

Introducing our new Open Webinars for **'Compressed Gases'** and **'Cryogenic Gases'!**

Introducing our new Open Webinars for Compressed and Cryogenic Gases, delivered live with a Proactive Gas Safety instructor.

Suitable for people who work with Compressed or Cryogenic Gases and associated equipment who wish to learn more about how to work safely with them.

The aim of each course is to highlight the importance of company Risk Assessments when using Compressed gases, by demonstrating industry best practice, exploring strategies for identifying and mitigating risks and sharing best practice and ideas.

Reserve your place now - £195pp & per course
