

A DIFFERENT WAY

FOR A GREENER APPROACH TO FIBREGLASS

At Planter Protect Ltd, we truly value the significance of plants in the workplace. We believe that the planter inserts should align with the sustainability goals that the plants represent.

INTRODUCTION TO PLANTER PROTECT

At Planter Protect Limited, we are a family-run business focused on exceptional customer care. Our team ensures precision in every project and is available to answer inquiries throughout the process, aiming for a seamless and stress-free experience while meeting deadlines.

WHY WE BELIEVE RELATIONSHIPS MATTER

Our company values focus on prioritising the customer. We believe that strong relationships are key to delivering exceptional service. To maintain our status as your trusted team, we adhere to three core principles: Quality, Integrity, and Reliability. Together, we can achieve great results.

WHAT WE DO

At Planter Protect Ltd, we specialise in providing innovative solutions to ensure the longevity of your planters. Our range includes bespoke planter liners and planter inserts designed to offer robust planter protection for your planters.

Our design philosophy prioritises creating durable planters and linings that are as environmentally friendly as currently possible. By utilising eco-conscious resin, we bring your vision to life while minimising our impact on the planet.

MATERIALS MATTER

Materials matter a lot to us. We know that GRP isn't the greenest option out there, but we're committed to making our products as environmentally friendly as we can. We use PET resin made from recycled plastic bottles.

BENEFITS OF PET RESIN

RECYCLED BOTTLES

For each 220kg drum manufactured, around 1,800 plastic bottles are kept out of landfills and oceans.

NO DEFORESTATION

No bio-products that lead to deforestation are included (such as palm oil).

MAINTAINING QUALITY

Green technology putting recyclable material into our product without sacrificing performance.

LOWER GREENHOUSE GASES

Conserving natural resources, reducing energy consumption during production, and minimizing greenhouse gas emissions and chemical usage.

