TOP-TEC
FURNITURE

SECURE DESKING

Deter thieves and radically reduce the risk of burglary. Top-Tec physical security products are the strongest, most robust and effective available.

Flexible: can accommodate current and future technology

Durable: the most robust secure desks available

Versatile: built-in security enables easy room layout changes

Secure, Stylish

Top-Tec innovative desk solutions combine style, functionality and security. With physical security incorporated in the design, Top-Tec secure desks protect towers, desktops, laptops and monitors from theft. The security entrapment houses the computer and attaches to the desk framework. Secure brackets are discretely but firmly fastened to the workstation surface, preventing monitor theft. With all the usual functionality of regular workstations, Top-Tec secure desks are stylishly designed and provide high-level security for computing devices.

Secure desks radically reduce the risk of theft. Most entrapments are approved to LPCB standard- the industry benchmark. LPCB approval provides peace of mind and confidence that our products will withstand physical attacks, therefore protecting the equipment held within. Secure desks can be utilized for any workspace, however they are most valuable in public access environments.

Key Security Feature

All desks are designed with a unique steel security feature that runs across the width of the desk. The enclosure and all associated security devices are then attached - giving maximum levels of protection.

Discrete, Operational Cable Management

- Desktop cable access ports as standard
- Access to power supply via special openings at the rear
- Sliding top desks have unique cable management system

Tailored to Your Requirements

- Frames are available in black, dark grey, silver or mid brown
- Desktops come as standard in beech veneer plus maple or oak as non-standard
- Wide range of sizes: depths of 600 - 900mm; widths of 800 - 2400mm
- Resilient, hardwearing finish

Whether you need lower desks for junior use, standard height desks, desks for disabled & wheelchair access or workstation height desks - we have an option to suit your requirements.

Physical Security 24/7

Secure desks provide a secondary level of security for your organisation. In the event of a break-in, responses to alarm systems are too slow to prevent burglaries and access control systems have their limitations- intruders can tailgate legitimate personnel to gain access. Secure desks deter opportunist theft, making it difficult to steal equipment. The physical security elements in Top-Tec desks essentially slow down a burglary to the point where it is no longer feasible. With no time to penetrate high-level security they cannot remove the computing equipment.

Locks

Entrapments are locked with sophisticated push-button or key operated locks. Keys can be suited to facilitate simple network management.

Data Security

Protecting computer-based data is a major issue, especially with data protection laws and ease with which electronic information can now be distributed. Secure desks ensure that data is much less likely to be lost in the event of a burglary, or even taken from an organisation internally.

LPCB. Secure, Certified

With a choice of two computer entrapments approved to LPCB (Loss Prevention Certification Board) standards, you can be assured that the secure desk has the highest level of security possible. Resilient, durable and reliable, Top-Tec entrapments are the most robust available and offer the safest solution when combined with our secure desks.

Access You Control

Set different levels of user access. Complete enclosures prevent any access and partial enclosures enable limited access to disk drives, power or reset buttons. Computer hardware and peripherals are securely locked.

FREE ESTIMATE AND DESIGN SERVICE

concept... planning... design... logistics... manufacture... delivery... installation

The Process - a Consultative Approach

Planning a large scale workspace installation is an overwhelming task, especially logistical aspects such as layout planning, identifying technology needs, access requirements, power supply and cable management. With the benefit of extensive experience Dalen can undertake this process. Working closely with clients through each step from concept right through to installation, Dalen delivers a fully functioning secure environment

