Welcome to Plantscape

Plantscape was established in 1982 and provides a comprehensive range of horticultural, arboricultural and landscape services. We work for domestic and commercial clients throughout East Anglia. Our team of skilled staff take pride in delivering a tailored service to meet your requirements.

About Us...

Operating from Church Nursery, south of Norwich, Plantscape is one of the region's foremost family-owned, independent, multi-faceted, tree and landscape businesses. We have developed a strong customer base serving companies and businesses of all sizes, together with local authorities and private clients. Our outstanding reputation is based on providing honest advice, competitive quotes, prompt communication and exceptional client service, all underpinned by our five core values:

- **Cooperation:** We aim to work with you to overcome obstacles, find solutions and deliver exceptional results, meeting your aims and objectives.
- **Integrity:** Committed to working in a manner that is transparent, open, and honest, we go to great lengths to build lasting relationships and maintain trust.
- **Responsibility & Safety:** Safety is a necessity in our work and daily activities. We strive to protect the health, safety and wellbeing of people, property, and the environment and adhere to industry best practice.
- **Environmental Impact & Sustainability:** Preserving the Earth and its resources is essential to our decision making. We are constantly looking for sustainable and innovative alternatives to mitigate our environmental impact.
- **Excellence:** We take pride in our work and strive to be market leaders in the arboricultural and horticultural industries. Our operatives are our most valuable assets, and we promote an inclusive work environment based on leadership, teamwork, and training.

Plant Displays

Plants make us instinctively feel more at ease with our surroundings, yet simultaneously, energised and invigorated. Countless studies have proven that plants improve the indoor environment, reduce levels of pollutants and lead to greater productivity among the people inside. Interior landscaping is the integration of architectural plants to add interest and create an attractive, calming indoor atmosphere. From private individuals to large commercial clients, our aim is always to exceed your expectations.

Landscaping

At Plantscape we have the knowledge, equipment and workforce to fulfil private and commercial contracts, no matter how big or small. Whether it's to transform a residential garden, replant a native hedgerow or create immediate, visual impact for a new development or public space, we would be delighted to assist. Executed properly and sympathetically to its surroundings, a well-balanced outdoor space can feel like an extension of the interior. We implement sound horticultural principles in all our landscaping works.

Grounds Maintenance

Harmonious landscaping and well-kempt grounds send a welcome message to visitors and make a positive statement about a company's image and core values. The first impression presented by a building and its grounds will have a lasting impact on visitors. Herbaceous borders, shrubs, architectural grasses, specimen trees, lawns and hedges add interest and enhance the environment. However, regular maintenance is required to keep them under control, looking healthy, litter free and safe. At Plantscape, we create bespoke maintenance plans, tailored to meet our clients' needs.

Tree Surgery

As an Arboricultural Association Approved Contractor, our clients have the comfort of knowing that we hold all the relevant industry standard accreditations and that we meet the benchmark imposed by the industry's leading professional body. Our arborists are fully certified, insured and carry out all work in accordance with current health, safety and environmental legislation and industry best practice, including British Standard 3998 'Recommendations for Tree Work' and the Industry Code of Practice for Arboriculture. We've invested in specialist vehicles and machinery to enable us to complete operations safely and efficiently.

Forestry & Site Clearance

We're well equipped to provide forestry, tree and vegetation clearance services. Whether it's thinning woodlands or clearing development sites using excavators, tree shears and large wood chippers, or dealing with Ash Dieback along highways using a lorry mounted grapple saw, we have the equipment and know how to complete projects safely and efficiently. We have a range of stump grinders of varying sizes, from smaller, pedestrian stump grinders to fit tight spots through to large self-propelled stump grinders designed for site clearance work.

Firewood & Woodchip

We produce and sell locally grown firewood and woodchip from managed woodlands and tree surgery operations. All firewood is Ready to Burn with a moisture content below 20% and either kiln or air dried, depending on your preference and the time of year. Seasoned woodchip consists of mixed hardwood species for use on landscaping schemes, beds and paths. Visit our online shop to place your order.