RETURN

REPURPOSE

REUSE

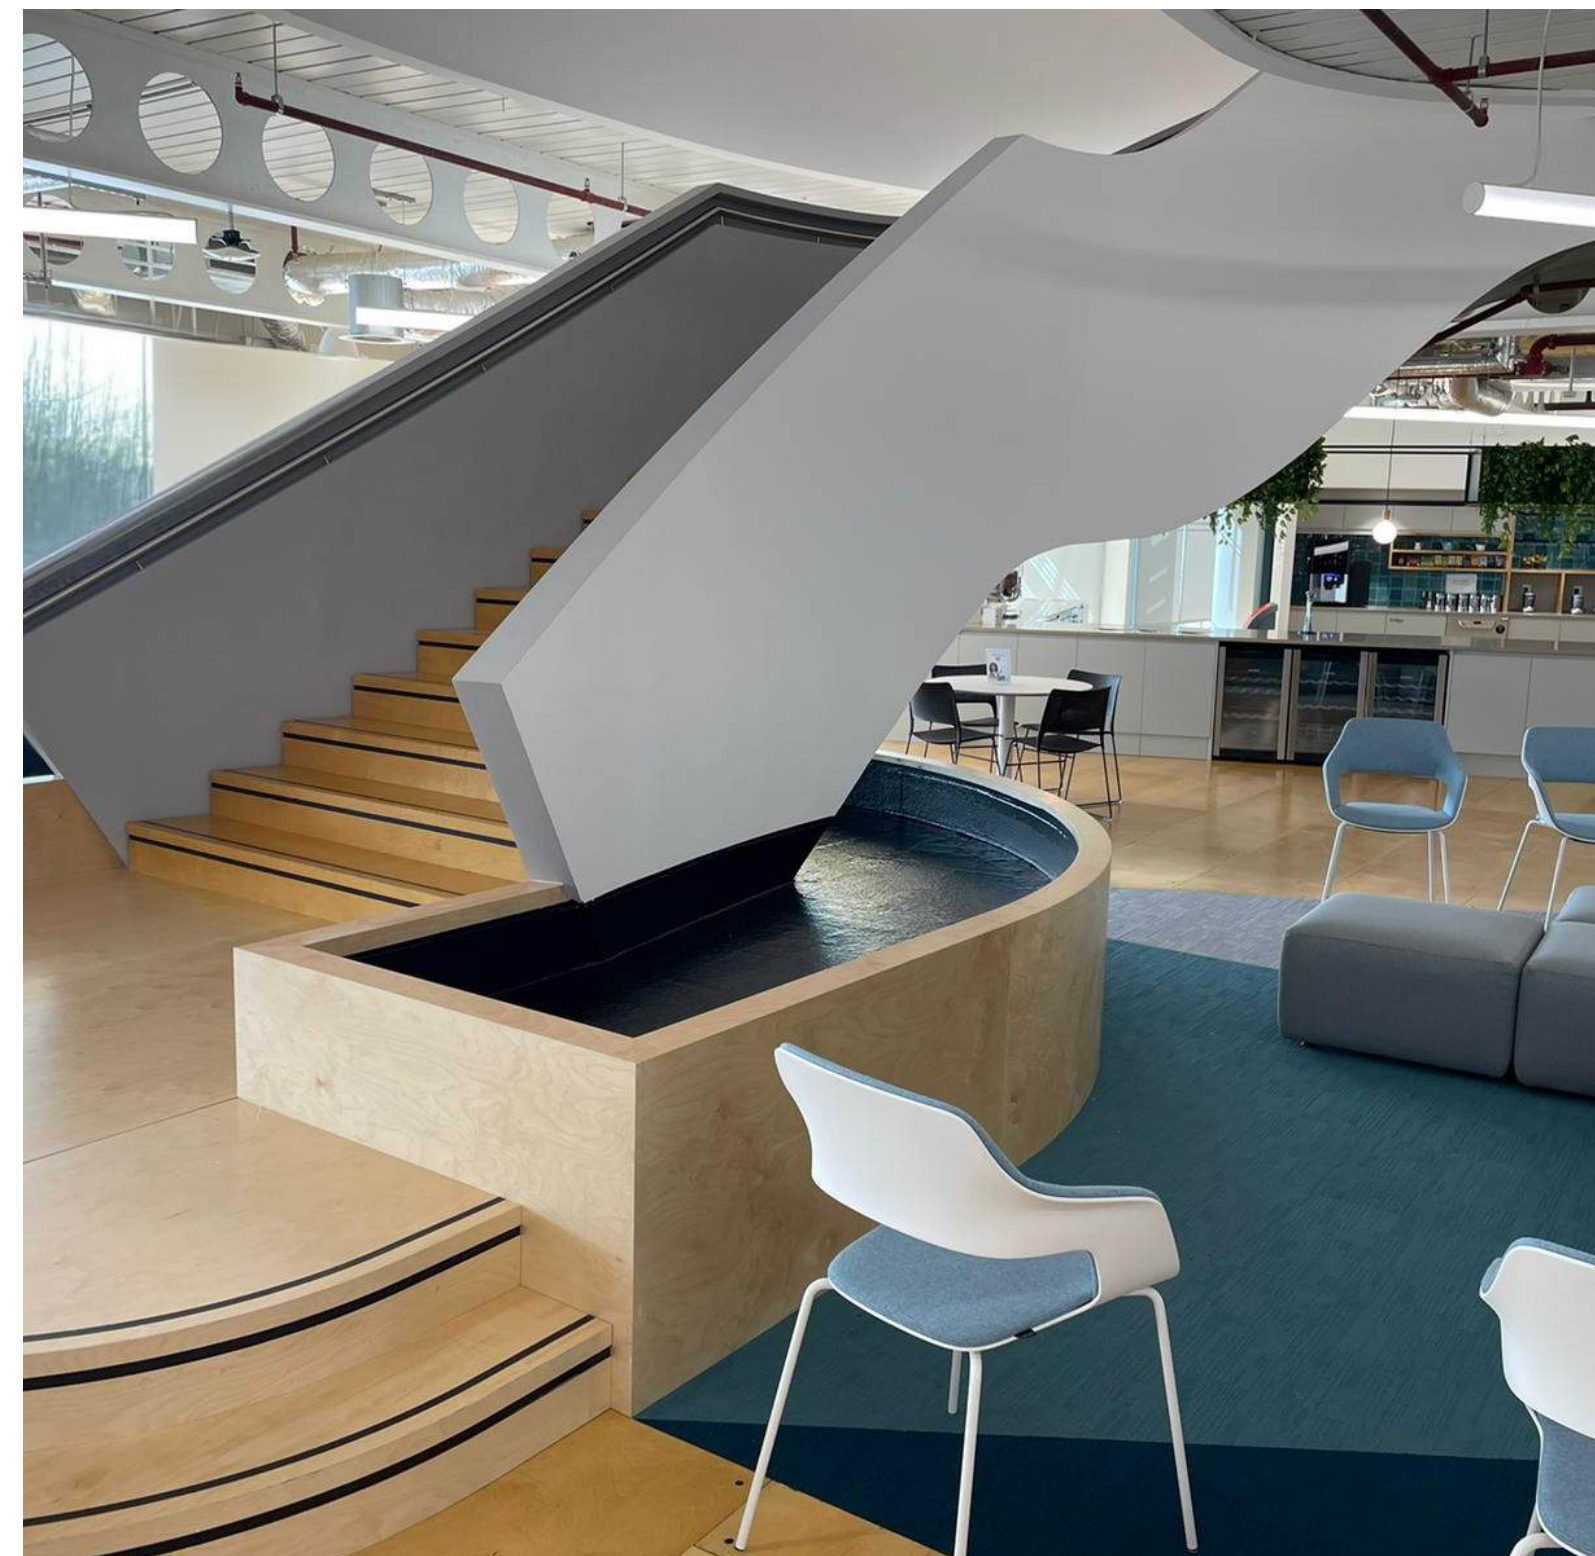

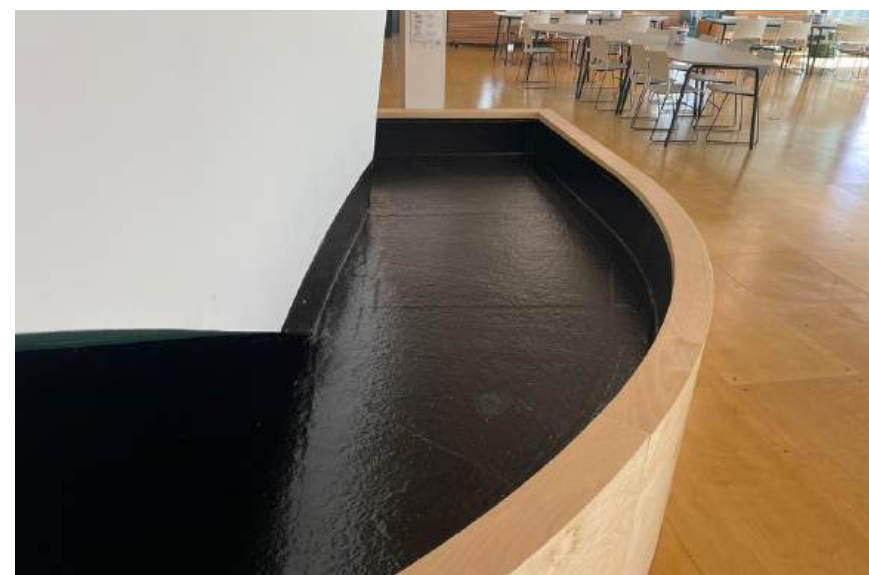

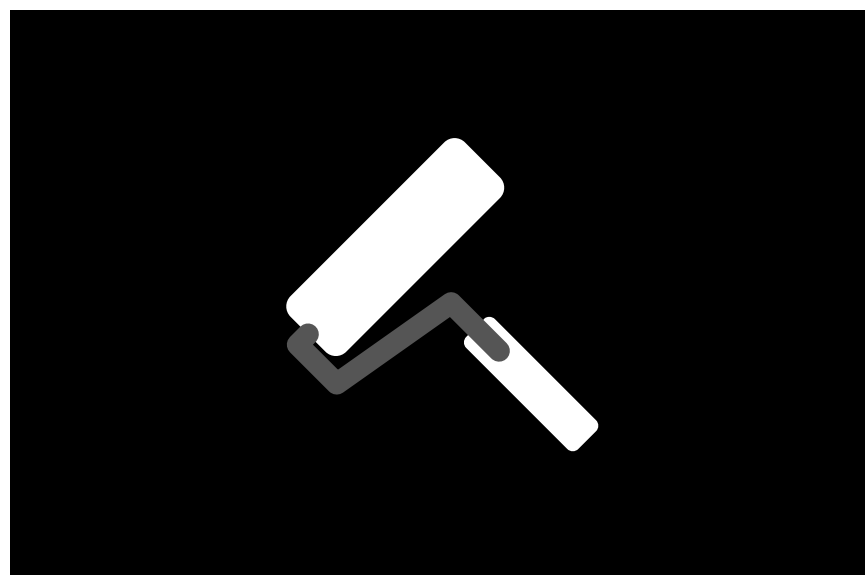

RETURN AND REPURPOSE

Our Return and Repurpose Service is a straightforward yet highly effective solution to reducing the landfill problem. We've made it easy for customers to return any planter insert made by Planter Protect Ltd. Each insert is sealed with a sticker that indicates it is part of our return program, ensuring that it never has to end up in a landfill.

THERES MORE...

We provide onsite linings for larger planter projects, ensuring a protective layer applied by our skilled team. This service enhances both the beauty and longevity of your planters.

Your Design Brought to Life

BESPOKE MOULDINGS

Imagine the endless possibilities of creating stunning pieces that fit perfectly in your space. Whether you need a specific thickness, design, or color, we are here to help turn your ideas into reality. Let us support you in enhancing your brand and design with our tailored solutions. Start your journey today and bring your or your clients' dreams to life!

Bespoke Examples

The Ying Yang

This piece has countersunk wheels - perfect for a changing office space.

The Urn

Great for the smaller spaces looking to create some dramatic height.

The Cascade

Beautifully designed water feature with cascade creating a statement piece.

BESPOKE MOULDINGS

The Dish

Ideal for common areas, conference rooms, and reception spaces, The Dish is easy to maintain and available in various sizes and colors.