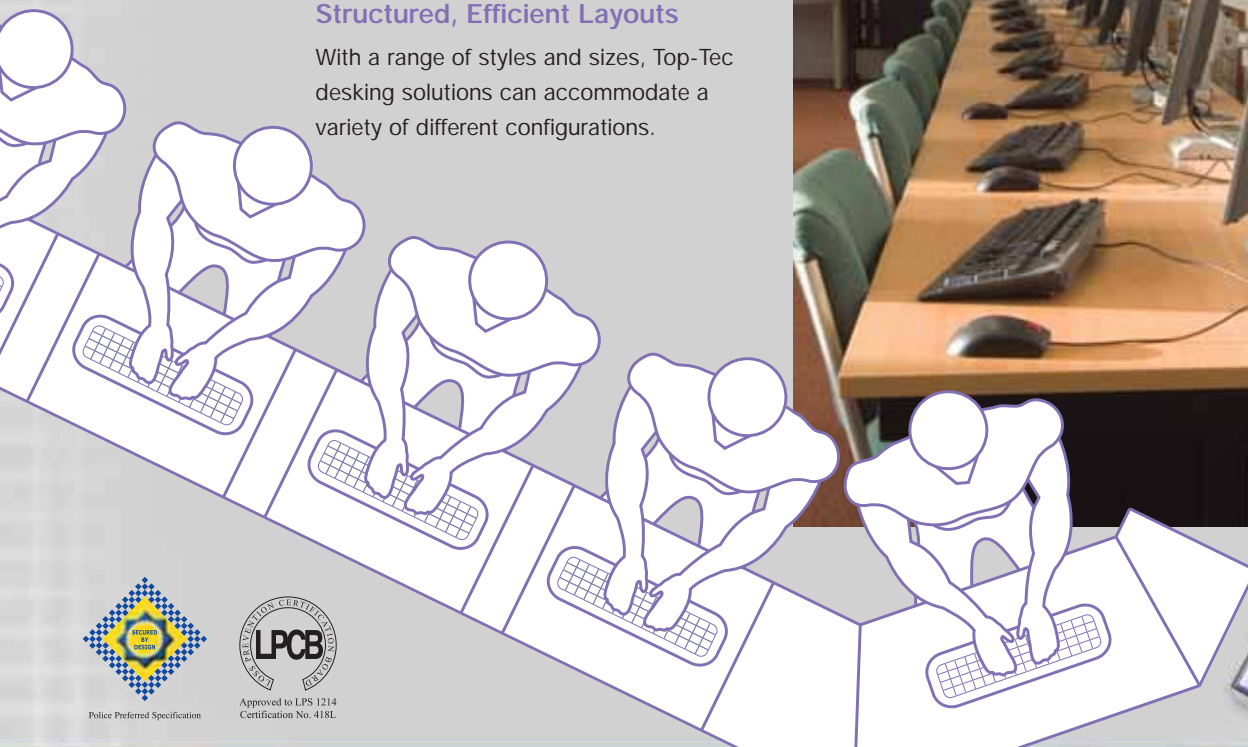

Dalen consultants offer a straightforward no-nonsense approach, a one-stop service for securing desking needs.

Structured, Efficient Layouts

With a range of styles and sizes, Top-Tec desking solutions can accommodate a variety of different configurations.

Step-by-Step Support

Dalen help define furniture and security requirements, take into consideration various factors and provide invaluable advice on alternative layouts, creating a solution to suit every organisation's unique requirements.

TOP-TEC
FURNITURE

VENUS DESKS

Secure public access environments
 Reduce probability of opportunistic theft
 Control level of user access

Secure desks radically reduce the risk of theft. They allow safe, unsupervised use of ICT equipment in public access areas and opportunistic theft is reduced as computers and monitors can be secured.

Total Security

Venus desks are specially designed with an integral security panel providing maximum security, whilst the welded tubular frame ensures rigidity and stability. PC's can be protected by a solid steel computer enclosure that is bolted to the security panel and frame. TFT screens can be secured to the desk by a monitor bracket that also provides keyboard and mouse security.

Venus desk with Hanging drawer unit (see page 10)

Flexible Design

All desks are made to measure and a wide range of desk sizes is available to suit your particular room plan. The frames bolt together to create a continuous work surface and Venus desks can be combined with any of the other desks from the Top-Tec range. Every desktop comes complete with two cable access ports as standard.

