COMPUTER ENCLOSURES

LPCB Tower & Desktop Enclosures

- **LPCB tested and approved**
- **Insurance and police recommended**
- **Made to measure to suit most tower and desktop computers**
- **Computer use unimpeded as front and rear are accessible**

T-T 419LZ

The T-T 418 and T-T 419 series of security enclosures are the only ones to be accredited by the Loss Prevention Certification Board (LPCB) and are recommended by all major insurance groups and police forces throughout the UK. The LPCB approval required the enclosures to be independently attack tested and suggest that these are the most secure enclosures available.

To gain access to the enclosures the front plate is removed allowing quick and easy access when required, making these enclosures suitable for the protection of computers in confined areas whilst still offering continuous 24/7 protection against theft. Ventilation slots on both sides of the enclosure help to prevent the contents from overheating. Individual or suited key options available.

The 418L tower enclosure can be floor mounted while the T-T 418LZ is designed to be mounted under a Top-Tec Secure Desk.

The T-T 419L desktop computer enclosures can be mounted on the floor or on top of a desk. The 419LZ can be mounted under a Top-Tec Secure Desk.

The purpose built T-T 418 and T-T 419 enclosures can be produced to suit most tower or desktop computers in the size range below. If your computer is outside of these sizes, please contact us to see if we can design a special to suit your requirements.

T-T 418LZ

Code	Mount Type	Computer Size Range (mm)			Approx, Overall Dimensions (mm)

Heavy Duty Tower and Desktop Enclosures

- **T-T 460/2 has been LPCB tested and approved**
- **Unique fully adjustable enclosures to suit most tower and desktop computers**
- **Re-usable when computer changes**

These unique, fully adjustable security cages for tower and desktop computers have proved to be one of the most popular models in the Top-Tec range.

Easily adjustable, they suit most tower and desktop computers, often negating the need to purchase new cages when upgrading or changing computers.

The T-T 460/2 unit has been tested and approved by the Loss Prevention Certification Board (LPCB) and is recommended by all major insurance companies in the UK.

The T-T 430 and T-T 460 ranges offer 24/7 protection and unimpeded use. The unit is extremely versatile and the T-T 460 can be wall mounted on its side for use with mini-towers. Individual or suited key options available.

Code	Enclosure Type	Computer Size Range (mm)			Approx, Overall Dimensions (mm)

T-T 430

T-T 460

LPCB Accreditation Products that have been accredited by the Loss Prevention Certification Board (LPCB) have undergone numerous independent attack tests. This ensures that they can withstand physical attack, thus simulating an alarm situation and allowing time for security forces to react. Many insurance companies and police forces recognise and recommend LPCB approved security products.

COMPUTER ENCLOSURES

Quick Release Tower and Desktop Enclosures

- Fully adjustable cage suits most tower and desktop computers
- Quick release allows fast and easy authorised access
- Computer use unimpeded
- Bolts securely to the desk or floor

These budget versions of the T-T 430 and T-T 460 series incorporate push button quick release locks to allow faster and easier access to the computer. Fully adjustable and designed to accommodate most types and sizes of tower and desktop PCs, they offer 24/7 protection and unimpeded use.

These enclosures are extremely versatile and the T-T 360 can also be wall mounted on its side for use with mini-towers.

Individual, suited or mastered key options available.

Code	Mount Enclosure Type	Computer Size Range (mm)			Approx, Overall Dimensions (mm)		
		Width	Depth	Height	Width	Depth	Height
T-T 330/1	Tower Floor	80-110	220-570	200-370	PC + 62	As PC	PC + 62
T-T 330/2	Tower Floor	180-310	355-700	320-615	PC + 62	As PC	PC + 62
T-T 330/3	Tower Floor	110-180	255-700	320-615	PC + 62	As PC	PC + 62
T-T 360/1	Desktop	210-365	220-500	60-100	PC + 62	As PC	PC + 62
T-T 360/2	Desktop	275-500	355-700	100-185	PC + 62	As PC	PC + 62

Please note that the T-T 330 range is not suitable for fitting to a desk frame beneath the desktop. For further details please contact us.

