OUR SHUTTERS

WHY SHUTTERS?

The benefits of choosing shutters

Increased insulation

Known for their excellent energy efficiency and increased insulation techniques, shutters help to reduce heat loss but also gain control of the natural temperature in your home.

Light control

Louvred shutters have excellent light control. By simply tilting the louvres up or down, you can redirect sunlight whilst also maintaining your privacy at the same time.

Privacy

By having a fitted wooden structure on your windows, shutters can help deter break-ins. Louvred shutters also help maintain privacy, meaning it's harder for people to see into your home, even when you are not there.

Increased home value

Adding shutters to your property, which are a fixed window dressing with a long lifespan, can help increase your home value.

A range for everyone

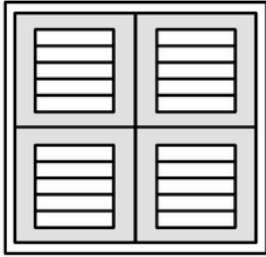

We know every home and business owner has different styles, which is why we have a range of products and features to suit everyone. From fitting style, to colour and material, shutters are adaptable to suit your individual interiors.

A VARIETY OF STYLES

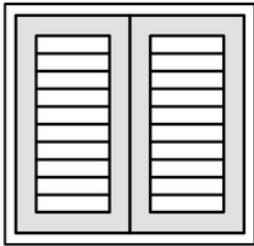

Our specially designed range of shutters are perfect for any homeowners or businesses. Choose from some of the finest materials, finishes and designs to suit your unique needs.

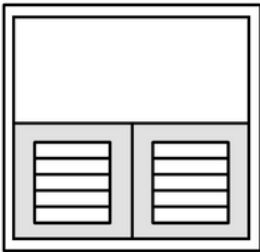

TIER-ON-TIER

Tier-on-tier shutters consist of two separate sets of panels stacked vertically, allowing the top and bottom sections to function as individual doors.

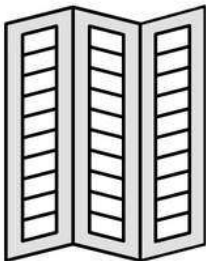

FULL HEIGHT

Full height shutters span the entire window and can include a divider rail or a louvre split, enabling independent control of the slats in the upper and lower sections.

CAFÉ STYLE

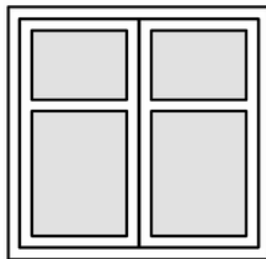

Café style shutters cover just the lower portion of the window, providing privacy while still allowing natural light to flow through.

BIFOLD

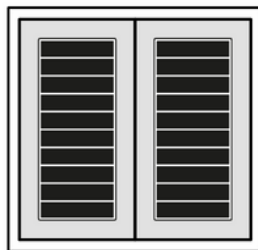

For both tracked doors and window shutters, we provide a bifold option, offering a space-saving solution with a clean and stylish appearance.

Solid wood panels are designed to completely cover your windows, with no built in louvres, available in customisable configurations to suit your needs.

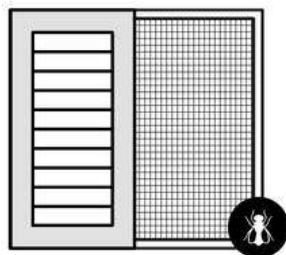

SOLID PANEL

An innovative dual-layer design that provides a complete blackout effect, ensuring uninterrupted and restful sleep.

BLACKOUT

Shutter panels equipped with built-in fly screens to maintain a comfortable and bug-free environment during warmer months.

FLY SCREEN

Bespoke panels manufactured to fit uniquely shaped windows, including circular, sunburst, and triangular designs.

SHAPED

FLY SCREEN SHUTTERS

Our Fly Screen Shutters are an excellent, year-round window shading choice.

Fitted within a specialised frame, identical to a blackout shutter blind, our fly screens are easy to operate with a pull and push tab.