WAVE FRONTED DESIGNS ALSO AVAILABLE

Security Options

Venus desks only become secure when combined with computer enclosures and monitor brackets which are available as optional extras. Top-Tec computer enclosures are offered in a range of styles and sizes, and can be fully enclosed to ensure that the PC can't be tampered with or, more usually, partially enclosed at the front and back to allow access to cables, ports and disc drives etc, please see page 11 for further details. Computer enclosures can be added to either side of the desk allowing left or right-handed use. This combination provides 24 hour security and use, without the need for a key.

Venus desks can be ordered with or without any associated security devices - please see pages 10 & 11 for details.

MARS DESKS

Option of fixed or sliding desktop

Unique integral security panel

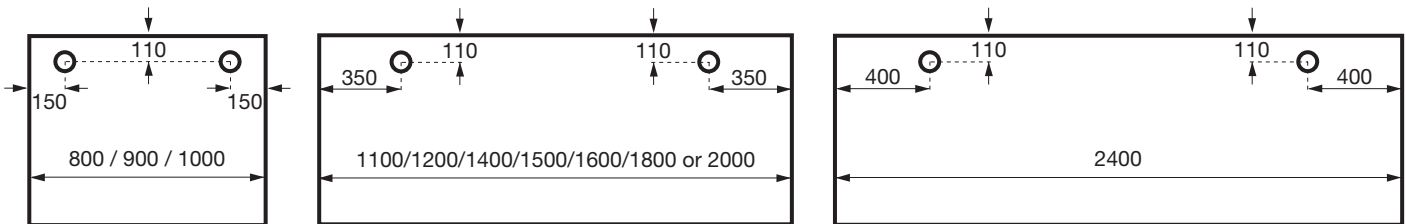

Comprehensive range of ICT security options

Top-Tec Mars desks have all the features and advantages of the Venus desks but with an alternative leg configuration to suit your individual requirements or preferences. They are also available with the option of either a fixed or a sliding desktop.

The sliding desktop provides improved access to cable management. The desktop slides forward smoothly to reveal a built-in cable tray. All cables can then be placed along the tray to ensure that cables are kept tidy and do not cause an obstruction under the desk.

The cable access ports for Venus and Mars desks are placed at various positions depending on the desk size. Please see diagrams for details -

TOP-TEC
FURNITURE

VENUS CLUSTER DESKS

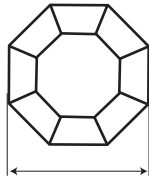

Increase room layout options

Choice of 45° or 60°

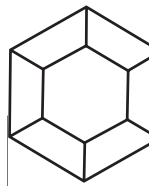

Combine with standard desks

Flexible Design

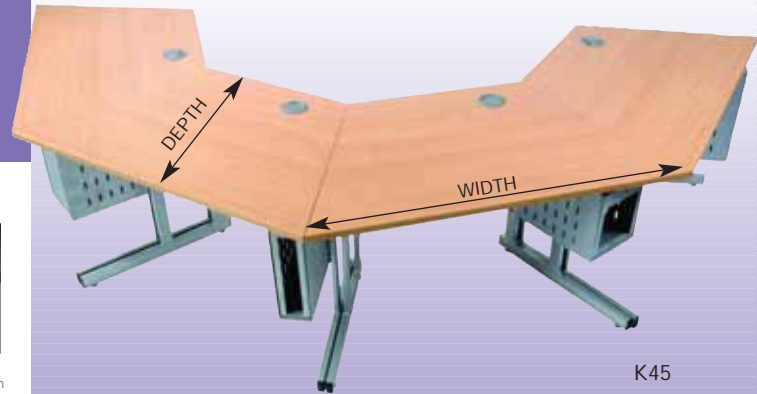

Venus Cluster desks are available in two sizes as standard and with a choice of 45° or 60° angled desktops. The 45° angled Venus Cluster desks can be shaped into an octagon, whereas the 60° angled desk can be shaped to form a hexagon. The Venus Cluster desk allows you to enjoy high security protection and the flexibility to manoeuvre desk furniture as group work, meetings or modern teaching environments demand. When a set layout is desired, desk frames can be bolted together, or alternatively if furniture is to be moved regularly Top-Tec can provide castors as an option. Desk sizes could also be adapted pending consultation.