Tower and Desktop Total Enclosures

- Made to measure to suit all sizes and types of computers
- Provides data and access protection
 - Totally encloses computer to prevent theft and accidental damage
 - Bolts securely to a desk or to the floor

The ultimate deterrent, total enclosures that protect computers and prevent unauthorised access.

The Top-Tec total enclosures completely cover the computer preventing all unauthorised access. This high security solution is particularly suitable for file servers and PC's that require data and access protection. The design incorporates ventilation slots in the sides to help to avoid overheating.

The only access to the computer is via a lockable security door that will allow legitimate access to the PC when required. The tower and the desktop models are both made to measure to suit your own computer dimensions.

The T-T 504Z are designed to fit under a Top-Tec secure desk while the T-T 504 and the T-T 505 can be mounted onto the desk or directly to the floor.

Code	Description	Computer Size Range (mm)			Approx, Overall Dimensions (mm)		
		Width	Depth	Height	Width	Depth	Height
T-T 504Z	Tower Desk Total Enclosure	Most sizes available - made to measure			PC + 30	PC + 93	PC + 74

T-T 505	Desktop Total Enclosure	Most sizes available - made to measure			PC + 71	PC + 93	PC + 32

Individual or suited key options available.

COMPUTER ENCLOSURES

Economy Tower and Desktop Enclosures

- Can be customised to suit peripherals such as CD drives or external hard drives
- Made to measure to suit most tower and desktop computer sizes
- Helps prevent chip theft and tampering
- Computer use unimpeded

The T-T 408 Tower Enclosure and T-T 409 Desktop Enclosure are entry level security enclosures that do not compromise the quality of protection. Like all Top-Tec security cages the unit offers 24/7 security against the theft of equipment and internal components.

Manufactured from 3mm sheet steel, the T-T 408 and T-T 409 series can be produced to suit most sizes of tower or desktop PC. The computer is fitted and removed through the rear of the unit, therefore requiring additional clearance space to the rear when positioning the enclosure.

Individual or suited key options are available.

T-T 408

T-T 409

Code	Description	Computer Size Range (mm)			Approx, Overall Dimensions (mm)		
		Width	Depth	Height	Width	Depth	Height
T-T 408	Economy Tower Enclosure	Most sizes available - made to measure			PC + 36	PC + 68	PC + 32
T-T 409	Economy Desktop Enclosure	Most sizes available - made to measure			PC + 20	PC + 68	PC + 17

APPLE MAC SECURITY

Mac Pro Tower Enclosure

- Unique fully adjustable enclosures suitable for Apple Mac Pro models
- Designed to complement the style of Apple Mac computers
- Computer use unimpeded

The T-T 439/B is highly effective in safeguarding your valuable Apple Mac Pro computer. As with all Top-Tec security enclosures, these units offer 24/7 protection without impeding the daily use of the machine. Full access is available at the front and the back of the computer as required.

The enclosure is adjustable which allows it to be re-used should the size of future models change. A range of colours is available to suit your preferences. Protect your valuable computer and the data contained within with this secure Top-Tec enclosure.

Individual or suited key options are available.

T-T 439/B

Code	Description	Computer Size Range (mm)			Approx, Overall Dimensions (mm)		
		Width	Depth	Height	Width	Depth	Height
T-T 439/B	Mac Pro	180-260	255-570	400-480	PC + 62	As PC	PC + 62

iMac Secure Bracket

- Models available to suit 20" & 24" iMac's
- Supplied with high security locking bar
- Optional memory security
- Bolts securely to your desk

This ingenious bracket is fixed to your desk by bolting through the work surface and into the two steel strips that are supplied. A high security locking bar then secures your iMac screen and stand onto the bracket. The keyboard can also be secured by running the keyboard lead behind this security bar before locking into place. Nothing is left to chance and there is also an optional guard to protect the memory slot from unauthorised access.

