

**WMTS LTD**

**Environment and Pollution Control**

**Waste Management Total Solutions Ltd.**

Company

I should like to introduce you to Waste Management Total Solutions Ltd. WMTS is a specialist company in the field of pollution prevention, waste management, emergency pollution response, and contaminated ground remediation. We offer a rapid response service, bespoke remediation options, correlation with larger tanker and machinery support mechanisms, waste disposal, consultancy and can also supply oil and chemical absorbents on request.

As a small company, WMTS does not have excessive overheads and therefore can offer a competitive service, whatever your environmental concern. We have working agreements with national companies for soil and water analysis, waste removal and bio-remediation.

WMTS has accreditation under ISO 9001, ISO 14001, OHSAS 18001, are registered carriers, and we also are level 3 UK Spill contractors.

In addition to dealing with pollution spills and clean-ups, WMTS are Achilles Link-Up approved to work on and near railways and other link up affiliated businesses. We are currently spearheading the revolutionary bio-remediation of heavily contaminated land, and vulnerability surveys in the south of England.

With the changes to the Groundwater Regulations, we can offer a bespoke service to clients who have contaminated land that requires remediation, or other environmental problems, and are not sure how to proceed.

Our staff and operatives have many years experience within the environmental industry and we now look forward to working with you.

Yours faithfully,

Peter Nicholas  
Director, WMTS Ltd.