BLACKOUT SHUTTERS

Blackout shutters have become a popular window dressing for bedrooms and these are exceptional room darkening shutters with integrated blackout blinds.

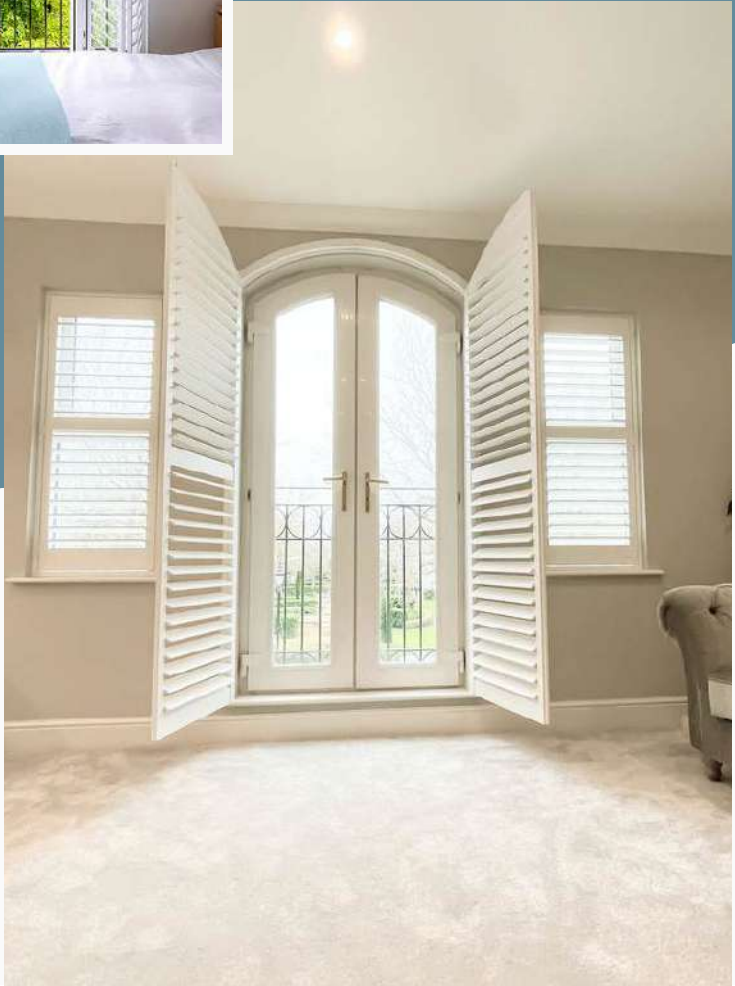

The system provides two light-reducing layers to ensure darkness when desired.

*Available to purchase as duo fly & blackout shutters, all within one shutter frame.

SHAPED SHUTTERS

From arched windows to triangular, we can design bespoke-shaped shutters that fit your unique spaces. Designed in a range of our premium materials, you can have shaped shutters for any room of the home.

TRACKED SHUTTERS

Tracked shutters are an excellent choice for large glass areas and bifold doors.

We provide two options for your tracked shutters, including sliding panels that bypass each other or as bifolding panels. Whatever your preferences, we can tailor the design to create shutters that are perfectly bespoke for your home.

OUR MATERIAL COLLECTION

Find the perfect solution to suit your style and budget with our fantastic range of shutter materials.

We are committed to using only premium materials, carefully inspected to surpass industry standards. Designed for durability, our shutters are rigorously tested to withstand heavy, daily use, giving our customers complete confidence that they are investing in the very best.

Perfect for:

- Bathrooms, kitchens or utility areas
- Busy family homes

POLY PVC

Waterproof shutters

These innovative shutters combine the timeless elegance of traditional plantation shutters with the modern durability of uPVC materials (Poly Vinyl Shutters).

As a result, these shutters are not only scratch-resistant, but they also have aluminium-reinforced louvres to maintain their longevity, making them an excellent cost-effective investment.

Available in a range of colours, suitable for many interiors.

