Features and Benefits

Auto-code detection of digital CCTV and video formats

Plays DVD-/+/RAM, CD, digital stills media and floppy disc

Fire wire, USB, STEREO audio, LAN, parallel port

Audit trail

Saves images to Database

VuePrint is a low-cost digital video workstation developed to enable police staff to easily view, digital CCTV video and then print images of interest.

VuePrint currently supports more than 120 CCTV players. The software is regularly upgraded with new formats and codes, existing player upgrades and new user functions.

The system has been designed for non-technical operators. Once media has been inserted into VuePrint, the video or still image file is automatically detected (if supported) allowing replay on screen.

VuePrint utilises ClearView's proprietary video player developed specifically for surveillance CCTV video replay. Standard video files can be played with full control over replay speed (x0.1-x10) and frame by frame advance.

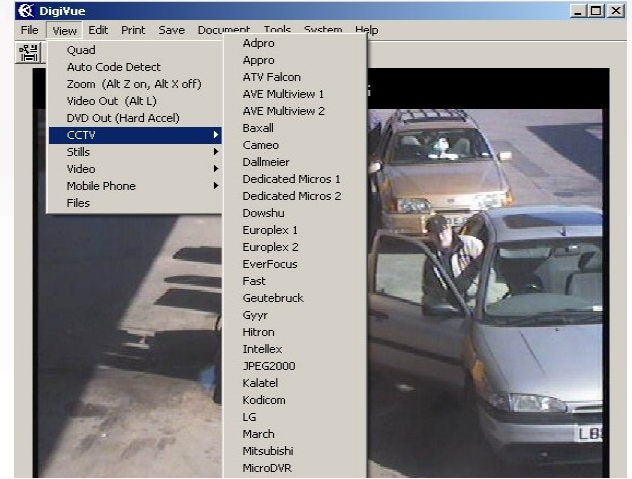

All functions are accessed from the main VuePrint control screen which offers icons for instant print or save of selected image area.

Images from CCTV and video footage may be easily integrated into standard MS Office documents like word, excel, PowerPoint and publisher since these programs are all integrated within VuePrint. integrated within VuePrint.

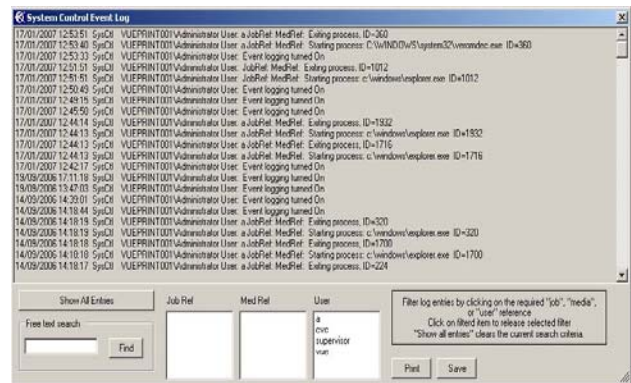

Automatic Detection and Play of Digital CCTV and Video formats

An “Auto Code Detect” facility is available for digital CCTV and standard video formats. Simply insert the digital media - VuePrint will automatically search and display the video file.

In addition to CCTV, VuePrint has facilities for playing standard DVDs (including video interviews) and digital camera stills.

An audit trail logs system operations by user, time and date. Access to specific functions may be controlled by username and password.
