USED EQUIPMENT

Strong and reliable

Strong and reliable

Alimak Hek sells mastclimbing workplatforms, transport platforms, material hoists and personnel/material hoists produced by Alimak and HEK Manufacturing, on a worldwide scale. Alimak and HEK together have more than 90 years experience in rack and pinion technology. These machines offer excellent quality based on the use of high-quality and durable materials, and a fully proven production method.

In other words, Alimak Hek stands for solidity, reliability and safety.

Because of this rock-solid reputation, the requirements Alimak Hek imposes on its used equipment are just as strict. These machines, too, must always be reliable and safe, wherever they are used. After all, their application is identical to that of new machines. As a consequence, Alimak Hek only sells good-quality used machines.

Alimak Hek used equipment for the most part originates from our own rental fleets, and we are able to offer units of all ages, capacities and specifications. It goes without saying that on the basis of our own service programme, these machines have been kept in tip-top condition.

Product classes

Alimak Hek offers machines in two classes. Alongside the Select Class which confirms good overall condition, (as below) age, brief history of ownership and offers excellent value for your investment, Alimak Hek also offers the Premium class. This class includes all as per Select class plus further in-depth refurbishing plus manufacturers warranty as standard.

SELECT CLASS

Full safety check All devices fully functional. (If fitted) the overspeed safety device is current and tested. All barriers/handrails and other mechanical safety features are in place/fitted

Component check Any components worn beyond the manufacturer's recommendation are replaced. Drive pinions/rollers and all moving parts are within specified wear tolerances.

Mechanical check All damage to the equipment is inspected and repaired. All components required are complete and correctly fitted. All specified parts are sold with the unit. Surface treatment is inspected and repaired if necessary.

Functional test The unit is fully tested prior to delivery to ensure correct operation. The drive unit must operate satisfactorily, following testing. All electrical equipment is fitted and is functional.

Documentation All units are supplied with the correct manuals for the unit purchased. The unit is supplied with manuals relevant to the particular model, including the technical description/installation and maintenance.

PREMIUM CLASS

Service programme Standard checks as with Selected Class

Full structural check Base frames and joints are checked and as necessary overhauled.

Full surface treatment renovation Inspection and where necessary repainting.

Manufacturer's warranty on renovated equipment Offered as standard, with period dependant upon destination.