VENUS CORNER DESKS

Maximise space in awkward corner areas

Create more effective room layouts

Provide additional secure ICT workstations

Secure Venus Corner desks have all the benefits of standard secure desks, such as helping to prevent ICT theft and reducing the risk of vandalism. However, they also provide a solution to deal with awkward corner areas where space is often wasted. Designed specifically to fit into the corners of a desk arrangement, Venus Corner desks maximise otherwise obsolete space. Using Venus Corner desks creates a more effective layout enabling the full use of the space available.

Computer enclosures can be added to either side of the desk allowing left or right-handed use.

Total Security

Venus Corner desks are specially designed with an integral security panel providing maximum security, whilst the welded tubular frame ensures rigidity and stability. PC's can be protected by a solid steel computer enclosure that is bolted to the security panel and frame. TFT screens can be secured to the desk by a monitor bracket that also doubles as keyboard and mouse security.

Flexible Design

All desks are made to measure and a range of desk sizes is available to suit your particular room plan. The frames bolt together to create a continuous work surface and Corner desks can be combined with any of the other desks from the Top-Tec range.

Security Options

Venus Corner desks only become secure when combined with computer enclosures and monitor brackets which are available as optional extras. Top-Tec computer enclosures are offered in a range of styles and sizes, and can be fully enclosed to ensure that the PC can't be tampered with, or partially enclosed at the front and back to allow access to cables, ports and disc drives etc, please see page 11 for further details.

This combination provides 24 hour security and use, without impeding access.

TOP-TEC
FURNITURE

VENUS VERSATILE DESKS

Converts from a desk to an ICT workstation in seconds!

Provides flexibility and high-level ICT security

Create truly, multi-functional rooms

Electrically operated

Increasing demands on space and the need to have regular access to ICT have created a requirement for multi-function workstations. The Venus Versatile desk, capable of transforming from regular desk to ICT workstation in seconds, is an innovative space-saving design and the latest addition to our secure desk range. Integrating technology into the desk design provides both convenient ICT access and high-level security. The Venus Versatile desk is a strong robust solution and among the most secure of the multi-purpose desks that are currently available.

flexibility required to deliver modern lessons utilising the latest techniques and all of the available resources.

Private business and public sector organisations also gain significant advantages from versatile desking. Used in corporate conference rooms, training centres or offices in response to hot-desking for flexible and mobile workforces,

Greater Versatility

The education sector use Venus Versatile desks to enhance the learning process where improved communication and greater interaction are important benefits. Venus Versatile desks make the most efficient use of space - many educational institutions with buildings not originally designed to accommodate technology are realising the strain on resources. Constraints such as limited space mean that one classroom is often used for several purposes. Computing technology has become standard in most subject areas and Venus Versatile desks enable access to ICT, creating the

Venus Versatile desks provide this versatility. Libraries, NHS, councils, leisure centres and employment agencies are all able to improve efficiency and flexibility with Venus Versatile desking.

Reduced cost for Technology Upgrades

Deciding to upgrade technology is simple with the Venus Versatile desk. The Top-Tec range does not include computer hardware, therefore your organisation is not committed to a particular manufacturer or supplier. You are not tied into a technology contract with us, so there's no need to change desks when you upgrade. Security enclosures can be future-proofed allowing for changes in technology and the Venus Versatile desk will accommodate all desktop screens up to 19".

