audio interview recordings.
- ◆ Interview room download of up to three DVD-Video format discs.
- ◆ Transcription of video and/or audio from networked or stand-alone PC.
- ◆ Configurations available for suspect, children and witness recording.

Many facilities within a modern police premises can now be connected via standard computer IP networks. There is a general convergence of security, IT and telecommunications technologies which means that all systems can now communicate over the same IP network infrastructure.

This brings specific benefits to video and audio interview recording including:

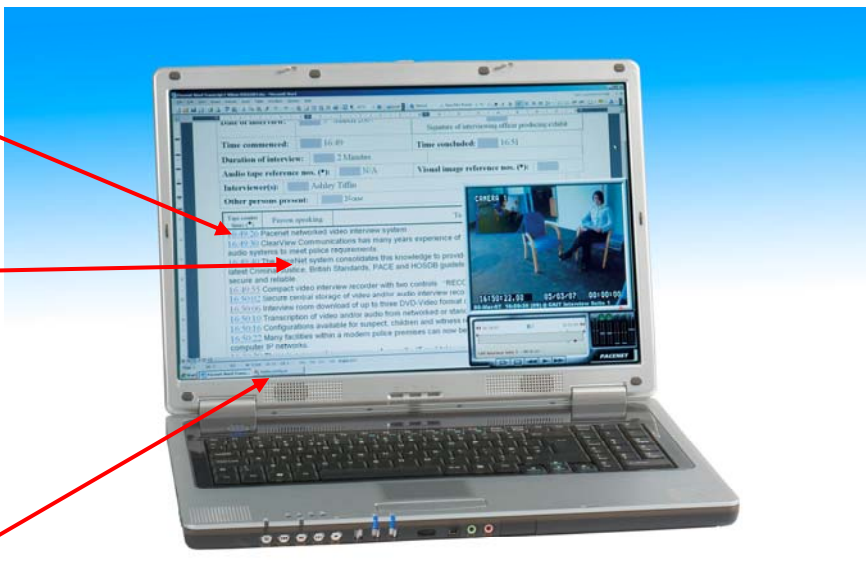

- ◆ Secure central back-up of recordings.
- ◆ Movement of recordings via the network without the need to bag and transport media physically.
- ◆ Storage of recordings and transcripts at the same location.
- ◆ Live monitoring of interviews from any authorised networked location.
- ◆ Audit log of all activities associated with every interview.

PaceNet uniquely allows officers to make notes which are linked to the video/audio recording both during an interview, or when replaying an interview recording. These may be in the form of comments, or a full written transcript. Short-cut keys are available to enable the officer or transcription typist to automatically insert the real time into the annotated notes or transcript. When reviewing the notes, the relevant section of the interview can be replayed instantly from a single mouse click.

Instantly find relevant video sequence by simply mouse-clicking time link

Search and retrieve section of recording from keyword

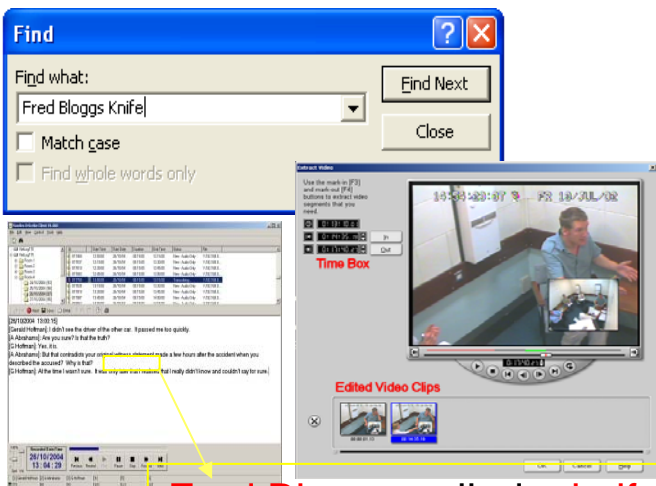

Annotate and review live video - or previous video footage recorded minutes or hours before

### Data Search of Transcriptions and Annotated Notes

### Physical

Dimensions : 346W x 178H x 223D mm  
 Weight : Dual deck : 4.2 kg
