# INTRODUCTION

Established in 1996 and based near Stroud, Gloucestershire, in the heart of the Cotswolds.

Five Valley Signs & Labels has evolved into a multi-process company combining traditional screen and flexographic printing techniques with modern digital, engraving and laser technologies.

Our dedicated team are conscientious to quality and service and have a wealth of knowledge and experience to help develop your ideas and designs into impactable visuals.

# SIGNS

Complete signage solutions, covering all aspects of corporate branding, from design, through manufacture to installation

## SIGN SYSTEMS & DIRECTORIES / POST & PANEL

## PROFILE CUT & BUILT UP LETTERS

## SHOP FRONT & FACTORY FASCIAS

## VINYL WINDOW GRAPHICS

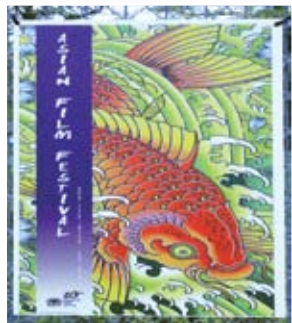

# DIGITAL PRINTING

Continued investment in the latest digital printing technology allows photo quality imaging onto banners, vinyl stickers, wood, glass, plastics, metals and acrylics. Creating one off, eye-catching visuals to multi-run point of sale displays.

Roll to roll print and cut. 1440 dpi imaging, 1.2 metres wide direct to vinyl, banner and canvas with profile precision cutting.

UV wide format allows direct to substrate printing onto metals, plastics, wood and glass up to 25mm thick with a printable area of 9'x5' in one pass.

# VEHICLE GRAPHICS

Vehicle livery is an effective form of mobile advertising. From single vehicle to entire fleet. Five Valley Signs & Labels offer computer cut vinyl graphics, photo quality digital imaging or temporary magnetic signs. Raising the profile of your business to a wide audience.

LASER MARKING

# SUBLIMATION

Our digital transfer systems allow us to create many personalised products including badges and awards. We can print onto almost anything - just ask!

# T-SHIRTS

Whether raising the profile of your team or club, or creating a corporate image or promoting an event. We are able to offer a range of options on garment decoration; computer cut lettering, digital transfers, screen printing and embroidery.

# SCREEN PRINTING

A traditional and versatile process still essential in today's industries. Providing vibrant, long-lasting colour onto a wide range of substrates (aluminium, polypropylene, vinyl, acrylic, polycarbonate and plastics). From in-house artwork creation to stencil production, through print run, and all aspects of finishing under one roof, gives us full control of your project.
