- Capability to attach monitor brackets and projector mounts to top surface

Patent Pending

Adjustable height, width & depth

Top-Tec Neptune Cabinets

This 19" universal secure rack system represents a revolutionary approach to storing both computer and multi-media devices alongside rack mounted equipment.

Design

Developed in conjunction with industry specialists and end users, the Neptune cabinet's ground breaking design more than exceeds the expectations set by traditional 19" rack systems.

Height adjustable shelves are complimented by fully adjustable side and back stop brackets. This gives Neptune cabinet users the distinct advantage of being able to safely secure both rack mountable equipment and other forms of ICT, AV and multi-media equipment, including computers, DVD players, amplifiers, PDU's, blade servers and projectors.

Also, available to fit all Neptune cabinets, are easy to use lockable back panels which help prevent unwanted or accidental tampering of equipment without impeding user access.

Rear Security Bar

Optional Anti-Tamper Back Panel

Flexibility

With models available to store from 6 to 48 U's, the Neptune cabinet has been created for use in a number of areas, be it traditional IT and multi-media outlets such as clubs, cinemas and server rooms, or to meet the growing need for rack systems that are able to act as lecterns and media desks.

Anti-Theft

The height of the front door aperture can be selected to suit individual access requirements while still securing all the equipment, standard aperture is 50% of the usable height.

The Neptune cabinet incorporates high quality locks and a rear security bar that doubles as a cable management device.