T-T IMAC-G5-20

Code	Description	Suitable for
T-T IMAC-G5-20	iMac Secure Bracket	20" iMac
T-T IMAC-G5-24	iMac Secure Bracket	24" iMac

Individual, suited or mastered key options available.

LAPTOP SECURITY

LPCB Laptop NightSafes

- **LPCB tested and approved**
- **Insurance and police recommended**
- **Ideal for overnight storage of valuable equipment**
- **Can be multi-stacked and bolted to the wall, floor or sturdy furniture**

The first and only laptop storage equipment that has been approved to LPS 1214 category II.

The T-T 541 series of NightSafes offer an ideal solution for storing laptops, digital cameras, mobile phones and other valuables securely overnight. Thieves are known to go for valuable, easy pickings and these NightSafes serve as an excellent deterrent.

The Top-Tec NightSafes were the first laptop protection equipment to achieve Loss Prevention Certification Board (LPCB) category II testing approval, which underlines the quality and effectiveness of these safes.

They are available as a standard option or with charging holes (-CH) which give cable access for overnight charging of laptops while they are securely stored. Internal capacity - 93mm (w) x 330mm (d) x 430mm (h) – thus allowing widescreen laptops to be securely stored. Individual or suited key options are available.

Code	NightSafe Type	(mm)			Nett Weight (kg)
		Width	Depth	Height	
T-T 541/3	3 bay	340	370	570	42
T-T 541/4	4 bay	440	370	570	52
T-T 541/5	5 bay	535	370	570	61
T-T 541/6	6 bay	630	370	570	71
T-T 541/7	7 bay	730	370	570	81

For charging holes please add -CH to the end of the Code

LPCB Accreditation Products that have been accredited by the Loss Prevention Certification Board (LPCB) have undergone numerous independent attack tests. This ensures that they can withstand physical attack, thus simulating an alarm situation and allowing time for security forces to react. Many insurance companies and police forces recognise and recommend LPCB approved security products.

Laptop Desktop Security System

- **Suitable for widescreen and standard laptops**
- **Enables normal use of the laptop**
- **360° rotation of laptop**
- **Offers 24/7 protection**

Protect laptops from opportunistic theft while they are left unattended. This Top-Tec security system secures single laptops to a desktop. The laptop is held by a custom built bracket that provides sufficient security to allow the user to be away from their desk for periods of time. The system comprises of a base plate, an adjustable security bracket and a security cover. Collectively these offer protection for your laptop during the day and throughout the night.

The bracket and the cover are interchangeable and lock into the same base plate. Access holes at the rear of the security cover enable overnight charging. The T-T 523 laptop desk security cover has been designed with ease of use in mind and locks into the T-T 520 base plate. Reduce the risk of losing your valuable laptop with this unique laptop security system.

Individual or suited key options are available.

Code	Laptop Security Description	External Dimensions (mm)		Laptop Dimensions (mm)

TFT SCREEN SECURITY

Jupiter Universal Flat Screen Brackets

- Universal mounts to suit all TFT screens with 75mm or 100mm VESA centres
- Height, swivel and tilt adjustment
- Fitted with high quality locks
- Suitable for screens up to 19"

The innovative and flexible design of the Jupiter range of TFT flat screen brackets offers a high resistance to theft. Aesthetically pleasing, both models provide tilt and 360° swivel, with the additional benefit of height adjustment on the Jupiter Trio.

They are very simple and quick to fit using the fixings supplied. The bracket is secured with two bolts through the desktop and into the strong steel plate underneath. A mounting bracket is fixed to the rear of the TFT screen and the cover plate prevents access to these fixings. The TFT screen is then secured in place with a high quality lock, helping to prevent unauthorised removal.