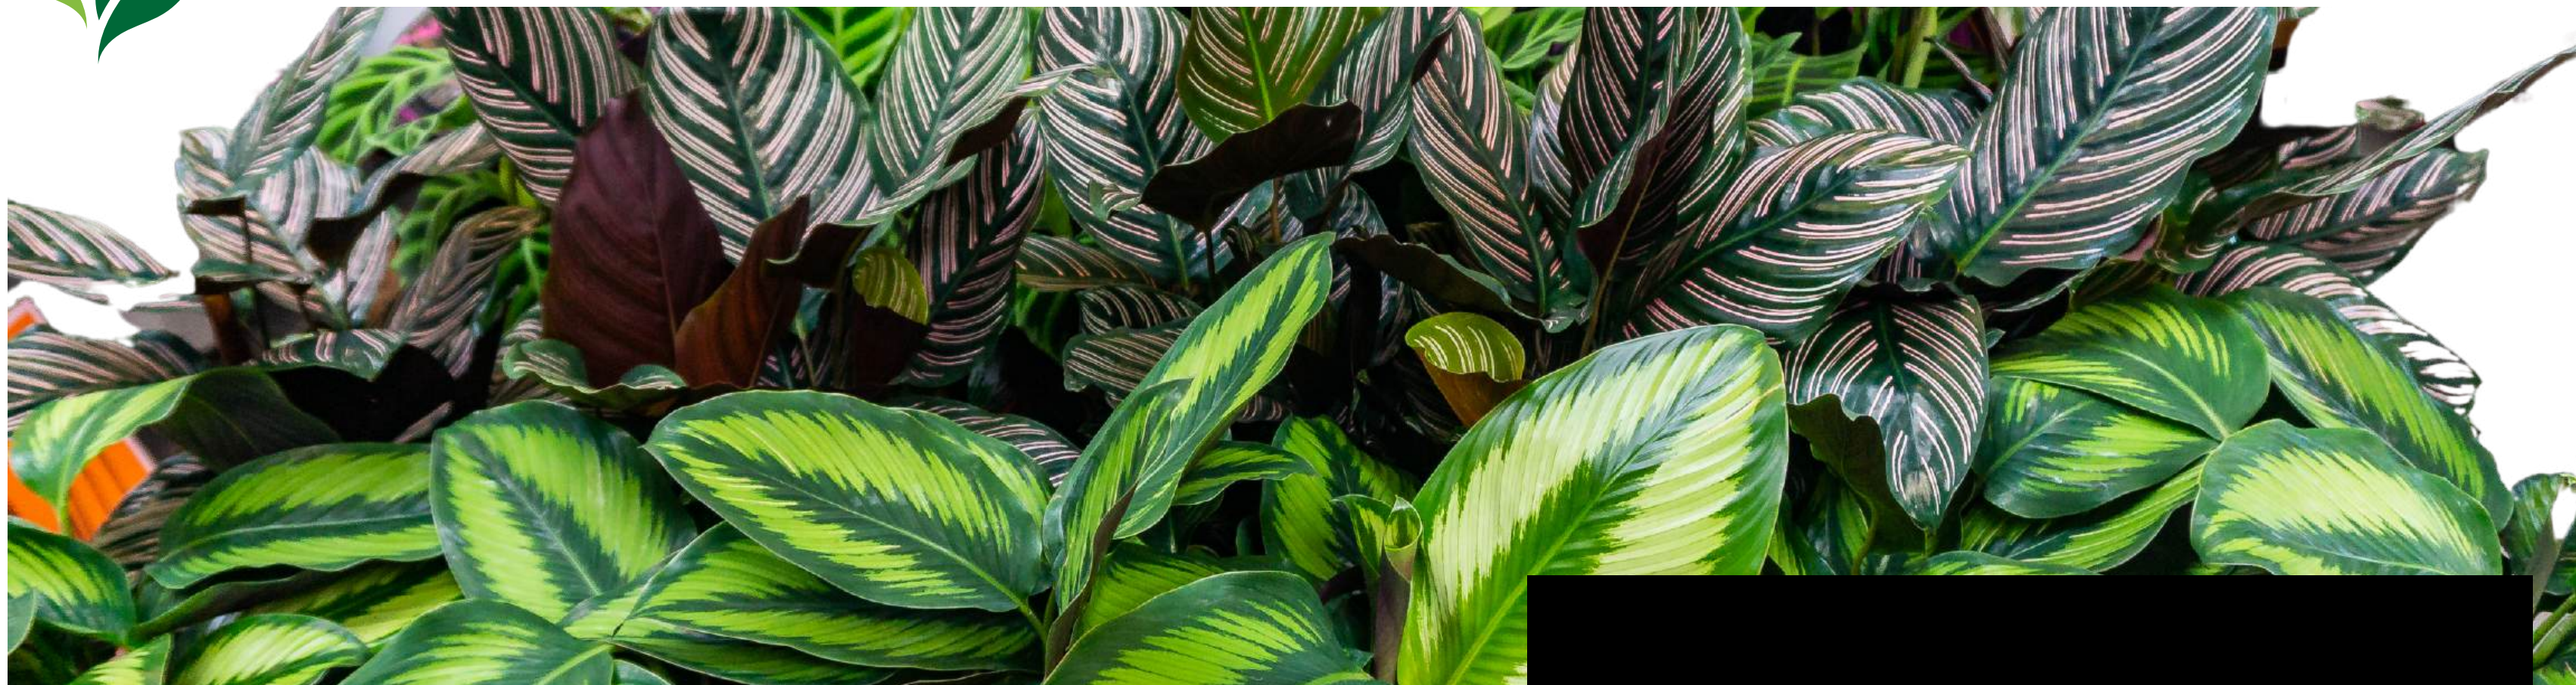

WORKING TOGETHER

We truly believe that our three core values help create genuine connections and build lasting relationships that work.