VENUS HEIGHT ADJUSTABLE DESKS

Electronic height adjustment

Suits wheelchair users & multi-age groups

High-level ICT security

You can achieve the most suitable ergonomic working position with the Venus Height Adjustable desk. This secure desk has a range of applications and can be utilised for special needs individuals, schools with multi-age group access to shared ICT resources, or to simply achieve the preferred working height.

Total Security

Venus Height Adjustable desks are specially designed with an integral security panel providing maximum security, whilst the welded tubular frame ensures rigidity and stability. PC's can be protected by a solid steel computer enclosure that is bolted to the security panel and frame. TFT screens can be secured to the desk by a monitor bracket that also doubles as keyboard and mouse security.

Flexible Design

The electrically operated Venus Height Adjustable desk incorporates a quiet motorized function that allows the desk height to be infinitely adjustable from 690mm to 850mm. All desks are made to measure and a wide range of desk sizes is available to suit your particular room plan. Every desktop comes complete with two cable access ports as standard.

Security Options

Venus Height Adjustable desks only become secure when combined with computer enclosures and monitor brackets which are available as optional extras. Top-Tec computer enclosures are offered in a range of styles and sizes, and can be fully enclosed to ensure that the PC can't be tampered with, or partially enclosed at the front and back to allow access to cables, ports and disc drives etc, please see pages 10 and 11 for further details. Computer enclosures can be added to either side of the desk allowing left or right-handed use.

This combination provides 24 hour security and use, without impeding access.

Venus Height Adjustable desks can be ordered with or without any associated security devices - please see pages 10 & 11 for details.

TOP-TEC
FURNITURE

DESK OPTIONS

Cable Trays

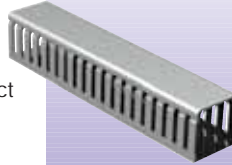

Cable trays are available to fit all Venus and Mars models, providing excellent cable management assistance.

Trunking

We have a comprehensive range of cable trunking available.

Please contact us for further details

Power Take Off

Easily fitted into either of the cable access ports available on all Top-Tec desks. The T-T DDM-01 consists of two 240v power sockets and provides the ability to power portable devices. A simple lever allows you to lower them into the desk and out of the way when they are not in use.

Desk Castors

3" diameter swivel rubber on nylon castors enable you to easily change your desking layout to suit your needs. They add 100mm to the height of the desks.

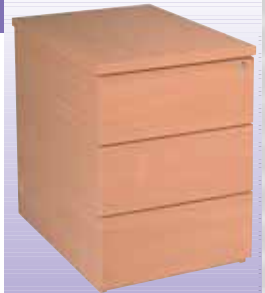

CA3-61-RN

Drawer Units

The hanging drawer unit can be securely mounted to the underside of your desk, whereas the mobile drawer unit fits beneath your desk. The hanging pedestal has three slim-line drawers and the mobile pedestal is on castors with three deep drawers. Both drawer units have a lockable top drawer.

Code	Description	Width (mm)	Depth (mm)	Height (mm)
T-T PH01-B	Hanging drawer unit	470	500	460
T-T PM01-B	Mobile drawer unit	470	500	680

Laptop Desk Lockers

These are designed to be bolted to our steel frame or to the underside of conventional desktops. These desk lockers are robust, discrete laptop storage devices that allow you to recharge your laptop while it is securely stored. The T-T 100-L has a hinged door and the T-T 100-008 has a sliding drawer to ensure that your laptop remains secure.

Code	Description	Internal Dimensions (mm)			External Dimensions (mm)		
		Width	Depth	Height	Width	Depth	Height
T-T 100-L	Laptop desk locker	420	350	60	500	380	64
T-T 100-008	Laptop drawer	465	500	63	505	555	93

Laplok Security System

The Laplok security system bolts onto your desktop and secures one laptop. Sizes are available to fit both regular and widescreen laptops.

STANDARD