Once installed the flexible design will allow the setting of the swivel adjustment, tilt and optimum height to suit, depending on which model is chosen. Therefore, you have the option to adjust the tilt to avoid glare and to set the correct ergonomic height for individual users.

They are suitable for all TFT screens with 75mm or 100mm VESA centres on the rear and this universal fit means that they can be re-used when you renew your TFT screens in the future.

Individual, suited or mastered key options available.

Code	Tilt	360° Swivel	Height Adjustment
T-T 485-V2	✓	✓	
T-T 485-V3	✓	✓	✓

T-T 485 Universal Flat Screen Brackets

- Universal mounts to suit all TFT screens with 75mm or 100mm VESA centres
- Height, swivel, tilt adjustment and focal length adjustment options
- Built-in security for keyboard and mouse
- Suitable for screens up to 19"

These are a more traditional range of TFT Brackets that have all the security features of the Jupiter range. You have a choice of four models that provide tilt only, swivel and tilt, height adjustment, swivel and tilt or focal length adjustment, height adjustment, swivel and tilt.

The T-T 485-U4 with focal length adjustment is very useful when complying with DDA regulations by allowing the screen to be moved closer or further away to suit varying sight requirements.

All four models also incorporate built-in protection for your keyboard and mouse by securing their leads through the baseplate. Additionally, this baseplate can be used for storage of keys and other small valuables under the cover and locked away from sight.

Individual, suited or mastered key options available.

PLASMA & LCD SCREEN SECURITY

T-T 485-Y Universal Plasma & LCD Mounts

- Suitable for 23" to 60" Plasma and LCD screens
- Three position tilt
- Simple installation
- Robust, heavy duty design

These fully adjustable Universal Plasma & LCD Mounts will fit all large screen LCD and Plasma monitors (23" to 60"). Developed in conjunction with major AV installers, they have been carefully designed for ease of use and are very simple to install.

The mounting bracket forms two sections - an external mounting frame that attaches to the wall and an internal frame that is first attached to the flat panel screen. The supports on the internal frame are adjustable to fit most Plasma and LCD screens. When the interior frame is combined with the exterior mounting frame the screen is secured with two hardened, anti-drill security locks. This specially developed flat panel mount maximises security and minimises the threat of theft.

T-T 485-Y02 &
T-T 485-Y01

Individual or suited key options are available.

T-T 485-X Universal Plasma & LCD Mounts

- Suitable for 23" to 60" Plasma and LCD screens
- 10° tilt
- Simple installation
- Drill resistant locks

T-T 485-X01

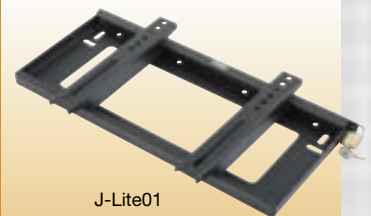

The T-T 485-X Universal Plasma & LCD Mounts have all the benefits and advantages of the T-T 485-Y range, with the additional benefit of a tilt up to 10°. The clever positioning of the two drill resistant locks supply the extra tilt and this tilt provides more opportunity to select the best position and to reduce glare.

They are universal and will fit all large screen LCD and Plasma monitors (23" to 60").

Individual or suited key options are available.

Jupiter Lite Plasma & LCD Mounts

- Fully adjustable mounting arms
- Secures 23" to 60" plasma and LCD screens
- Simple installation

J-Lite01

A range of fully adjustable Secure Plasma Mounts that have been designed to fit 23" to 60" screens. These are economical, entry level mounts with security, offering a fixed vertical position.

Simple to install, this mount consists of an exterior frame that is secured to the wall and two adjustable mounting arms that are fixed to the back of the screen. The mounting arms are then placed inside the exterior frame and a locking security bar is fitted to help prevent unauthorised removal of the screen.

Individual or suited key options are available.

Code	Universal Plasma & LCD Mount to suit screens	Overall Max Dimensions (mm)	Maximum Plasma Mounting Centres (mm)	Wall Fixing Centres (mm)
