20kg bag - coverage 666m² (797yds²)*

■ **SOWING RATE** *Overseeding*
15g per square metre.
Establishing a new lawn
30g per square metre.

■ **GROWTH**
Harrowden Premium Lawn seed is ideal for repairing an existing lawn and is the same mixture used to grow our British Standard Premium Lawn Turf, TURF-S6. The inclusion of the decade's most significant progress in Perennial Ryegrass breeding, Tetraploid Ryegrass brings new levels of stress resistance as well as excellent summer and winter greenness. The seed cultivars in this mix have been independently selected to provide the best quality sward. This results in a unique blend that produces a finer leaved luxurious but hardwearing lawn. Can also be used to establish a new lawn from scratch.

■ **TYPICAL SEED MIXTURE**
Perennial Ryegrass, Slender Creeping Red Fescue, Strong Creeping Red Fescue, Chewing's Fescue

■ **USES**

- High quality landscapes areas.
- Commercial landscaping.
- Domestic lawns.
- Golf tees.
- Hardwearing amenity sports areas.
- Urban areas.

PURITY AND GERMINATION CERTIFIED PREMIUM LAWN SEED. IDEAL FOR CREATING NEW LAWNS OR REPAIRING DAMAGED OR THIN AREAS.

FEATURES

Due to the unique mix of species and cultivars this seed will produce a lawn with some shade, drought and salt tolerance.

Good year round colour.

Close mowing capability.

High shoot density with good rhizomatous recovery.

Outstanding tolerance to Fusarium, Red Thread and Dollar Spot.

Compatible with most growing mediums found throughout the UK.

*Coverage can be doubled if using to overseed