EXCLUSIVE

PAULOWNIA+

Durable hardwood shutters

Take a look at our exclusive durable hardwood Paulownia+. Made from genuine Paulownia hardwood with the addition of a tough Polymer protective outer shell. This creates a premium product that remains lightweight, resists dents and scuffs and is incredibly tough.

This material has quickly become a customer favourite, and can be used for a variety of windows and rooms due to its hard-wearing finish.

The finishing touch:

This wood can be finished with any of our distinctive palette of 18 colours, giving you a unique shutter to harmonise and enhance any interior.

Light and sustainable

Paulownia hardwood shutters offer great value for money and they add a touch of luxury to any home.

This product is a lightweight hardwood and is one of the most sustainable additions to our range of shutters. This product is fast-growing and great for thermal insulation.

Finish options

Paulownia is one of our most adaptable materials, with a variety of style options, louvre widths and finishes available to make these speciality shutters, truly your own.

- Sandblasted
- Painted
- Stained

MONTEREY PINE

An industry favourite

Monterey Pine is a popular wood, used for many years by shutter specialists and carpenters. Pine is perfect for every style and shape of shutter, especially in bay windows.

Sustainable Pinewood is light, durable and flexible, making it an excellent choice for perfecting different finishes of shutters.

As well as this, they are also great sound and heat insulators, helping you keep a peaceful, temperature regulated home.

Long life span

Great value for money

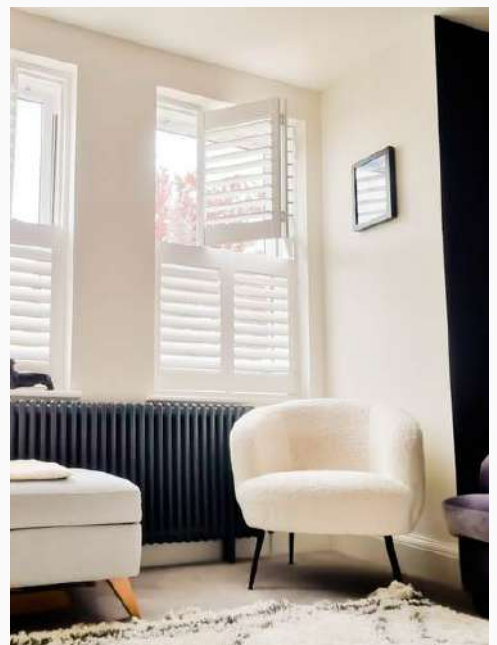

BASSWOOD

Option to be
made in the
UK

Basswood is a popular and elegant choice for interior shutters. Renowned for its durability and flexibility, this high quality hardwood works beautifully for crafting shutters in a wide range of styles.

Known for being the most premium quality shutter material, it has many qualities to make it so:

- Excellent thermal properties
- Lightweight hardwood
- Can be painted or stained
- Great for tier on tier, bifold or full height style options
- Ideal for large windows
- A great option for solid panels

ASHWOOD

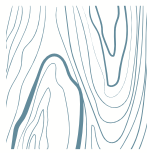

Designed to be unique

Our White Ash Shutters are perfectly suited to those individuals who are looking for something special. White Ash wooden shutters are quite unique as they provide a very rich and deep grain effect which is always visible even in a painted finish, giving the shutters a beautiful wood effect look.

Used for many years for furniture and even flooring, Ashwood is the strongest shutter product in the industry, perfect for family homes and high-traffic areas.

Excellent Durability

Visible grain texture

Long lifespan

OUR PREMIUM SHUTTERS

SUSTAINABLY MADE IN THE UK

We are proud to announce that we can offer a premium hardwood range, made in the UK. This gives us the opportunity to produce wooden shutters in a shorter lead time for our customers.

Handmade shutters by experienced carpenters are the best choice for homeowners because they are made with high-quality Basswood and excellent craftsmanship.

HOW CAN WE DESIGN YOUR UK SHUTTERS?

- Super White colour finish
- Full Height & Café Style
- All tilt systems and louvre sizes 64, 76 & 89mm.
- White or stainless steel hinges

The Benefits:

- Energy efficient
- Short lead times!
- Eco-friendly
- Supports local economy
